ULTRARED

REDUCE YOUR THREAT EXPOSURE WITH CONFIDENCE

Attackers already know where you're exposed. Do you?

Despite heavy investment in security, organizations still struggle with a core challenge: reducing real, exploitable gaps. Alert fatigue and an overwhelming number of false positives erode trust in findings and leave security teams endlessly patching, unsure what's truly exposed.

Continuous Threat Exposure Management (CTEM), as defined by Gartner, is rapidly gaining traction as a more strategic approach: continuously identifying, validating, prioritizing, and mitigating exposures across the entire attack surface.

Yet many solutions claiming to support CTEM stop at surface-level detection — flooding teams with unverified findings.

Active validation is the cornerstone of an effective CTEM program.
To stay ahead of today's fast-moving, often AI-powered threats, security teams need active validation — reliable proof that what's detected is real, exploitable, and worth their time.

ULTRA RED CTEM Platform: Expose Less, Validate More

ULTRA RED's validation-first CTEM platform enables security teams to proactively manage and reduce their threat exposure. The agentless solution continuously discovers all externally facing assets, automatically validates 100% of exposures with clear proof of exploitability, and delivers actionable remediation guidance. With near-zero false positives, security teams can stay focused on genuine threats without wasting time or resources.

KEY BENEFITS

Discover and map your entire attack surface
Continuously monitor all your internet-facing assets.

Focus on real threats, not endless CVEs
Validate what's really exploitable instead of chasing alerts.

Detect vulnerabilities that pentesters miss
Uncover and track high-impact and hidden vulnerabilities.

Fix risks without second-guessing
Get evidence of exploitability for every vulnerability.

Speed up remediation with VITA AI
Gain practical guidance to mitigate exposures before they could escalate.

100%	< 1%	– 75%	2x-3x	100%
Exposure Validation	False positives	Fewer Alerts	Faster MTTR	Agentless SaaS

ULTRARED

Trust Your Security Findings with ULTRA RED

The ULTRA RED CTEM platform **automatically validates** every exposure and attack vector through active, external testing. With real-world proof of exploitability in hand, SecOps teams can trust their findings, focus on real risks, and respond with confidence — without second-guessing every alert.

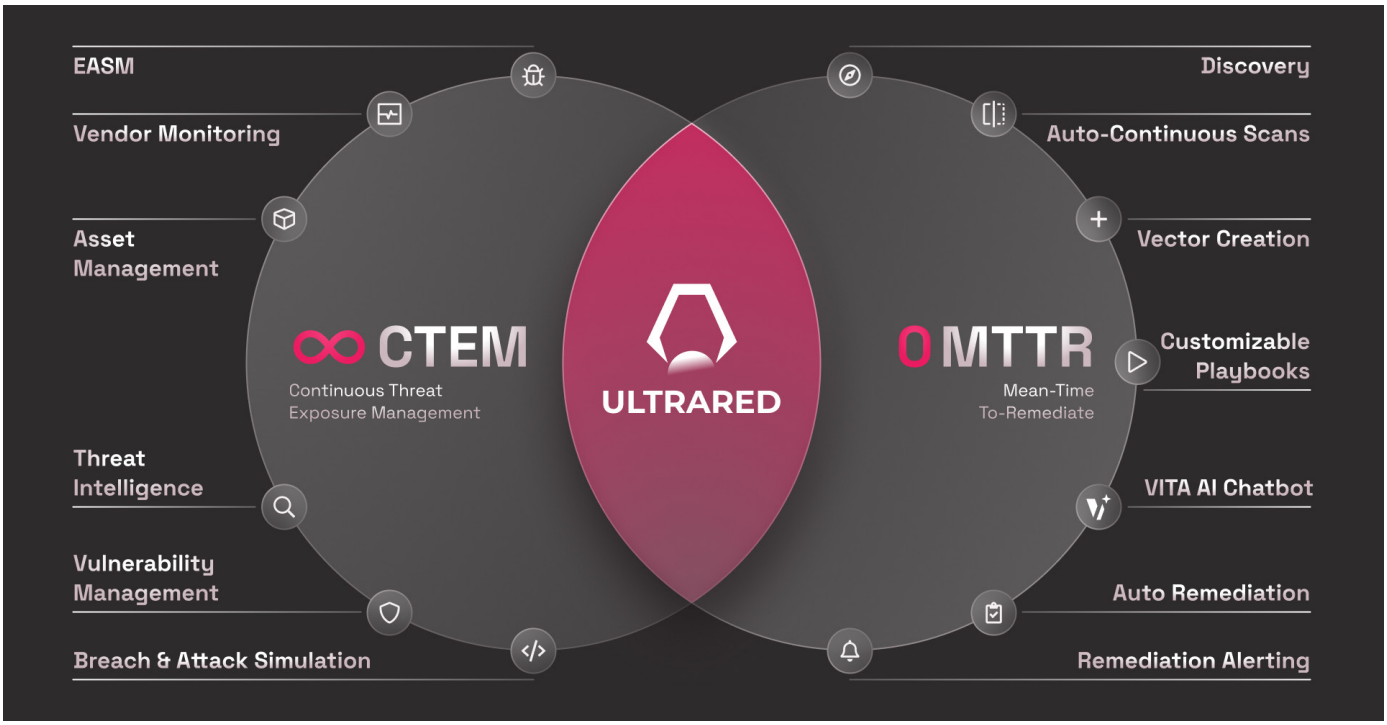
Why ULTRA RED?

Fast, no-hassle setup
Agentless scanning technology requires no installation or internal access.

In-house Security Research Team
Proprietary scanning methods to detect complex vulnerabilities and 0-days.

Attack vector-based detection
ULTRA RED safely proves exploitability and provides concrete evidence.

Comprehensive, true CTEM
Manage the full exposure lifecycle - from discovery to validation to remediation.



Get Ahead of Threats

ULTRA RED's CTEM platform helps security teams proactively identify, validate, and fix real, exploitable risks — before attackers can exploit them.

About ULTRA RED

ULTRA RED is a leading provider of Continuous Threat Exposure Management (CTEM) solutions, built on a validation-first approach. Our CTEM platform helps security teams confidently reduce threat exposure by continuously identifying, validating, and prioritizing gaps across the entire attack surface.
