Description

The Port Playset is an attractive playground feature that combines fun, learning, and creativity, designed to be accessible for children using wheelchairs. Children can take on the roles of sailors or fishermen, developing imagination, motor skills, and teamwork abilities. The set stands out with its realistic appearance – featuring a gate with the inscription “Lagoon,” a panel with fish and a counter, a tunnel, a climbing wall, a ship, and a lighthouse. Made from durable and safe materials, it becomes the centerpiece of play and adventure on any playground. Additional rotating wheels that emit colorful light in motion make play even more engaging and dynamic. The Port Playset is ideal for kindergartens, recreational areas, and playgrounds, supporting sensory development and stimulating children’s creativity.

The Port playset has been designed with durability, safety, and functionality in mind. The structure is made of stainless steel. Tubes with a diameter of 76.1 mm and a wall thickness of 2 mm ensure robustness and safe use. Five of the eight structural posts are finished with spherical decorative elements. Rope components are 16 mm thick and consist of a fiber core with a steel braid, covered with polypropylene strands, making them UV-resistant and flame-retardant. Panels and decorative elements are made of durable 15 mm HDPE, resistant to weather conditions and mechanical damage. An additional attraction is the rotating wheels that emit colorful light, enhancing the play experience and visual appeal.

Playground device consists of

- 8 structural poles
- 1 climbing wall with ropes
- 1 panel with the inscription “LAGOON”
- 1 panel with a counter
- 1 decorative panel with a lighthouse
- 1 decorative panel with a ship
- 1 decorative panel with a seashell
- 1 tunnel
- 10 rotating wheels emitting colorful light

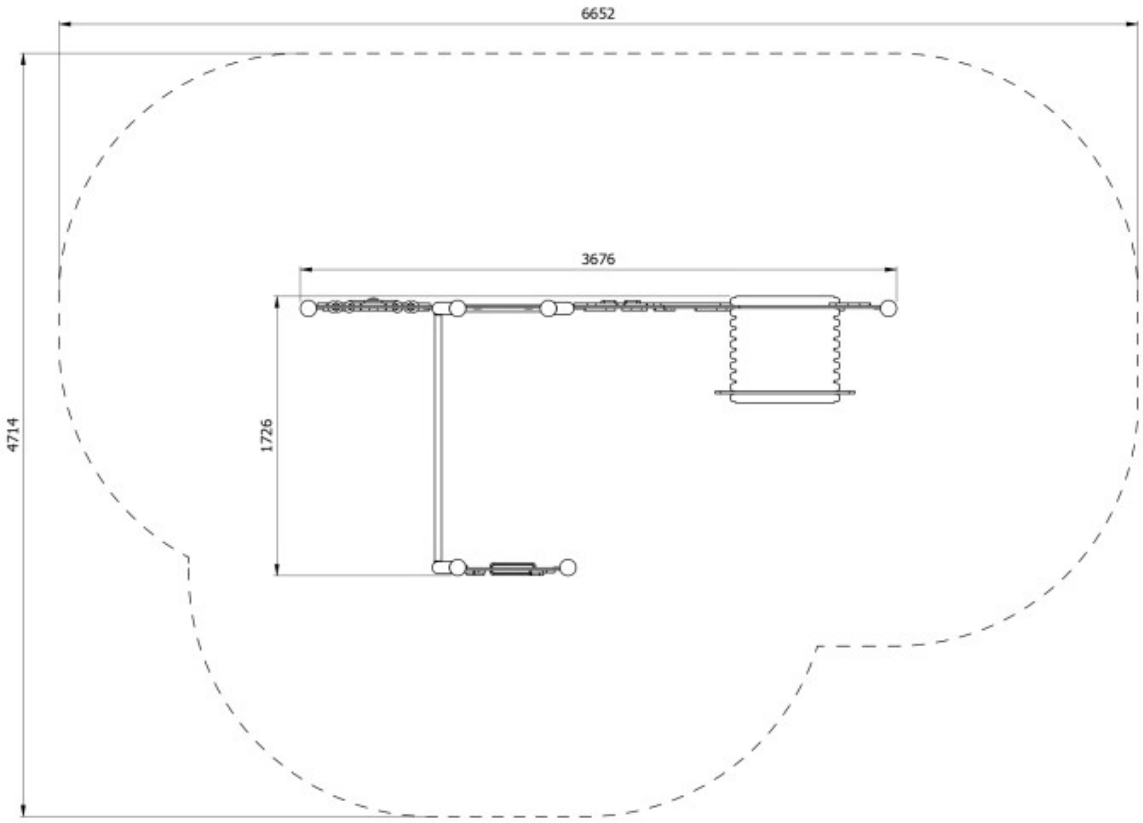

Product details

- Dimensions (LxWxH): 3,68 x 1,73 x 1,58 m
- Safety area (LxW): 6,65 x 4,71 m
- Maximum fall height: 1,28 m
- Age group: 1+
- Number of users: 10
- Dimensional tolerance: ±5%

Materials

- Structure made of stainless steel, pipes with a diameter of 76.1 mm and a wall thickness of 2 mm.
- Ropes 16 mm thick, reinforced, made of a fiber core with steel braid, covered with polypropylene strands. Ropes are UV-resistant and flame-retardant.
- Panels made of 15 mm HDPE.
- Decorative elements made of 15 mm HDPE.
- Rotating wheels emitting colorful light (10 x multicolor).
