## Achille De Pasquale

Achille De Pasquale is a tech entrepreneur with a history of founding and leading companies across virtual reality, gaming, and deep-tech sectors. His work focuses on turning original technical ideas into scalable, real-world products.

As CEO and CTO of Hidonix Industries, Achille defines both the strategic direction and the technical foundation of the company. He is directly responsible for the concepts behind Hidonix's core inventions, guiding product architecture, research, and development from initial idea through execution. His dual role allows him to closely align innovation, engineering, and business strategy across the organization.

Achille is known for a hands-on approach to technology leadership and for building products grounded in strong technical fundamentals.

+++

*"ION's mapping rover, HIDO II, is a system designed to understand every inch of space. This rover is the physical interface of a new way to map, perceive, and navigate complex environments where GPS and traditional infrastructure fail.*

*This rover represents years of research into spatial intelligence. Our mission is not about mobility alone, but about capturing, understanding, and transforming physical environments into data."*

Achille De Pasquale, CTO & Founder at Hidonix Industries
