Description

A sensory board for creative play with a sound that enhances the creativity and sensory experience of children, including those in wheelchairs. With three bongos of varying sizes and diameters, this device is built to withstand even the heaviest use while producing exceptional quality sound. Whether your child is a budding musician or loves to experiment with sound, these bongos offer endless creative expression and exploration opportunities. The board's structure is made of powder-coated black steel, weatherproof, and ready for intensive use. The board is made of HDPE plastic. The poles are finished with spherical decorative elements.

With this sensory board, children will be able to develop their fine motor skills, hand-eye coordination, and imagination, all while having fun in a safe and inclusive environment.

If you prefer, you have the option to mount the board directly onto the wall. In this scenario, rather than relying on metal legs for ground-based support, we offer specialised mounting elements designed specifically for wall installation.

Available panel colors: green, yellow, red, blue.

Product details

- Dimensions (LxWxH): 0.90 x 0.10 x 1.25 m
- Safety area: 3.90 x 3.10 m
- A certificate confirming compatibility with norm EN 1176
