## SOFTWARE ENGINEER

### / EXPERIENCE

#### Software Engineer - Docket *March 2020 - Current*

- Built major features of a large-scale React (NextJS) application used by tens of thousands of users.
- Created hundreds of new components and updated the legacy React codebase to use functional components.
- Optimized performance bottlenecks in the application, specifically in our real-time collaborative text editor.

#### Front-end Engineer - Ava Inc. *2019 - 2020*

- Utilized styled-components, hooks, easy-peasy, Electron, and more to help build React projects for clients.
- Updated an Electron app to be fully compatible and responsive for the web.
- Provided design system and UI/UX ideas and improvements for our projects.

#### Web Developer - THE PLAID AGENCY *2016 - 2020*

- Responsible for the development, testing, deployment, and maintenance of all client websites and applications.
- Helped push the agency to utilize new technologies including React/Gatsby, CI/CD, and headless CMSes.
- Created detailed documentation for all development and DevOps processes.

#### Web Developer, Founder - Xenostar Studios *2014 - 2016*

- Provided full-stack website development for clients using technologies including Wordpress, React, and Angular.

#### Web Developer - Stormfront Productions (SFP) *2012 - 2014*

- Developed, designed, and maintained over 50 web projects of various sizes for businesses and organizations.
- Pushed company to implement new build processes such as Grunt and Vagrant to enhance our workflow.
- Lead the design team for a period of six months while we found a new full-time designer.

### / EDUCATION

#### Purdue University *2008 - 2012*

Bachelors of Science, Computer Graphics Technology  
West Lafayette, Indiana, USA

Core GPA **3.76**  
GPA **3.45**

6 of 8 Semester Dean's List  
4 of 8 Semester Honors
