START&STOP

Code: IS-TA-114

Physical | Social-emotional | Cognitive | accessibility | Integration | Socialisation | Thinking | Manipulation

Description

The modern Start&Stop board with a digital LCD stopwatch is an innovative solution that combines educational, integrative, and sports functions. The toy is adapted for use by children in wheelchairs. This unique product is perfect for playgrounds, sports fields, and outdoor gyms, encouraging children to be active and engage in healthy competition. The board is easy and intuitive to use, thanks to a large digital LCD display and stainless steel touch buttons. A high-quality solar panel provides reliable power and is resistant to cracks and mechanical damage, ensuring durability even under intensive use. The front of the board is made of durable HPL material, resistant to weather conditions, UV radiation, and wear. The load-bearing structure is made of galvanized and powder-coated black steel, giving the whole unit stability and an elegant look. Decorative spherical pipe ends add both aesthetics and safety. The board is adorned with engraved figures of a boy and girl, as well as three medals, giving it a sporty character.

On request, the board can also be made in a stainless steel version, designed for particularly demanding outdoor conditions.

Note: Due to the technological properties of LCD displays, the device operates correctly only at temperatures above 0°C.

Playground device consists of

- 2 x posts
- 1 x board with an electronic stopwatch powered by a solar panel

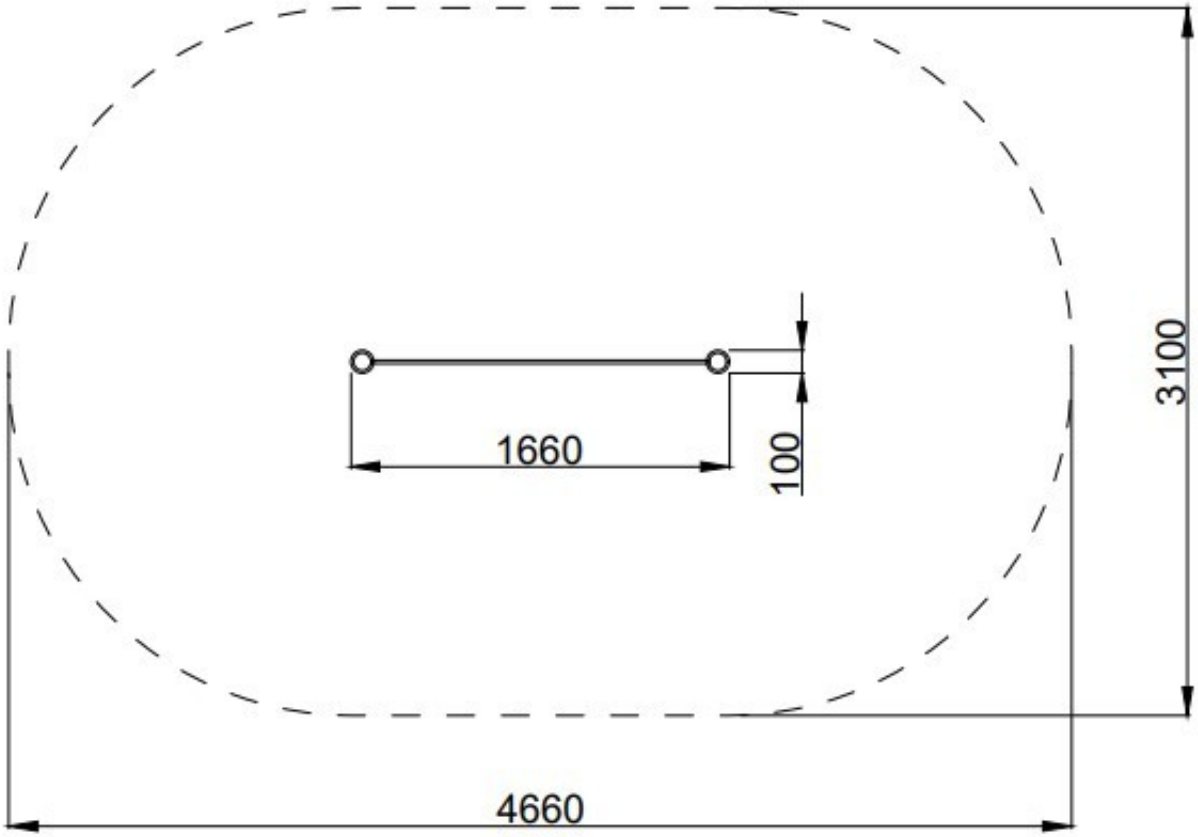

Product details

- Device dimensions (LxWxH): 1.66 x 0.1 x 1.82 m
- Safety zone dimensions (LxW): 4.66 x 3.1 m
- Age group: 2+
- Number of users: 4
- Device weight – in-ground version: 30.3 kg
- Device weight – surface-mounted version: 32.1 kg
- Functional values: educational, spinning, balance, equality
- Dimensional tolerances: up to +/- 5%

Materials

- Structure made of galvanized, powder-coated black steel
- Structure color [RAL]: 9006
- Board made of HPL material
- Board color: blue
