

## **Habitat & Conservation Volunteer – Job Description**

**Hours:** Minimum 4 hours per week on a rostered schedule

**Reports to:** Natives & Grounds Keeper

### **Role Overview:**

As a Habitat & Conservation Volunteer, you will play a vital role in protecting and restoring native habitats. You'll assist with practical conservation tasks such as native plant propagation, seed collection, habitat restoration, and supporting predator management initiatives. Every contribution helps create thriving ecosystems and safeguard vulnerable wildlife.

### **Key Responsibilities:**

- Propagate and care for native plants in the nursery
- Collect seeds and assist with planting and restoration projects
- Support predator management and conservation programs
- Maintain and assist with the care of habitats and grounds
- Follow safety procedures and guidance from the Natives & Grounds Keeper

### **Requirements:**

- A genuine interest in conservation, sustainability, and wildlife
- Good level of fitness and ability to work outdoors in variable weather
- Comfortable performing physical tasks such as lifting, bending, and walking on uneven terrain
- Able to listen carefully and follow instructions
- Capable of working independently when required
- Team player with a proactive, positive attitude
- Reliable and able to commit to a minimum of 4 hours per week on a rostered schedule

### **What You'll Gain:**

- Hands-on experience in practical conservation and habitat restoration
- Opportunity to contribute meaningfully to protecting native species
- Learning from experienced staff and volunteers
- Being part of a passionate team making a real impact for wildlife
