## Description

The **Farma Playset** is a unique playground attraction that combines fun, learning, and creative role-play, designed to be fully accessible for children using wheelchairs. Kids can take on the roles of farmers, developing imagination, motor skills, and teamwork through engaging, imaginative play. The set captivates with realistic details – including a gate with the “EcoFarm” sign, a shop counter panel, tunnel, climbing walls, and a tractor-themed panel. Made from durable and safe materials, the Farma Playset becomes the center of fun and adventure on any playground. Additionally, the rotating wheels that emit colorful light when in motion make playtime even more exciting and visually stimulating. This playset is perfect for kindergartens, recreational areas, and playgrounds, supporting sensory development and encouraging creativity among the youngest users.

The **Farma Playset** is designed with durability, safety, and functionality in mind. The structure is made of stainless steel. Tubes with a diameter of 76.1 mm and a wall thickness of 2 mm ensure sturdiness and user safety. Five of the eight structural posts are topped with decorative spherical elements. The rope components are 16 mm thick, built with a fiber core and steel braid, covered with polypropylene strands, making them UV-resistant and flame-retardant. The panels and decorative elements are made of 15 mm thick HDPE, resistant to weather conditions and mechanical damage. An additional highlight of the set is the rotating wheels emitting colorful light, which enhance sensory engagement and play value.

**Playground device consists of**

- 8 structural poles
- 1 climbing wall with ropes
- 1 panel with climbing wall
- 1 panel with “EcoFarm” inscription
- 1 counter panel
- 1 decorative panel with tractor motif
- 1 bush panel with insects
- 1 tunnel
- 16 rotating wheels emitting colorful light

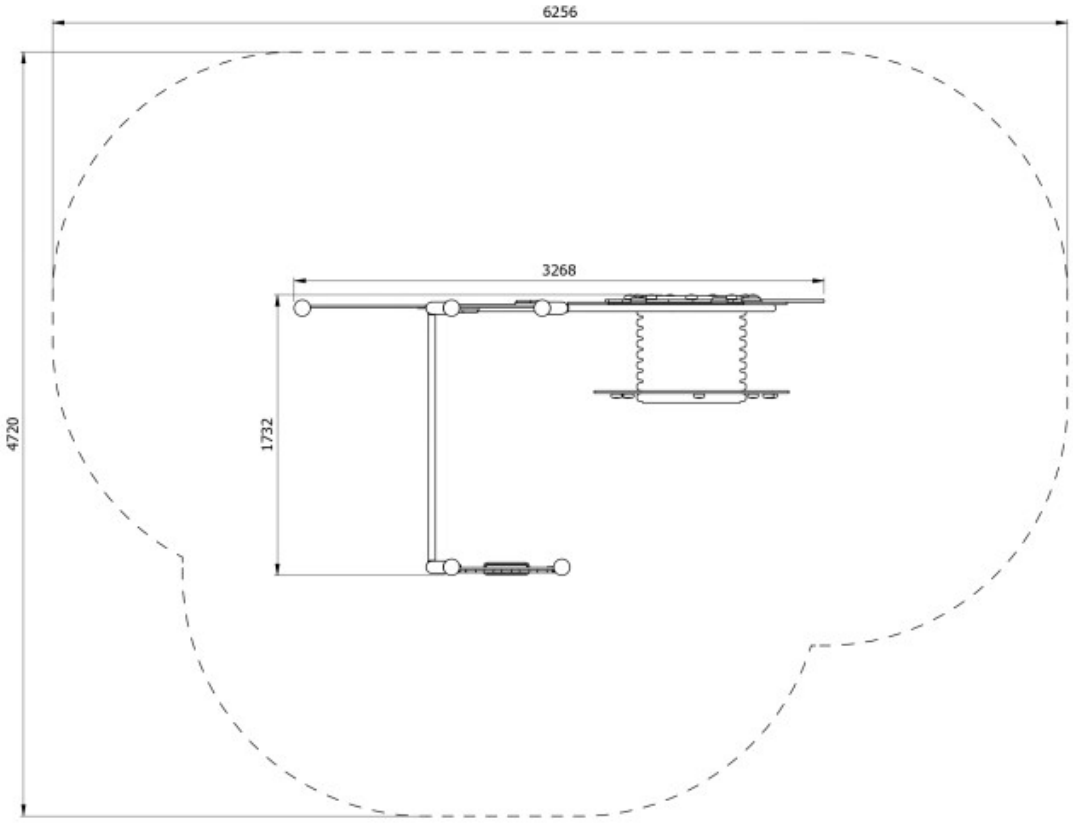

**Product details**

- Dimensions (LxWxH): 3,27 x 1,73 x 1,58 m
- Safety area (LxW): 6,26 x 4,72 m
- Maximum fall height: 1,28 m
- Age group: 1+
- Number of users: 10
- Dimensional tolerance: ±5%

**Materials**

- Structure made of stainless steel, tubes with a diameter of 76.1 mm and a wall thickness of 2 mm.
- Ropes, 16 mm thick, reinforced, consisting of a fiber core and a steel braid, covered with polypropylene strands. The ropes are UV-resistant and flame-retardant.
- Panels made of 15 mm HDPE.
- Decorative elements made of 15 mm HDPE.
- Rotating wheels emitting colorful light (7 red, 2 blue, 2 multicolor, 5 green).
