

# BrightHR introduces smart meters

 bright<sup>hr</sup>

in partnership with  
**Smart Energy GB**

At BrightHR, we're all about keeping small businesses running like clockwork. From HR to health & safety and payroll, our mission is to save time and most importantly, keep costs down.

That's why we're teaming up with **Smart Energy GB** to spread the word about smart meters and how they could make a difference to you and your business.

So what's it all about?  
Let's hear it from the experts...

# Smart meters put you in the driver's seat

You're the person keeping it all running, from the first cup of coffee to the last light out. Every penny matters when you're building something that's yours. Smart meters show you exactly how much your energy use is costing you, so you get accurate bills, not estimates.

## Why businesses love smart meters

### Making bills simpler

Accurate readings mean you pay for what you actually use, not estimates.

### Less admin hassle

Your meter sends readings automatically. That's one less thing on your to-do list.

### Help the planet too

You're part of creating a smarter energy system for everyone. Feels good, right?

## The bonus bit

You could even earn money by shifting energy use to quieter times through the Demand Flexibility Service (DFS).

Last winter, businesses and homes saved enough energy to power 7.5 million homes for an hour.

# Did you know?

**9 in 10**

small business owners are happy with their smart meter\*.

**39 million**

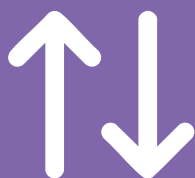

smart and advanced meters in homes and small businesses across Great Britain\*\*.

**My smart meter has helped me to streamline at least one aspect of my finances – keeping energy costs in check and helping me with my cashflow and budget.”**

Jenny Jervis, owner of Vibes Yoga Studio, Cardiff

## Ready to make the switch?

**Join the many businesses who've already upgraded.** Installation takes about two hours and works around your busy schedule.
