High Performance.

The LearJet 75 is Bombardier's version on the all new design of the LearJet. With increased speed, range and baggage capacity the LearJet 75 series sets the standard for Super-Light aircraft.

This Bombardier Aerospace light jet excels in all conditions of flight while giving you a quieter flight experience. The cost effective light jet features two double seating arrangements but it's speed and economy are what made it famous. The LearJet 75 also features an Auxiliary Power Unit that can keep your cabin cool while sitting on the hot ramp and be a huge game changer on those hot sunny days. This aircraft is the best of the light jet category.
