

GFL Environmental is uniquely equipped to provide customers with an extensive range of innovative, integrated, environmental services, all from one efficient company. We believe that by providing safe, accessible, and cost-effective solutions, we will encourage greater environmental responsibility and allow our customers and the communities we serve to be Green For Life.

With strategically located operations across Canada and the United States, GFL can undertake practically any environmental challenge, from routine to complex, with unparalleled commitment to safety and customer service. Our diverse services are backed by the highest quality resources, from state-of-the-art specialty equipment, to a knowledgeable and highly-trained workforce.

PEACE OF MIND COMES IN THREE SIZES

GFL's rectangular double-wall waste oil tanks provide efficient and convenient storage for used oil. The low-profile design offers easy access for filling and draining at ground level. These durable tanks are available in three sizes — each built and labelled in accordance to ULC specifications to comply with waste oil storage regulations. Installed additional ports are ready for connections of pumps and overfill alarms.

TANK DIMENSIONS:

	Length	Width	Height Without Legs	Height With Legs
1100 LITER	72.6"	47.2"	24.5"	30.5"
2250 LITER	110.2"	48.2"	32.2"	36.3"
4600 LITER	118.34"	48"	48"	52.1"
