Description

The Police Station Playset is a unique playground element that combines learning with creative role-playing, designed for children using wheelchairs. Children can become police officers, go on patrols, respond to “calls,” and develop their imagination, coordination, and teamwork skills. The set attracts attention with its realistic appearance – featuring a gate with the “POLICE” sign, a police panel with a counter, a tunnel, climbing walls, and a patrol car. Made from durable and safe materials, it serves as a hub of fun and adventure on any playground. Additionally, built-in rotating wheels that emit colorful light in motion make play even more exciting. This set is ideal for kindergartens, recreational areas, and playgrounds, supporting sensory development and fostering creativity in young children.

The Police Station Playset is designed with durability, safety, and functionality in mind. The structure is made of stainless steel. Pipes with a diameter of 76.1 mm and a wall thickness of 2 mm ensure strength and safe use. Five of the eight structural posts are finished with decorative spherical elements. The ropes are 16 mm thick, consisting of a fiber core with a steel braid, covered with polypropylene strands, making them UV-resistant and flame-retardant. Panels and decorative elements are made from durable 15 mm HDPE, resistant to weather conditions and mechanical damage. An additional feature is the rotating wheels that emit colorful light, enhancing the play experience.

Playground device consists of

- 8 structural poles
- 1 climbing wall with ropes
- 1 panel with climbing wall
- 1 panel with “POLICE” sign
- 1 counter panel
- 1 decorative panel with patrol car
- 1 decorative panel with cookie
- 1 tunnel
- 13 rotating wheels emitting colorful light

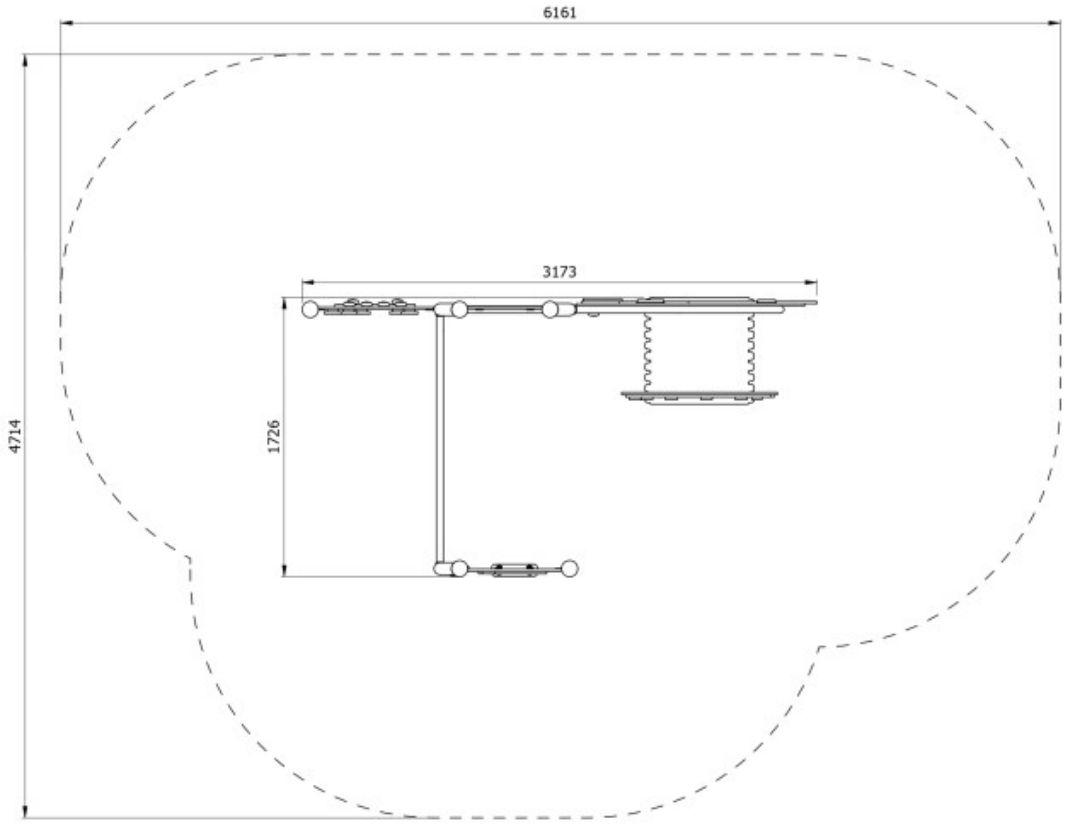

Product details

- Dimensions (LxWxH): 3,17 x 1,73 x 1,58 m
- Safety area (LxW): 6,16 x 4,71 m
- Maximum fall height: 1,28 m
- Age group: 1+
- Number of users: 10
- Dimensional tolerance: ±5%

Materials

- Structure made of stainless steel, pipes with a diameter of 76.1 mm and a wall thickness of 2 mm.
- Ropes 16 mm thick, reinforced, made of a fiber core with steel braiding, covered with polypropylene strands. Ropes are UV-resistant and flame-retardant.
- Panels made of 15 mm HDPE.
- Decorative elements made of 15 mm HDPE.
- Rotating wheels emitting colorful light (5 red, 4 blue, 3 multicolor, 1 green).
