

# GFL IS YOUR ONE-STOP ENVIRONMENTAL SOLUTIONS EXPERT

## WITH OVER 25 YEARS OF EXPERIENCE WE PROUDLY SERVE THE COMMERCIAL AND AUTOMOTIVE INDUSTRIES

For dealerships, transportation, construction, machinery and maintenance, utilities, or lube centers, GFL has the safe, compliant, cost-effective and innovative solutions to help you and your business.

### At GFL, Green for Life is not just our name. It's our mission.

Our core purpose is to provide accessible, cost-effective and sustainable environmental solutions that allow our customers and the communities we serve to be Green For Life. One of the keys to our success lies in the diversity of our services and our ability to deliver robust integrated solutions as a single efficient company. With safety as our number one priority, our services are specially designed and delivered to meet the specific individual needs of you, our customers.

**GFL has the experience, the expertise, the drive, and the scale to be your full-service environmental solutions partner.**

## Discover the GFL Advantage

GFL offers extensive experience in the automotive waste fluid and commercial liquid waste management industries, and we're fully equipped to assist you with practically any waste handling challenge.

**Our diverse services include:**

### Oil and Antifreeze Collection, Recycling and Disposal

From used crankcase oil to transmission and gear oil, GFL offers pump-out service for a wide variety of used oil materials stored in tanks or drums. Our full-service program also includes used oil filter collection and recycling. Service can be arranged on a schedule or on a call-in basis to best suit your needs. We also carry a complete line of industry-certified double wall tanks for the safe storage and collection of used oil.

### Vacuum Truck Services

Servicing interceptor pits, trenches and more, GFL's extensive fleet of straight vac and combination wet-to-dry recovery trucks vary in design and performance to complete an impressive range of routine, complex and specialized jobs for all your commercial and institutional maintenance needs. GFL has the equipment, expertise and trained professionals to take on a wide range of vacuum truck jobs safely and efficiently.

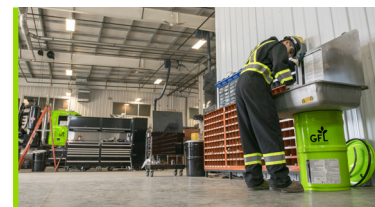

### Containerized Waste Management

GFL offers commercial, institutional and industrial customers a comprehensive range of safe and environmentally-responsible hazardous and non-hazardous liquid waste handling services. From onsite packaging, container supply and transportation, to licensed disposal or recycling, our trained experts work with our customers to deliver effective solutions to practically any challenge, with custom strategies to meet your business needs.

### Parts Cleaning Services

GFL offers a diverse line of high-quality equipment with a choice of manual and automated solutions, mineral spirits or aqueous solvents. Equipment varies in size and style which includes sink-on-drum, vat style, brake cleaners and paint gun cleaners. We also offer a cost-effective scheduled care program to clean and maintain your parts cleaners and safely recover dirty solvent for recycling.

### Emergency Response and Site Remediation

From planning and preparedness to response and remediation, GFL's HAZMAT and Dangerous Goods Emergency Response services are verified to the highest industry standards. With over 25 years of experience, our adept teams of multi-disciplined professionals manage all aspects of emergency response from start to finish, using established procedures and standards.

### We also offer:

- Storage and containment solutions
- Dispersing products and maintenance
- Aerosol disposal

\* Services vary by location. Please contact your local branch to inquire about service availability in your area.

A vital part of our mission is to serve the communities we live and work in. That is why we launched the Full Circle Project (FCP), a community-driven charitable giving program that lets our customers decide how a portion of our donations are directed.
