Description

The playground set made from the highest quality ROBINIA wood, which combines a natural ecological appearance with exceptional durability. The set consists of two taller wooden posts, one decorated with a leaf and the other with an owl figure. Between them, there are steel rods at various levels that create a climbing structure. Beneath the rods, there are shorter wooden posts that also support the rods, adding elements for jumping or balancing. This construction allows children to practice balance, agility, and develop physical fitness through climbing and balancing at different heights. The materials used—solid wood and stainless steel—ensure durability and resistance to weather conditions. The set fits perfectly into a playground with a natural aesthetic while offering functionality and safety.

Playground device consists of

- 8 x posts
- 4 x steel bars
- Decorative elements with forest motifs (leaves and an owl)

Product details

- Dimensions: (LxWxH): 2,20 x 1,85 x 3,60 m
- Safety area: (LxW): 5,20 x 4,85 m
- Freefall height: 1,00 m
- Age group: 3-12
- Number of users: 4 people
- A certificate confirming compatibility with norm EN 1176
- Differences in dimensions no more than +/- 5% are acceptable

Materials

- Structure made of ROBINIA wood, beams approximately 16 cm thick
- Connecting elements made of stainless steel
- Bars made of stainless steel
- Decorative elements made of colorful 15 mm thick HDPE sheet
