Description

The board with a chalk drawing panel designed for creative play, adapted for use by children in wheelchairs. The board stimulates creativity and imagination, develops fine motor skills in children, and can serve as a tool for supporting development and education in a friendly and accessible way. The structure is made of galvanized black steel, powder-coated. The board is made of HPL material. The pipes are finished with spherical decorative elements.

* The board is also available in a stainless steel version.

Playground device consists of

- 2 x posts
- 1 x board with a chalk drawing panel
