Designed by Konstantin Grcic, the Kari collection features a pair of versatile side tables that can be combined in countless ways. While both tables share a circular top, their bases explore two distinct geometries: cylinders and pyramids.

Currently available in teak wood, their clever construction allows for a wide variety of materials to be used. The geometric shapes lend the pieces an elegant, African inspired and natural character.

Maintenance Teak

Apply Kettal Sealer (KS5707500) to the wood every three months, or more often for hospitality use. To restore teak's original look, sand the surface and reapply sealer.

Discover more about the Teak cleaning process right here.
