London, SW1Y 4TE, United Kingdom**

New Zealand House is a WiredScore Platinum building

Being a WiredScore Platinum building means that New Zealand House can support occupiers with the most stringent technology requirements. The building has been designed as best-in-class across all features of connectivity that matter most to occupiers: number and quality of internet service providers; diversity and resiliency of telecommunications and power infrastructure; wireless network infrastructure; ease of installation and capacity to readily support new telecommunications services.

An overview of the experience at New Zealand House

Category	Your experience at New Zealand House	Regular building experience
 Mobile and Internet	Enjoy unparalleled digital connectivity with top-tier internet providers and superior mobile performance, powered by robust fiber infrastructure for the ultimate online experience throughout the building.	Expect frustrating interruptions and dead zones as you move throughout the building due to patchy digital connectivity.
 Set-up	Enjoy seamless and effortless internet setup with multiple high-speed providers at your fingertips with streamlined legal contracting. Ensuring you easily find the perfect match for your needs and enjoy a smooth, hassle-free digital experience.	Experience a tedious and slow process to setup your internet connection.
 Future-ready	To meet your needs well into the future, the building is equipped with ample spare capacity throughout, including the risers, points of entry and telecommunications rooms. This ensures the building can accommodate new and emerging technologies, providing you with the flexibility and adaptability you require.	Risk future problems arising from an internet connection and mobile connectivity that can't keep up with your growing needs.
 Resiliency	The building's robust infrastructure, including multiple entry points and diverse and secure risers and telecommunications rooms, mitigates against almost all risks to uninterrupted connectivity.	Experience frequent productivity loss and general frustration resulting from your vulnerable, and poorly secured internet infrastructure.

Connected building highlights at New Zealand House

Mobile and Internet

- Excellent mobile signal means your calls don't drop.
- Exercise the power of choice with three high-speed providers to choose from.
- Free Wi-Fi in amenity areas allows you to be connected throughout the building.
- Easily install fixed wireless, satellite and mobile equipment with dedicated space and cable pathways to risers on the rooftop.

Set-up

- Easier service installation enabled by spare capacity within the below-ground telecommunications cable pathway.
- Capacity available throughout risers
- Secure access to risers on each floor prevents unauthorized access and accelerates the installation of connectivity services.
- Dedicated cable pathways ensure best practices are followed when installing telecommunications equipment.
- Protected routing enabled by a top-to-bottom riser with no offsets expedites the installation process.

Future-ready

- A dedicated fiber backbone eases telecommunications installations.
- Standardized access agreements provide you with transparency when onboarding new service providers.
- New internet service providers can be installed quickly with available space in the telecommunications room.
- Connect seamlessly to service providers via a universal communications chamber located near the property line.
- Abundant electrical capacity in the telecommunications room ensures your future needs are met.

Resiliency

- Your connection is safeguarded as the telecommunications rooms are protected by secure access controls.
- Physically diverse routes for your internet connection means your connectivity is robust.
- Enjoy reliable connectivity thanks to diverse riser routing throughout the building.
- Robust diverse power sources protect your telecommunications equipment from outages.
- Connectivity infrastructure in the telecommunications room is protected from flooding.

What is WiredScore?

WiredScore certification is the global standard for digital connectivity, recognizing and promoting best-in-class digitally connected buildings across the globe. Being certified by WiredScore demonstrates the building has gone through rigorous 3rd party verification.
