

PRESS RELEASE

***truffls* releases first job hunting app for the Apple Watch**

- *truffls* now available on the Apple Watch
- *truffls* now available globally and in English
- Extension of the employer branding section

Berlin, June 26th, 2015 – Having successfully launched a professional recruiting solution for companies and headhunters, Berlin-based startup *truffls* now presents an addition to the already available apps for job-hunters on Android and iOS: *truffls* for Apple Watch.

„Reaching candidates on their smartphones and actively participating in mobile recruiting is much more than just a trend. As the leading player in this space, we´re always eager to head innovative technological advancements. That´s the reason we decided to release our product for the Apple Watch“ says managing director Clemens Dittrich.

However, *truffls* did not only focus on providing the app on various devices but also considered the international orientation of larger companies: the app is now available in english, and the underlying parsing technology is able to understand english job ads and match these with fitting candidates.

On top of that, *truffls* took into account the frequently occurring request for dedicated employer branding solutions that help companies distinguish themselves from their competition. As of now, interested companies benefit from a variety of opportunities to enhance their employer brand, starting with an integration of picture galleries into single job ads right through to complete premium company profiles that are prominently displayed in the app.

The *truffls* app is available for free on [iOS](#) und [Android](#). Companies can sign up for free on <http://www.truffls.com>.
