

FAST FACTS

Company Name: ANDE Corporation

Locations: Longmont, Colorado
Waltham, Massachusetts
Beijing, China

Corporate Leadership: George Heinrichs, Chief Executive Officer
John Rose, Chief Financial Officer

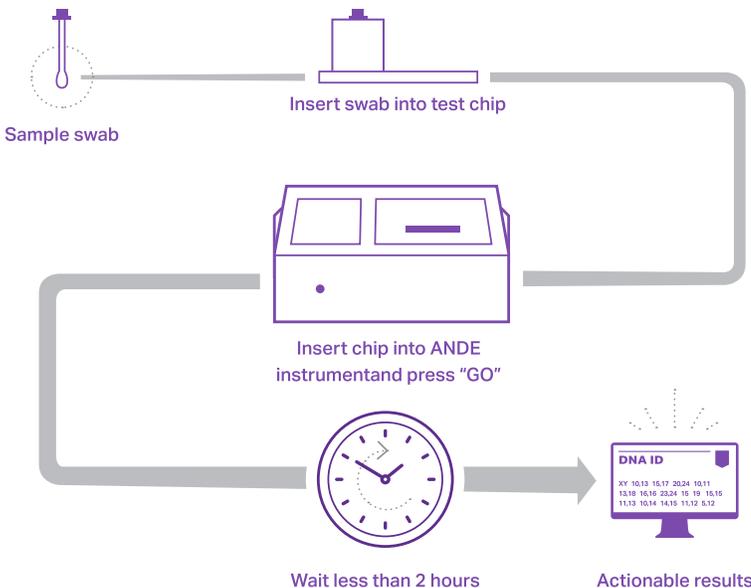

The Story of ANDE:

About the ANDE Rapid DNA Identification System:
The ANDE system performs Rapid DNA Identification—the fully-automated generation and interpretation of DNA IDs—in less than two hours, outside the lab, by non-technical users. The system consists of a ruggedized instrument, an expert system that performs data interpretation, and a single-use, all-in-one consumable chip that accepts an oral swab or forensic sample.

About ANDE Corporation:
ANDE is the global leader in Rapid DNA. With a mission to use Rapid DNA to create a safer world, ANDE's pioneering work is already having major impacts in the wide range of applications in the U.S. and internationally. ANDE believes that moving DNA analysis from sophisticated laboratories to the police station, battlefield, borders, and disaster sites will dramatically transform public safety and strengthen national security.

Founding Year: 2004

More about ANDE:

- ANDE provides fully automated generation and interpretation of a DNA ID in less than two hours.
- ANDE was the first and only Rapid DNA system approved in 2016 by the FBI National DNA Index System (NDIS). ANDE was approved again in 2018 as the FBI standards were updated.
- ANDE is rugged and portable, passing military-grade ruggedization tests (U.S. Military Specification 810G) and approved by the US Department of Defense.
- ANDE is the first and only Rapid DNA system to enable non-technical operators to process samples in the field since 2014.
- ANDE is easy to use, with virtually no operator training necessary.

ANDE in Operation:

Founded in 2004, ANDE's pioneering work is already having major impacts in a wide range of applications. Installations and applications include:

FBI

ANDE is the first and only Rapid DNA Identification System to receive National DNA Index System Approval from the FBI. Based on ANDE's success, the US Government passed the Rapid DNA Act of 2017 by unanimous consent, permitting Rapid DNA Identification to be performed on arrestees across the US.

Local Law Enforcement

ANDE is being utilized in cities around the world to solve crimes in real time, eliminating the months-long wait for lab results.

Military

ANDE is the first and only Rapid DNA Identification System to receive U.S. military approval. ANDE is ruggedized to U.S. Military Specification 810G.

Disaster Victim Identification

ANDE is the first Rapid DNA system to be used as the immediate identification tool at a large-scale disaster (2018 California Camp Fire).
