Basic information

- Advertising panels display either static images ("Static") or video spots ("Full-Motion Video").
- Each advertising panel is assigned to a product network.
- Content is played synchronously across each product network.
- Location plans for all networks are available in the [Product Finder](#).
- Spot length: exactly 10 seconds

Design tips

- Simple and clear message
- Distinctive colors
- Minimum font size 75 pixels

We would be glad to advise you on the creative implementation or to provide examples for inspection.

Checking the digital advertising medium

Before delivering the digital advertising medium, please check it against our specifications.

Static

The "[XnView](#)" tool can be used for these checks; it can be downloaded at xnview.com. Open the JPEG file of your still picture in the tool and, using the "View" icon or key combination "Ctrl+Enter", check if the properties listed on the right-hand side are correct.

Full-Motion Video

The "[MedialInfo](#)" tool can be used for these checks; it can be downloaded at mediaarea.net. Open the "MedialInfo" tool in HTML view and then check your file. The spot must correspond to the length of the reserved booking.

Delivery

To ensure a punctual start to your campaign, upload your digital advertising media at the latest 5 working days before the start of broadcasting:
