

COATING SOLUTION FOR AGRICULTURE, CONSTRUCTION & EARTHMOVING (ACE)

Your Challenges, Our Solutions

Heavy equipment in agriculture, construction and earthmoving must endure harsh conditions, making proper coating essential to withstand harsh environment. Beyond protection, paint appearance is crucial for branding in an industry where loyalty and brand preference run deep.

BOND • PROTECT • BEAUTIFY

WE PROVIDE PAINTING SOLUTIONS

Why you should choose Sames?

The performance of an ACE machine relies on a durable surface coating—protecting it daily from harsh weather, soil, and other chemical and mechanical challenges.

Sames provides manual, automatic and robotic solutions to protect and beautify your machines.

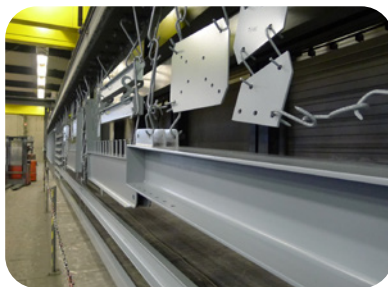

IMPROVE YOUR PRODUCTIVITY

- Improve productivity
- Robotize / Automatize your process
- Mix 2K paint automatically
- Reduce downtime drastically
- Digitalize for better

REACH YOUR GREEN GOALS Limit VOC, waste & material use

- Reduce paint and solvent consumption
- Reduce energy consumption
- Apply WB paint with electrostatism
- Apply highly viscous paint

ACHIEVE THE RIGHT COATING FINISHING, PROTECTING, SEALING, BONDING

- Improve coating performance (film thickness, uniformity, ...)
- Improve finishing quality
- Improve Right First Time
- Improve accuracy of high-viscous dispensing

DESIGNED FOR YOUR PAINTSHOP

Our solutions meet your challenges

WE PUMP

For over a century, **Sames** has been designing and manufacturing industrial pumps, offering a versatile range precisely tailored to industry needs.

- **Pump any greener paints whatever they are:** handle viscous, Ultra-High Solid Content paints at the highest pressures and use our stainless-steel version for corrosive waterborne paints.
- **Pump 8 years with zero maintenance:** reliably pump moisture-sensitive and light-sensitive paints with our Flowmax bellow pumps.
- **Decrease energy consumption up to 50%.** Electric Paint Circulating System with EPCS pumps

Cyclix drum cover agitator

Magma500 fluid heater

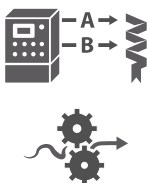

35C50 Airmix® paint pump

40F50 Airless Flowmax® paint pump

WE MIX AND CHANGE COLOR

Automatize the mixing of your 2K and 3K paints with **Sames** mixing and color change solutions: advanced connectivity, efficient waste management, and cutting-edge features to minimize paint and solvent use, reduce costs, and drastically decrease downtime operation.

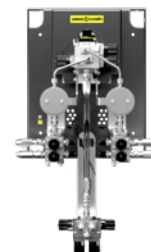

- **Save paint, solvent & time up to 30 %** 2K automatic mixing machine Cyclomix EVO and PU3000
- **Divide by 2 your solvent need and your chemical waste** optimized waste management module
- **Easy to use HMI and remote-control apps** for maintenance with latest full connectivity

Regpro airspray filter-regulator

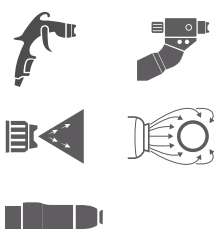

PU3000 electronic & mechanical mixing and dosing system

Cyclomix® Evo electronic mixing and dosing system

WE SPRAY

Sames best appropriate technology for more paint on the parts and less overspray. Airspray, Airmix®, Airless, Rotary bell, with and without electrostatic.

- **More comfort, less fatigue** ergonomic & lightweight manual paint guns Fpro, Xcite®+
- **Airmix:** the ideal balance between finishing quality and productivity, capable of handling relatively viscous paints for thick, single-layer applications. Available in electrostatic version.
- **Boost your process with automatization** All spraying technologies are available in automatic versions, with the added advantage of rotary bell solutions exclusive to automation.

Airspray manual spray gun

Airmix® manual spray gun

Airmix® manual electrostatic gun

Airless manual spray gun

Automatic or Robotic electrostatic spray gun

WE SPRAY POWDER

Powder supply

The Inocenter is a fast color change powder center

Powder spraying

Manual powder gun and complet manual solution

Automatic powder gun

Automatic powder bell applicator

- **Manual application > Inocart manual powder spray-pack solution**
- **Retrofit your old line and save up to 20% powder > modular concept for retrofitting existing line**
- **Ensure highest-quality finishes at highest productivity > cutting-edge powder coating technologies: TEC5 control, Inobell**

Turnkey projects

Our engineering team is available to analyze your projects and meet your expectations.
We are designers and manufacturers of process equipment that is categorized into (4) product ranges:

sames kremlin

Conventional coating solutions
for **liquid paint**, with and
without electrostatism

(Airspray, Airmix® and Airless technologies)

sames nanocoat

Liquid coating application
solutions for **rotating bells**, with
and without electrostatics

sames intec

Sealant and bonding
application solutions

sames inocoat

Powder coating
application solutions

Application and Training centers

APPLICATION CENTER ALL INDUSTRY	AMERICA	EUROPE			ASIA
