OUR MESSAGES

When the Digicel Foundation was established nineteen years ago, I could never have imagined where this journey would lead. Through my many visits to Haiti over the years, I have witnessed firsthand the commitment of our team and the impact of their work on communities across the country. Today, I have never been more proud of everything the Foundation has accomplished.

This year, I am especially delighted to celebrate the groundbreaking of our 200th school. Few organizations can point to this level of sustained investment in Haiti's education sector. More importantly, this milestone represents nearly two decades of expanding opportunities for children, supporting educators, and working alongside communities to create lasting change.

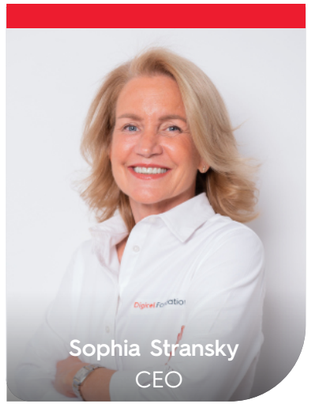

My sincere thanks go to Digicel for its longstanding support over the past nineteen years, as well as to our Board members, partners, donors, and the entire Foundation team. This historic milestone belongs to all of you.

As I recently assumed my role as Chair of the Digicel Foundation, I have gained a greater appreciation for the scope of the Foundation's work across Haiti.

One of the most meaningful experiences of my first months in this role was joining the Foundation team in Cap-Haïtien for the inauguration of Collège Jean XXIII – Annex. Meeting the students, educators, and members of the community made the Foundation's impact tangible in a way that no report or Board meeting ever could. It also reinforced my respect for the professionalism, commitment, and care that characterize the Foundation, despite the many challenges the country continues to face.

The achievements presented in this report reflect what can be accomplished when vision, commitment, and collaboration come together in pursuit of a shared purpose, and I am honored to be part of this collective effort

Every story, every milestone, and every achievement continue to move me deeply. One might expect that, after many years working alongside communities across Haiti, these moments would become routine. For me, they never have.

One of the greatest privileges of this work is witnessing the people behind every project. I continue to be inspired by the excitement and pride of an entire community as we inaugurate a new school, by the determination of community organization leaders as they champion projects they believe will improve the lives of those around them, and by the generosity of volunteers who offer their time to help others. Seeing that commitment firsthand reminds me that our role is not simply to fund projects, but to help people turn their ideas and dedication into lasting change.

The past year offered many examples of that commitment. Among the highlights, we completed three school construction projects. Twenty-nine schools graduated from our capacity-building program to strengthen leadership, improve education quality, and promote the long-term sustainability of their schools. Through the ninth edition of Konbit Pou Chanjman, 18 community organizations received grants to bring locally driven solutions to life, while Digicel employees once again generously offered their support

As we approach the Digicel Foundation's 20th anniversary, I feel grateful for everyone who has contributed to our success and excited about all that we will continue to accomplish together. I have no doubt that the work ahead will bring new challenges, new opportunities, and many more moments that will remind me why this work never becomes ordinary.

OUR EDUCATION IMPACT

OUR EDUCATION IMPACT

At the Digicel Foundation, we believe every child deserves the opportunity to reach their full potential. While every school project responds to the unique needs of the community it serves, they all share the same purpose: creating safe, inclusive, and appropriate learning environments. During this fiscal year, the Foundation advanced five school projects across Haiti.

Sant Edikasyon ak Reyabilitasyon Kay Christine (Obléon, Kenscoff)

For many years, Nos Petits Frères et Sœurs (NPFS) has provided education, rehabilitation, and therapeutic services to people with disabilities and special needs. However, the organization had never had a purpose-built center on its Obléon campus. Recognizing the importance of creating an environment tailored to its beneficiaries, the Digicel Foundation partnered with NPFS to build Sant Edikasyon ak Reyabilitasyon Kay Christine.

Construction of the center was completed in August, 2025. It includes four adapted classrooms, a therapy room, an auditorium, accessible sanitation facilities, and barrier-free circulation throughout the building. The project represented an investment of US$830,153.

Unfortunately, the center could not be inaugurated as planned because the security situation in the area had deteriorated. As a result, it has not yet been able to welcome those it was created to serve. The Foundation remains hopeful that improving security conditions will allow the center to open its doors in the coming year.

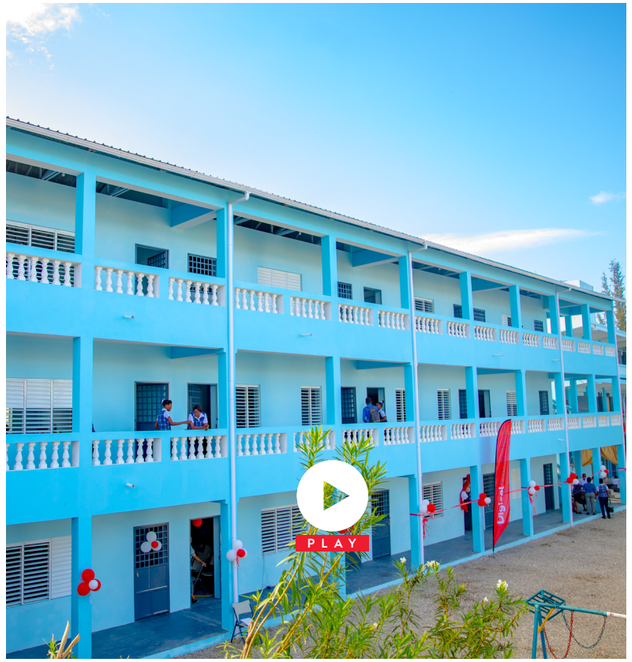

Collège Jean XXIII – Annexe

For more than 60 years, Collège Jean XXIII has provided quality education to generations of students in Cap-Haïtien. Under the leadership of His Excellency Archbishop Launay Saturné, the Archdiocese of Cap-Haïtien recognized the need to expand educational opportunities in the underserved community of Calvaire Sainte Thérèse. To support this vision, the Digicel Foundation financed the construction of an annex comprising 11 classrooms, administrative offices, a kitchen, and sanitation facilities. The project represented an investment of US$594,309.

Completed in FY25 and officially inaugurated on October 8, 2025, the annex was dedicated to the memory of the late Haitian artist Michael Benjamin, better known as Mikaben. A former Digicel Ambassador, he generously helped the Digicel Foundation by sharing his time and talent in support of initiatives that benefited communities across Haiti. May the values he embodied - generosity, discipline, love, peace, and patriotism - continue to inspire the students who pass through its doors.

Institution Notre-Dame du Perpétuel Secours

For generations, Institution Notre-Dame du Perpétuel Secours has been part of the educational landscape of Port-de-Paix. Managed by the Daughters of Wisdom, the campus includes both a private girls' school and a public girls' school. For many years, however, the public school operated in a building that had fallen into a severe state of disrepair, creating a stark contrast with the neighboring private school.

Recognizing the importance of providing every student with a safe and welcoming learning environment, the Digicel Foundation partnered with the Daughters of Wisdom to rebuild the public school. The new three-story building comprises 12 classrooms, a sanitation block and a perimeter fence. The project represented an investment of US$599,849.

Officially inaugurated on December 3, 2025, the new building provides students with a learning environment that reflects the Daughters of Wisdom's commitment to girls' education.

OUR EDUCATION IMPACT

École Communautaire Bon Berger

Located in the remote rural community of Pépin in Haiti's Centre Department, École Communautaire Bon Berger served approximately 200 students in an overcrowded structure that had never been designed to function as a school. To help address this need, the Digicel Foundation partnered with Summits Education, an organization dedicated to improving access to quality education in the region, to build a new school campus with two early childhood classrooms, nine primary classrooms, two administrative offices, a sanitation block, a kitchen, a water reservoir, a basketball court, and a perimeter fence.

Completed in December 2025, the project represented an investment of US$684,826. The school community held a symbolic ceremony to mark the opening and welcomed students into their new learning environment. The official inauguration was postponed because security challenges prevented a larger delegation from traveling to the site.

Institution Chrétienne Enfants de la Promesse

Institution Chrétienne Enfants de la Promesse, located in Milot, was selected as the Digicel Foundation's 199th school because of its commitment to inclusive education. Managed by Children of the Promise (Enfants de la Promesse), the institution welcomes children from the broader community, including students with disabilities and special needs, while also providing support and services to their families.

To support this work, the Digicel Foundation, in partnership with Children of the Promise, is constructing new facilities that will bring together classrooms previously dispersed across the campus, creating a more cohesive learning environment for students and teachers. The project includes nine classrooms, administrative offices, a sanitation block, and a water reservoir.

Construction began in August 2025, with completion expected in time for the 2026–2027 school year. The project represents an investment of US$372,193.

Building the 200th School: A Historic Milestone

This year marks a defining moment for the Digicel Foundation with the selection of its 200th school construction project in Haiti. Nearly two decades after inaugurating its first school in Thomazeau, this milestone reflects the Foundation's sustained commitment to expanding access to quality education across the country.

To identify the beneficiary institution for this landmark project, the Foundation launched a nationwide call for applications. A total of 124 schools from across Haiti participated in the selection process. Following an initial review, 23 institutions were shortlisted for technical site visits, and five projects were presented to the Project Approval Committee. At the conclusion of this rigorous evaluation, the Board selected École Nationale Fondation Vincent, managed by the Salesians of Don Bosco.

The institution was selected not only because it met the Foundation's established criteria, but also because of its longstanding contribution to education in Haiti's Nord Department. Since 1955, the school has served generations of students and today provides both academic and vocational education to approximately 2,500 persons.

The Board's decision was guided by several strategic considerations, including management capacity, anticipated impact, long-term sustainability, technical feasibility, and security conditions. It also reflected the Foundation's confidence in the institution's ability to continue serving thousands of students while responding to the growing educational needs of northern Haiti.

A groundbreaking ceremony was held on the eve of the Foundation's nineteenth anniversary, bringing together representatives of the Ministry of National Education and Vocational Training, members of the Salesian congregation, the press, and residents of Cap-Haïtien.

The new campus will include 15 classrooms, two administrative offices, a technology room, two sanitary blocks, a 10,000-gallon water reservoir, a basketball court, the rehabilitation of an existing soccer field, paved outdoor areas, and a secure perimeter fence. Construction is expected to be completed in February 2027.

With a total investment of US$1,198,460, the project represents the Digicel Foundation's largest investment in a single school to date. Once completed, the new campus will provide a modern learning environment for current and future generations, strengthening educational opportunities in northern Haiti for years to come.

OUR EDUCATION IMPACT

"Supervising the construction of a school in Haiti has become increasingly challenging. Some days, it feels like navigating between the impossible and the imperative. A blocked road, unavailable materials, or any number of unexpected obstacles can change everything. I've learned to adapt quickly without ever losing sight of the goal: providing children with a proper school, no matter what it takes.

The greatest reward comes with time. More than a decade after many of our schools were built, they continue to withstand natural disasters while serving new generations of students. Knowing that my work has contributed, in some small way, to Haiti's future is what motivates me every day.

None of this would be possible without the Foundation's team. Building a school is never just the responsibility of the construction program team. It is the result of collaboration across every program and every department. That shared commitment is what allows us to continue delivering results, even under the most difficult circumstances.

Fritz-Gerald Joseph

School Construction Program Manager

OUR EDUCATION IMPACT

Building Stronger School Communities

Creating better learning environments is only one part of achieving lasting impact. Ensuring these schools continue to thrive requires strong leadership, effective management, engaged families, and communities committed to education.

Through PARCCSEQ (Project for Strengthening the Capacity of School Communities for Quality Education), the Digicel Foundation works alongside school communities for a period of at least 18 months to strengthen governance, administration, long-term sustainability, and the overall school environment. Each participating school is supported by a dedicated trainer who provides ongoing coaching, workshops, and on-site guidance to help school leaders design and implement their school development plans.

Once schools have successfully achieved key program milestones, they become eligible to develop an income-generating project. Following a review process, selected initiatives receive Foundation funding, helping schools strengthen their financial sustainability while putting into practice the leadership, planning, and management skills learned throughout the program.

Today, the program's impact can be seen across Haiti:

- 95 schools participated in the program.
- 60 schools graduated, including 29 this year.
- 78 income-generating projects were funded, representing approximately HTG 60 million invested.
- More than 25,000 direct beneficiaries

Behind these figures are school communities that are better equipped to lead, sustain, and continuously improve their schools for future generations of students.

School Communities in Action

Lekòl Panou – Belle-Anse

At Lekòl Panou, families no longer shoulder the same financial burden they once did. Through PARCCSEQ, the school developed an income-generating project that sells food staples and beverages, generating revenue to help support school operations and significantly reducing its reliance on parental contributions. The income generated has also enabled the school to establish a vegetable garden that supplies its school canteen. In addition, a school cooperative was created, allowing parents to save money and access loans during times of need.

Centre Éducatif de la Fondation Athlétique d'Haïti (CEFLADH) – Saint-Louis-du-Sud

At the Centre Éducatif de la Fondation Athlétique d'Haïti (CEFLADH), enrollment has grown from 72 students in 2022 to more than 250 today. Supported through PARCCSEQ, the school has strengthened its financial sustainability through an income-generating project that sells basic food staples. The initiative has also fostered greater parental involvement, creating a stronger foundation for the school's continued growth.

Institution de Formation Éducative de Bois Tombé – Bois Tombé

At the Institution de Formation Éducative de Bois Tombé, access to safe drinking water had long been a challenge for both the school and the surrounding community. Through PARCCSEQ, the School Board developed an income-generating project centered on a rainwater treatment and purification using reverse osmosis. In addition to strengthening the school's financial sustainability, the system now provides safe drinking water to more than 2,000 people across several nearby communities, including Nan Plezi, and Terre Froide.

OUR EDUCATION IMPACT

"PARCCSEQ is ultimately about people. We support schools, but more importantly, we work alongside the communities they serve. Our role is to listen, build trust, and help people recognize that the success of a school is a shared responsibility.

We encourage principals to embrace shared leadership by working with School Boards, inspire parents to become active participants in school life, and help schools build more sustainable futures through income-generating activities.

Lasting change begins when a school is no longer seen as the responsibility of one person, but of an entire community. Watching schools gradually embrace this approach is one of the most rewarding parts of my work.

Arnolet Prévilus

Professional Development Program Manager

A successful first edition of the Digicel Foundation interscholastic Competition

The idea of organizing an inter-school academic competition had long been part of the Digicel Foundation's vision. How should it be structured? Who should take part? These and many other questions required careful consideration, as the Digicel Foundation is known for implementing initiatives that deliver tangible and lasting impact.

Organizing an academic competition also means encouraging teachers to engage more actively in the implementation of the Ministry of National Education's curriculum. It is equally about motivating students to strive for excellence, remain committed to their learning, and develop a strong culture of academic achievement. Beyond competition, it creates a powerful sense of solidarity, pride, and belonging within school communities.

On March 3, 2026, the Sud Department hosted the first edition of the competition, bringing together ten schools, including four built by the Digicel Foundation. Schools from areas such as Torbeck, Cavaillon, Béraud, and Les Cayes saw their representatives compete for the top position. The various rounds covered key subjects from the national curriculum, including mathematics, Haitian Creole, experimental sciences, and social studies.

At the end of the competition, two schools qualified for the grand final held on March 20, 2026: École Nationale Congréganiste Saint-François d'Assise of Béraud and External Saint-Joseph of Les Cayes. The latter was crowned champion of this first edition, delivering an outstanding performance.

All participants from the winning school will receive a full scholarship for the following academic year, funded by the Digicel Foundation, while participants from the finalist school will benefit from a 50 percent reduction in school fees. Teachers who supported both schools through to the final were also awarded laptops, tools designed to strengthen their professional practice, facilitate lesson preparation, and support their daily teaching responsibilities.

Following the success of this first edition, the Foundation hopes it will serve as a model for other schools across the Sud Department to replicate the initiative. The next edition is expected to take place in another region of the country.

OUR EDUCATION IMPACT

Celebrating Haiti's Educators

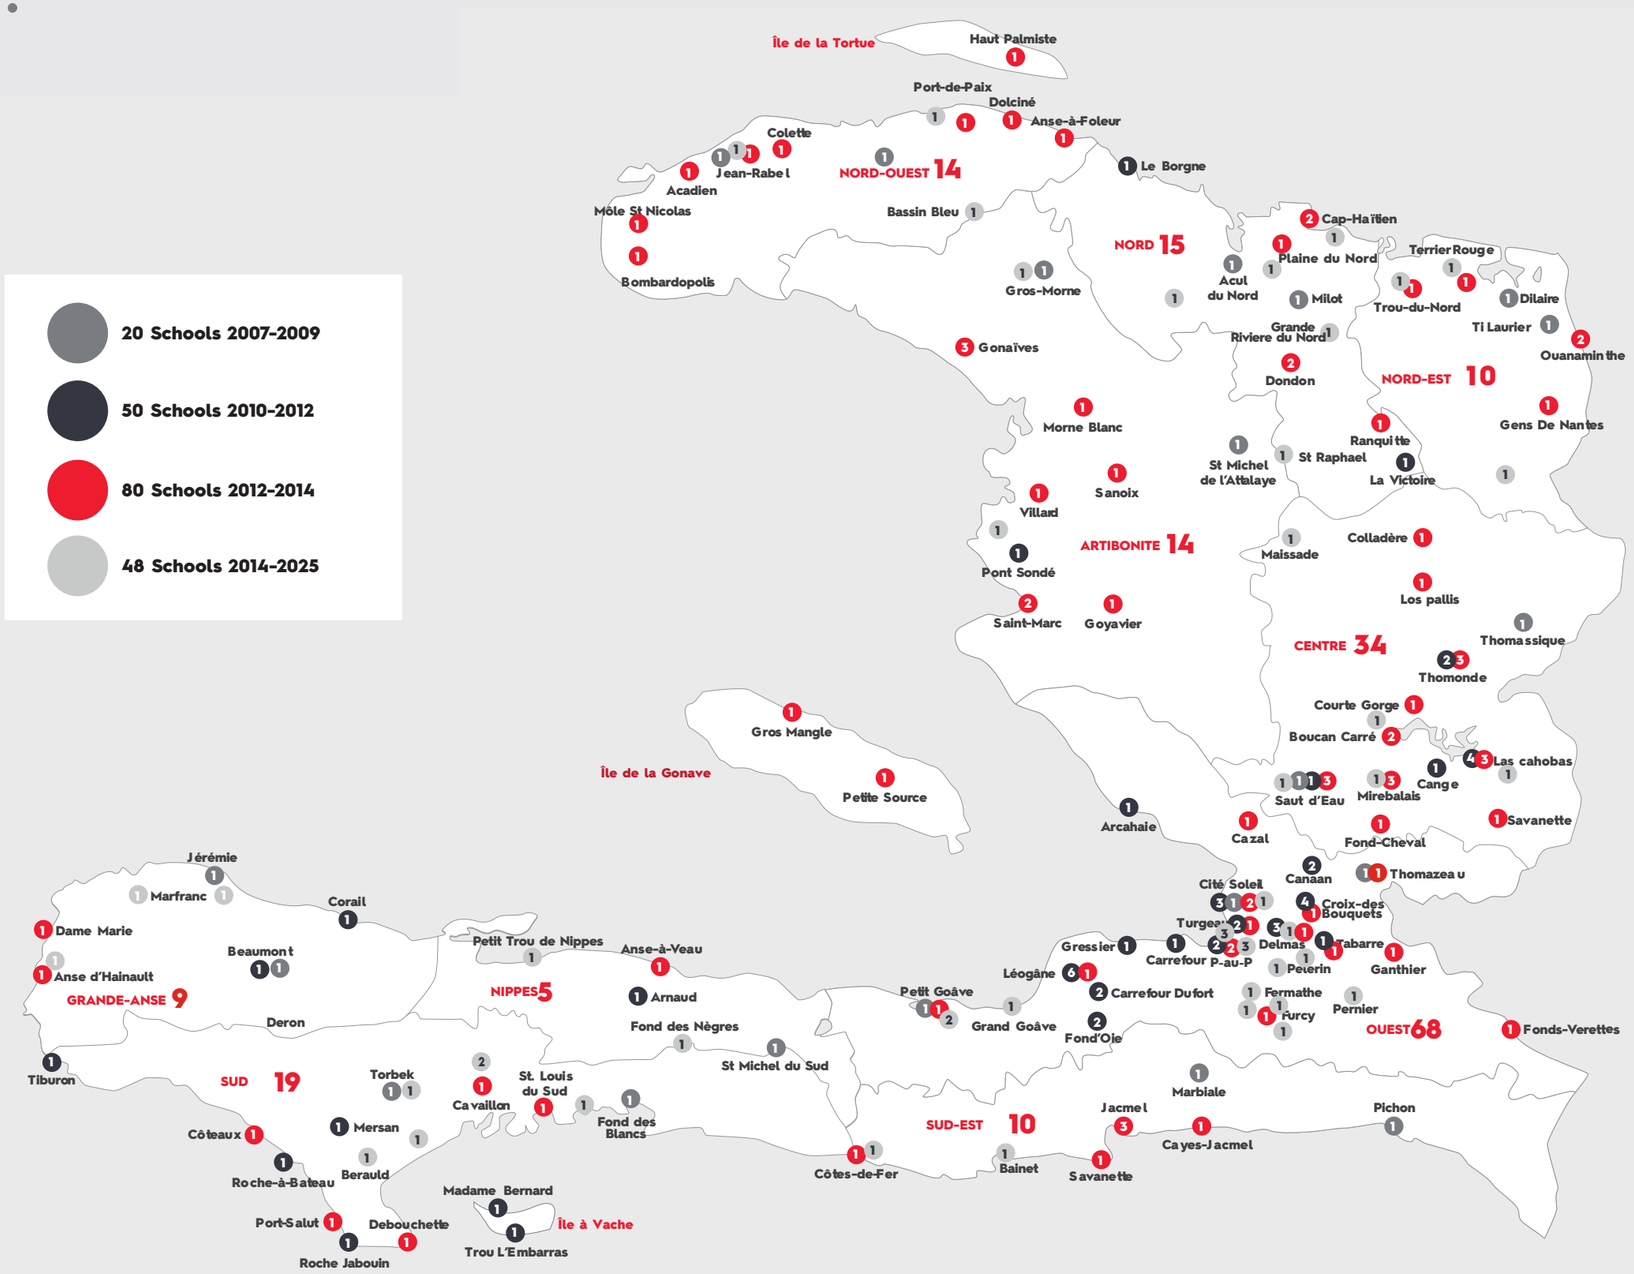

Through its support of PwoNA (Pwofesè Nasyonal Ane A, or National Teacher of the Year), the Digicel Foundation recognizes the vital role teachers play in improving the quality of education in Haiti.

Now in its fifth year, PwoNA has established itself as Haiti's leading initiative recognizing excellence in teaching. Led by P4H Global, the program is supported by the Digicel Foundation, education authorities, and numerous civil society organizations. Each edition receives thousands of nominations from across the country. From these nominations, one outstanding teacher is selected from each of Haiti's ten departments, with one ultimately named Pwofesè Nasyonal Ane A (National Teacher of the Year). This year's edition awarded US$12,000 in prizes.

The 2026 title of Pwofesè Nasyonal Ane A (National Teacher of the Year) was awarded to Joceline Pierresaint, who also received the Public Prize through the Digicel Foundation's nationwide Facebook vote.

OUR COMMUNITY *IMPACT*

OUR COMMUNITY IMPACT

Five hundred and forty-seven applications. This figure tells the story of Konbit Pou Chanjman this year. Not simply an abstract statistic, but tangible proof of organizations across Haiti declaring, "We have an idea, we need support, and we are ready to act."

Through Konbit Pou Chanjman, every idea has value. Yet, as with any competitive grant program, a rigorous evaluation process identifies the projects that best meet the funding criteria. Following this process, 18 organizations were selected to receive grants of US$12,000 each to bring their projects to life.

A closing ceremony was held on December 9 in Cap-Haïtien, bringing together the winning organizations in an atmosphere that blended community spirit with year-end celebration. Beyond recognizing the recipients, the event also featured training sessions on leadership, project presentation techniques, and other topics designed to strengthen the capacity of these community leaders.

Who are these 18 winners? Fishermen from Kakas in Grande-Anse seeking more reliable equipment Farmers from Nippes working to improve their yields. Organizations strengthening fishing, agriculture, and livestock livelihoods. Different projects, different communities, but all driven by the same conviction: change begins here, now, and with us.

The Foundation also continued to recognize the success of previous Konbit Pou Chanjman recipients through a third special edition reserved for past winners. The initiative offered an opportunity to apply for additional funding to either launch a new project or expand an existing one. Forty-one organizations applied, and on January 30, 2026, RJEPS (Rassemblement des Jeunes Penseurs de Savane Grande) was announced as the winner, receiving US$18,000 to implement an oxen-drawn cart project to facilitate land plowing.

While a new group of organizations was beginning its journey, projects from the previous edition were already delivering results. Of the 18 organizations funded under the eighth edition, 17 successfully completed their projects and are already improving the lives of the communities they serve. One project, POSSADEC, remained on hold because of insecurity in the Saut-d'Eau area, a reminder that despite the commitment of local organizations, certain realities on the ground remain difficult to overcome.

Selling seafood in Anse-Rouge used to be a highly risky business. At local markets, any unsold fish would spoil quickly, often forcing us to sell it at extremely low prices just to minimize our losses. Thanks to the implementation of this project and the availability of freezers, we can now preserve our products under proper conditions. This has significantly reduced post-harvest losses and enabled us to sell our seafood at fair market prices.

Olnique Vincy
Project Beneficiary

For generations, the sea has helped sustain the people of Anse-Rouge. Yet despite living along one of Haiti's longest coastlines, many local fishermen remained limited to shallow waters, working with aging equipment and little more than paddles. Without refrigeration or proper storage, up to 40 percent of their catch spoiled before reaching the market, reducing already modest incomes.

Through the eighth edition of Konbit Pou Chanjman, RANEPH received a US$10,000 grant from the Digicel Foundation to establish a community fisheries center equipped with cold storage facilities, a 15-horsepower Yamaha outboard motor, and other essential tools. These investments now allow fishermen to reach more productive fishing grounds while preserving their catch more effectively.

Today, the initiative directly benefits 250 people, including 100 fishermen and 150 women fish vendors, while approximately 300 families benefit indirectly through increased economic activity.

The results have been remarkable. Fishermen are catching larger quantities of fish, post-harvest losses have been significantly reduced, and families are earning higher incomes. The center is managed by a locally elected committee, with affordable user fees for equipment rental and cold storage covering operating costs and helping ensure the initiative's long-term sustainability.

In just five months, the enterprise generated HTG 400,000 in profit, all of which has been placed in reserve to support future investments, equipment maintenance, and the continued growth of the initiative.

What began as a response to the challenges facing local fishermen has evolved into a community-managed enterprise that is creating jobs, strengthening livelihoods, and demonstrating how strategic investments can transform local assets into lasting economic opportunity

OUR COMMUNITY IMPACT

Building on the spirit of Konbit Pou Chanjman, the Digicel Foundation launched a special holiday edition that combined the values of solidarity and sharing with community action. Through the Nwèl Konbit contest, the Foundation invited the public to submit projects that would make a meaningful difference in their communities during the Christmas season.

On TikTok, Facebook, and Instagram, participants submitted initiatives inspired by the spirit of giving that defines the holidays. Following public voting from November 21 to December 4, three projects were selected for implementation.

Magdaline Chérestal won the Instagram contest with a project that combined a mobile clinic with the distribution of care kits to elderly citizens. The Astuce Facile team won on TikTok with a project that provided essential kits to families displaced by insecurity who were living in a camp in Delmas 33, along with gifts for their children. On Facebook, Morley Fanta won with a project to clean and rehabilitate groundwater springs in the municipality of Môle-Saint-Nicolas.

Together, these three projects captured the spirit of Nwèl Konbit, transforming the generosity of the holiday season into tangible actions that strengthened solidarity within their communities.

Community impact takes many forms. While local organizations lead projects through the Foundation's grant programs, Digicel employees also contribute their own time and skills to strengthen the communities they serve.

OUR COMMUNITY IMPACT

From Grande-Anse to Nord, and from Nord-Ouest to Sud-Est, employees came together to rehabilitate public squares, install solar lighting, renovate community infrastructure, distribute school supplies and gifts, and support a mobile clinic.

Highlights included:

- Public square rehabilitation and solar lamp installation in Corail, Grande-Anse
- Public square rehabilitation and solar lamp installation in Arnaud, Nippes
- Solar lamp installation in Acul-du-Nord, Nord
- Solar lamp installation in Mombin-Crochu, Nord-Est
- Lakòu rehabilitation and solar lamp installation in Gonaïves, Artibonite
- School supply distribution to elementary students in Port-au-Prince, Ouest
- Public square rehabilitation and solar lamp installation in Cerca Carvajal, Centre
- Mobile clinic in Arniquet, Sud
- Renovation of the municipal library in Jacmel, Sud-Est
- Public square rehabilitation and solar lamp installation in Port-de-Paix, Nord-Ouest
- Gift distribution to children in Port-de-Paix, Nord-Ouest

Whether through community organizations leading local initiatives or employees volunteering their time, these efforts demonstrate that lasting impact is built through partnership, shared responsibility, and a common commitment to improving lives across Haiti.

The Digicel Foundation's Staff Engagement program provides employees with meaningful opportunities to give back to the communities where they live and work. Throughout the year, employees volunteered their time and energy to improve public spaces, strengthen community services, and support residents throughout Haiti.

OUR COMMUNITY IMPACT

"In Haiti, konbit means working together toward a common goal. Every organization that applies to the Foundation comes to us with a vision and the determination to improve its community. Our role is to help turn that vision into reality.

Providing funding is only the beginning. The real work comes afterward—supporting organizations as they overcome challenges, strengthen their management skills, and learn to implement projects responsibly and sustainably. That is where I believe my team makes the greatest difference. We don't simply provide grants; we build relationships, offer guidance, and help organizations grow stronger throughout the process.

The same spirit of service also guides our Staff Engagement Program. Every time a Digicel employee volunteers, they choose to invest their time in someone else's community. Seeing employees return from those experiences inspired by the difference they have made is a reminder that meaningful change happens when people come together in service of others.

Lafayette Cheridant

Grants and Staff Engagement Program Manager

AI for Social Impact

Recognizing the growing role artificial intelligence can play in addressing social challenges, the Digicel Foundation partnered with Banj, Haiti's leading organization dedicated to fostering innovation, to launch AI for Social Impact through its flagship initiative, DevExpo.

Now in its fifth edition, DevExpo has become an important platform for bringing together developers, entrepreneurs, students, and technology enthusiasts to transform ideas into solutions with real-world impact. Through DevExpo's structured program, participants receive support to refine promising concepts and prepare them for future development.

Launched on February 25 in the presence of members of the press, the AI for Social Impact initiative invited teams to develop AI-powered solutions designed to address social challenges in Haiti. A total of 234 teams participated in the competition, reflecting strong interest in applying AI to Haiti's development priorities.

The Digicel Foundation committed HTG 5 million to fund five innovative projects emerging from the competition. The winning teams were scheduled to be announced in June 2026, following the close of the reporting period.

OTHER ACTIVITIES

OTHER ACTIVITIES

Beyond the Foundation's core pillars, this year also featured a range of initiatives designed to engage a broader audience. These efforts are rooted in a simple conviction: lasting social change can be inspired through many forms of engagement, particularly by empowering young people and harnessing their reach through social media.

After several successful editions, the Influencer Contest and the Content Creation Contest have become key components of this approach, providing young Haitians with opportunities to transform their creativity and influence into meaningful community impact.

The Influencer Contest

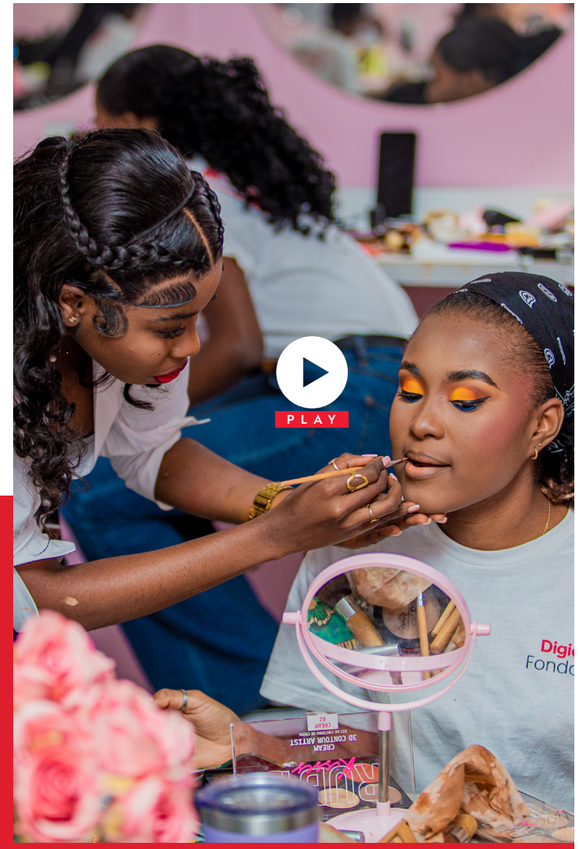

The Influencer Contest encourages young influencers to use their platforms to address needs within their communities by proposing projects with a positive social impact. The winning proposal receives funding from the Digicel Foundation for implementation.

During the third edition, Biloy organized makeup workshops, while Mr. Flower organized floral arrangement training. Together, their projects equipped participants with practical, income-generating skills.

When the fourth edition was launched on January 20, 2026, both winners played an active role in promoting the competition, encouraging other aspiring influencers to participate.

On February 25, Ariana Lafond was announced as the winner of the fourth edition for her proposal to clean and rehabilitate Place Boyer, the public square in Pétion-Ville where she grew up. The Digicel Foundation committed US$5,000 to support implementation of the project.

Since winning the competition, Ariana has become a widely recognized figure in Haiti, inspiring many young people through her authenticity and commitment to community service. Her selection reflects the values the Digicel Foundation seeks to promote through the Influencer Contest by encouraging influencers to use their platforms to create positive change within their communities.

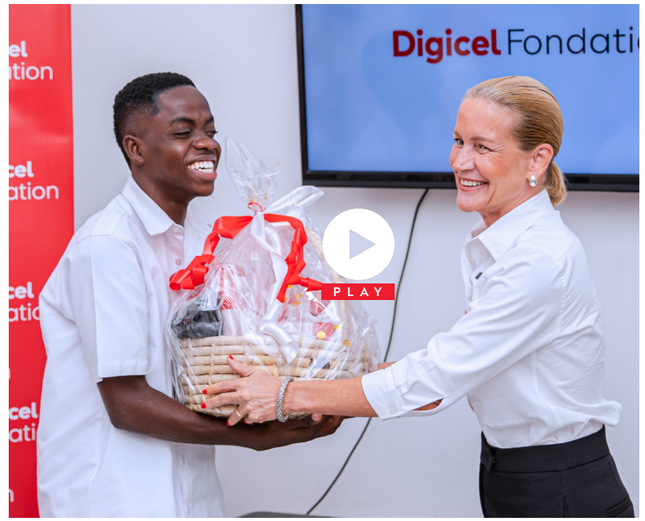

The Content Creation Contest

Launched on July 2, 2025, this year's Content Creation Contest introduced a new theme, inviting young creators from across Haiti to capture the country's beauty, culture, and the places and traditions that make them proud.

The resulting videos were far more than entertainment. They offered a different perspective on Haiti, showcasing a country defined not only by its challenges, but also by its rich cultural heritage, breathtaking landscapes, and vibrant communities.

The awards ceremony, held on August 9, recognized Vixamar Sergio, winner in the Instagram category, and Jean Paul Djakaef, winner in the TikTok category. Both received essential equipment, including computers, microphones, and tripods, to help them further develop their skills.

As part of their prize, the winners also participated in mentoring sessions led by Mélissa Jeanty, a respected content creator and founder of Kayasah, a creative space dedicated to supporting emerging digital talent.

OTHER ACTIVITIES

Celebrating Community

While the Foundation's flagship programs remain at the heart of its work, smaller community initiatives also play an important role in strengthening relationships and creating meaningful shared experiences.

In celebration of Mother's Day, the Foundation organized a cake-making workshop led by Chef Ika, winner of the first Influencer Contest, bringing mothers and children together through a shared creative activity. Children had the opportunity to express their love and appreciation for their mothers through a handmade gift, while the mothers also received tokens of appreciation from the Foundation, making the day especially meaningful.

For Father's Day, the Foundation organized a contest titled Kiyès ki pi chèlbè ("Who's the Most Stylish Dad?"), inviting children to share photos of themselves with their fathers. Together, these initiatives celebrated family, honored exemplary parents, and recognized the commitment they demonstrate every day.

By deliberately diversifying its interventions, the Foundation is able to engage young people where they already connect and express themselves - on TikTok, on Instagram, at community events, and during moments of celebration.

These initiatives reflect the Foundation's belief that positive change begins with participation. By meeting young people where they are, the Foundation encourages them to use their creativity, their voices, and their influence to make a meaningful difference in their communities.

Independent Auditors' Report

The Board of Directors
Digicel Haiti Foundation:

Opinion

We have audited the financial statements of Digicel Haiti Foundation (the Foundation), which comprise the balance sheet as at March 31, 2026, and the statements of income and expenses, changes in fund balance and cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Foundation as at March 31, 2026, and its financial performance and its cash flows for the year then ended, in accordance with International Financial Reporting Standards (IFRS).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISA). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Foundation in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Haiti, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and those charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

7, rue Lechaud, Bourdon, Port-au-Prince, Haïti • P.O. Box 13270, Delmas, Port-au-Prince, Haïti

In preparing the financial statements, Management is responsible for assessing the Foundation's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Management either intends to liquidate the Foundation or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Foundation's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Foundation's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.

- Conclude on the appropriateness of Management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Foundation's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Foundation to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

DIGICEL HAITI FOUNDATION
Notes to Financial Statements

1) ORGANIZATION

"Fondation Digicel Haiti" (Digicel Haiti Foundation): The Foundation is a private non-profit organization. The official authorization and by-laws of the Foundation were registered at the mayor's office in Pétionville on February 27, 2007 and published in Le Moniteur on April 3, 2008. The objectives of the Foundation are to promote community programs in Haiti that embrace and reflect the educational, social and cultural aspirations of the community. The majority of projects funded address community needs, encourage volunteerism and civic engagement, promote leadership with integrity, promote opportunities for marginalized groups, and include tangible products such as school buildings.

Although the Foundation has a vast range of objectives, it has a special focus on two areas: education and sustainability. The focus on education arises from a fundamental need across the country to increase access to quality education. The education area includes construction / repairs of schools and training **(note 11)**. Sustainability of each project funded is the utmost importance to the Foundation prior to taking on new projects as they seek to assist communities towards self-sufficency as opposed to dependence on continued assistance.

Furthermore, to achieve these objectives, the Foundation, through direct cash and non-cash contributions **(note 11)**, works alongside and through structured community organizations to ensure the smooth implementation of projects. The Foundation works with Governmental and non-Governmental Organizations throughout Haiti. The funds disbursed by the Foundation are grants that the receiving organizations will not be required to repay; however, the beneficiaries are required to keep and present accurate records on how all funds are utilized.

The operations of the Foundation are funded primarily by contributions from Unigestion Holding S.A. (Digicel Haiti), a related party.

The registered office of the Foundation is located at Unigestion Holding S.A. (Digicel Haiti) in Turgeau, Haiti.

(Continued)

2) BASIS FOR FINANCIAL STATEMENTS PREPARATION

(a) Accounting framework

The financial statements are prepared in conformity with International Financial Reporting Standards (IFRS).

These financial statements were approved by the CEO on August 15, 2026.

(b) Basis of measurement

These financial statements are presented on a historical cost basis, using the accrual basis of accounting.

The fair value of the financial assets and liabilities is practically equal to their cost.

(c) Currency presentation

The functional currency of the Foundation is the Haitian Gourde but at the request of Management, the financial statements are presented in US Dollars.

(d) Use of estimates and judgment

In preparing these financial statements, Management must make estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, and the presentation of contingent assets and liabilities, and the income and expenses of the year. Estimates and underlying assumptions are reviewed continuously. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in future periods affected. Although these estimates are based on Management's best knowledge of current events and actions, actual results may differ from those estimates.

The most significant financial statements accounts affected by estimates and assumptions are:

Note 6	Accounts receivable – impairment provision
Note 7	Advances to contractors for projects - valuation
Note 8	Fixed assets – depreciation
Balance Sheet	Construction materials – valuation and obsolescence.

(Continued)

2) BASIS FOR FINANCIAL STATEMENTS PREPARATION (CONTINUED)

(d) Use of estimates and judgment (continued)

Since 2023, the Haitian economy is subject to the shocks of a hostile external environment impeding the free movement of goods and services, thus affecting the normal functioning of private enterprises and State services causing an undue increase of prices of goods and services.

Since 2023, according to norm IAS 29 ''Financial Reporting in Hyperinflationary Economies'', this situation resulted in Haiti being classified as a hyperinflationary economy by major international audit firms, since, as a trigger, the cumulative inflation rate over three years exceeded the 100% mark for the first time, being 105%.

IAS 29 classification by the major international audit firms still applies as of March 31, 2026 but it has not yet been adopted by the monetary authorities in Haiti or by most of the local entities since the increase in the inflation index, that triggered this classification, is a consequence of a temporary situation. Indeed, the following factors are taken into consideration:

- A transitional government has been installed, supported by a multinational force, to improve the overall security in the country and to lead to democratic elections in 2026;
- A decrease in the inflation yearly rate from 31.8% in 2023 to 27.8% in 2024 and 31.9% for fiscal year 2025;
- An appreciation of the exchange rate of the local currency, the Gourde, versus the US Dollar with an average rate of 141 gourdes for one-dollar US during 2023 compared to 132 gourdes for 2024 and 131 gourdes for 2025.

In the event that the situation deteriorates, the Foundation will review its financial statements in light of the requirements of IAS 29 that also advocates concurrent application by all entities operating in an economy where this standard applies.

According to Management, the financial statements were prepared on an adequate basis using fair judgment in all material respects and in accordance with the accounting policies summarized below.

(Continued)

3) SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

a) Conversion of foreign currencies

Transactions denominated in currencies other than the functional currency (Gourde) are recorded in the functional currency at the actual exchange rates existing at the dates of the transactions.

Monetary assets and liabilities denominated in currencies other than the functional currency are reported at the exchange rates prevailing at year-end. Any unrealized gain or loss arising from a change in exchange rates subsequent to the date of the transaction is included as foreign exchange gain or loss in the statement of income and expenses.

The presentation currency is the US dollar. In accordance with IAS 21, the results and financial position of the Foundation expressed in the functional currency are translated into the presentation currency as follows:

- Assets and liabilities for each balance sheet presented, are translated at year-end exchange rate of each balance sheet;
- Net assets other than income (deficit) for the year are translated at year-end exchange rates;
- Income and expenses for each income statement are translated at average exchange rates.

All resulting exchange differences are recognized as a "translation adjustment", a separate component of net assets.

(b) Cash and cash equivalents

Cash and cash equivalents are cash on hand and current bank accounts which are readily convertible into cash without notice. These are reflected at cost.

(Continued)

3) SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(c) Accounts receivable

As of March 31, 2025, these accounts include amounts receivable from contractors to whom the Foundation sells steel profiles **(note 3d)**, as well as an amount receivable from a religious congregation. As of March 31, 2026, only the balance of the amount receivable from a religious congregation remains.

Considering the short duration of of these receivables and their history, no provision for expected credit losses, as prescribed by IFRS 9, is required for these accounts receivable.

(d) Construction materials

Contruction materials are recorded at cost (first in – first out) and represent a reserve of metal profiles, a frequently used material, difficult to find in Haiti. They are sold to contractors as needed **(note 6)**.

(e) Contributions

Contributions to the Foundation represent cash and non-cash donations. Income from these donations is recognized when the conditions related to the transfer from the contributor to the Foundation are met, otherwise it is presented as deferred income **(note 10)**.

Cash contributions from Unigestion Holding S.A. (Digicel Haiti), a related party, represent contributions received or receivable in cash from that company in Haiti.

Other cash contributions are provided by several international donors.

Contributions received for charges to be recorded in future years are deferred until the year where the related charges are incurred.

Non-cash contributions are recorded as income when received, at their estimated fair market value by the Foundation.

(Continued)

3) SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(f) Funding of projects and advances to contractors

A contractual framework surrounds each construction / renovation of school project. Per the terms of the contract, specific phases of work are identified and give rise to payments to the contractors.

Payments made are recorded as advances to contractors on projects. During the year, as projects progress, the related liability is set up with a corresponding charge to the funding of projects expenses; and, later on, when projects are closed, the advances are eliminated against the liability.

Expenses for grants are expensed when the disbursements are approved with the exception of grants made for the construction of schools that are treated as described above.

(g) Income taxes

Due to its legal status, Digicel Haiti Foundation is exempt from income taxes.

(h) New standards, amendments and interpretations not yet adopted

As of the date of these financial statements, some standards, amendments and interpretations have been issued but not yet adopted as of March 31, 2026. Those changes were not considered in the preparation of these financial statements. Management does not believe that they will have a significant impact on the financial statements of the Foundation.

4) FINANCIAL RISK MANAGEMENT

Liquidity risk

Digicel Haiti provides most of the liquidity of the Foundation. The Foundation evaluates its ability to meet its obligations on an ongoing basis. Based on these evaluations, the Foundation devises budgetary strategies to manage liquidity risk.

(Continued)

4) FINANCIAL RISK MANAGEMENT (CONTINUED)

Credit risk

Cash and cash equivalents are kept at a large local bank. Management does not believe there is a risk of non-performance by that bank.

Accounts receivable are closely monitored and impairment provision is created whenever necessary. They are considered to be a moderate credit risk.

Advances to contractors for projects and to suppliers are with reputable contractors and Management believes there is no significant credit risk thereon. If required, an impairment provision is recognized.

Foreign exchange risk

Foreign exchange risk results from inappropriate matching between the assets and liabilities denominated in foreign currencies, which could lead to a long or short position impacted by the fluctuation of the Haitian gourde versus the US dollar or other foreign currencies.

At March 31, 2026 and 2025, the Foundation respectively maintains long positions in US dollars of US$ 765,177 and US$ 559,237. For each variation of one gourde versus the US dollar, the position in US dollars would result in an exchange gain or loss of approximately US$ 5,852 in 2026 and US$ 4,281 in 2025.

The rates of exchange of one Haitian gourde for one US dollar are as follows:

	2026	2025
March 31	**130.7490**	130.6235
Average rate	**130.8592**	130.6540

4) FINANCIAL RISK MANAGEMENT (CONTINUED)

Operational risk

Management has put in place procedures to ensure that all constructions/renovation of schools are in line with the estimates and that all disbursements are properly authorized and well documented.

Qualified engineers, working at Digicel Haiti Fondation, regularly inspect the construction sites to ensure that the construction plans are followed, and not only in terms of the quality of the materials used but also in terms of the competence of the workers and of the meeting the deadlines.

Also, proformas are obtained whenever possible and all checks need two signatures from top Management, including the CEO of Digicel Haiti, when the payment is US$ 100,000 or more. Between US$ 100,000 and US$ 50,000, the CEO or the Foundation's Finance Manager may sign with a member of top Management. Under US$ 50,000, the CEO of the Foundation may sign with the Finance Manager. Finally, adequate segregation of duties combined with restricted access to the accounting system contributes to minimizing operational risk. The accounting system is also designed to produce reports on a timely basis.

5) CASH AND CASH EQUIVALENTS

As of March 31, cash and cash equivalents are as follows:

		2026	2025
Cash	$	**459**	504
Current account – gourdes		**53,494**	59,704
Current accounts – US dollars		**847,092**	777,648
	$	**901,045**	837,856

Only, the current account – gourdes bears interest.

6) ACCOUNTS RECEIVABLE

Accounts receivable include:

		2026	2025
Contractors **(a)**	$	**-**	77,330
Congrégation de Marie **(b)**		**15,032**	30,032
	$	**15,032**	107,362

(a) Accounts receivable from contractors represents sell steal profiles sales **(note 3 d)**.

(b) As part of its ongoing commitment to the education sector in Haiti, the Digicel Foundation undertook expansion work at the Institution Mixte Notre Dame de l'Assomption. In connection with this project, it received a grant of US$ 195,000 from the Congrégation de Marie representing 50% of the school's expansion costs. As of March 31, 2026, US$ 15,032 represents the outstanding amount receivable from the Congrégation de Marie, with whom a repayment agreement has been established ending no later than January 31, 2027.

7) ADVANCES TO CONTRACTORS FOR PROJECTS

Advances to contractors for projects are primarily for school construction and, to a lesser extent, renovation. In 2026, they relate to two construction projects, compared to one project in 2025.

		2026	2025
Institution Chrétienne Enfants de la Promesse	$	**479,384**	-
École Fondation Vincent		**70,509**	-
Ecole Communautaire Bon Berger de Pepin		**-**	93,866
	$	**549,893**	93,866

Elms College		**-**	247
Others		**(33)**	-
	$	**26,129**	220,520

11) FUNDING OF PROJECTS

In years 2026 and 2025, the Foundation funded projects in the following areas:

		2026	2025
Construction and repairs of schools **(a)**	$	**1,432,072**	2,486,561
Training **(b)**		**358,061**	355,040
Grants **(c)**		**735,722**	687,383
	$	**2,525,855**	3,528,984

(a) In 2026, three projects were completed: the construction of Sant Edikasyon ak Reyabilitasyon Kay Christine, École Nationale Notre-Dame du Perpétuel Secours, and École Communautaire Bon Berger de Pépin. Construction works also began at Institution Chrétienne Enfants de la Promesse (ICEP), and the first disbursement relating to the construction of the Foundation's 200th school, École Nationale Fondation Vincent, was made. In parallel, repairs were carried out at four schools : École Nationale Mixte de La Bruyère, École Nationale de Monté Grande, École Presbytérale Alexandre Pétion, and École Communautaire Mixte Saint-Esprit de Colladère.

(b) Training expenses correspond to the remuneration of trainers and related expenses such as per diem, travel, and accommodation costs. In addition, expenditures were made for the implementation of income-generating projects to help the beneficiary schools better meet their budgetary needs.

(Continued)

11) FUNDING OF PROJECTS (CONTINUED)

(c) Grants are amounts of money given to organizations for specific purposes which are defined prior to disbursement and are outlined in a signed memorandum of understanding (MOU). All beneficiary organizations are required to submit a report to the Digicel Foundation, accompanied by receipts for all expenses incurred. The Digicel Foundation also reserves the right to visit the beneficiaries at any time. They are distributed as follows:

		2026	2025
Konbit Pou Chanjman :			
Grants **(note 13)**	$	**200,705**	196,216
Field costs **(note 13)**		**130,572**	160,206
Project management		**94,343**	96,731
School Community Investment Projects		**78,212**	30,378
Nos Petits Frères et Sœurs		**75,081**	81,167
KPC Running Costs		**46,515**	16,886
Prodev		**14,959**	15,217
Haitian Education & Leadership Program		**10,011**	10,144
APAAC		**4,992**	-
Maël Fenelus		**-**	8,103
Mr. Flower		**-**	4,256
Others		**80,335**	68,079
	$	**735,722**	687,383

12) SALARIES AND SOCIAL BENEFITS

Salaries and social benefits are comprised of:

		2026	2025
Salaries and benefits	$	**361,147**	369,400
Bonuses		**61,219**	95,294
	$	**422,366**	464,694

(Continued)

13) KONBIT POU CHANJMAN

The eighth edition was launched on May 8, 2024, with the same objective of supporting 15 local organizations implementing community projects. However, due to the quality of the proposals received and the anticipated impact, 18 organizations were selected. Each received a grant of US$ 10,000. A special campaign was also launched on the same day targeting organizations that had achieved significant impact in their previously funded projects. Through this campaign, one additional organization received a grant of US$ 15,000, bringing the total amount awarded to 19 organizations to US$ 195,000.

The ninth edition was launched in May 2025, with the aim of supporting 18 local organizations through grants of US$ 12,000 each. However, only 17 were financed. A special campaign, launched on the same day under the same criteria, awarded a grant of US$ 18,000 to one organization bringing the total amount awarded to 18 organizations to US$ 222,000.

Payments to the 18 winners began in February 2026, in accordance with the terms of the contracts. As of March 31, 2026, US$ 87,600 was paid and amounts of US$ 4,800 and US$ 9,000 were accrued, for a total of US$ 13,800 **(note 9)**, corresponding to the disbursements due upon signing of the contract to, respectively, the winner of the ninth edition (UPL) and the winner of the special campaign, third edition (RJPSG). The balance of US$ 120,600 is included in commitments **(note 14).**

In 2026, the grants amounts recognized as expenses Konbit Pou Chanjman (KPC), measured at the average exchange rate for the year, are broken down as follows:

		Gourdes		Dollars
Ninth Edition	G	13,123,094	$	100,284
Eighth Edition		11,960,873		91,403
Other Editions KPC		210,250		1,607
Other		969,860		7,411
Total (note 11)	**G**	**26,264,077**	**$**	**200,705**

Expenses related to this initiative are mainly distributed as follows: advertising costs in order to encourage organizations to submit grant applications, field visits to meet the organizations selected for the second phase, travel and accommodation for the finalists when they come to Port-au-Prince, the award ceremonies, as well as supervision and evaluation of previous projects. In 2026 and 2025, as part of this initiative, expenses incurred were US$ 130,572 and US$ 160,206, respectively **(note 11c)**.

(Continued)

14) COMMITMENTS

As of March 31, 2026, the Foundation had committed to disburse US$ 860,094 for the completion of the construction of two schools. These funds will be disbursed progressively, as the work advances, in accordance with the terms of the construction contracts.

Additionally, the Foundation is committed for an amount of US$ 125,600 comprising of US$ 120,600 **(note 13)** for the ninth edition winners and US$ 5,000 for the eighth edition. These funds will be disbursed progressively as the participants complete the planned projects, in accordance with the terms of the contractual agreements.
