Name: _____ DOB: _____

We strive to provide excellent medical care to you and to all of our patients. Consistent with this, we have developed appointment cancellation and no-show policies that allow us to better schedule appointments for all patients. When an appointment is scheduled, that time has been specifically reserved for you and when it is missed that time cannot be used to treat another patient in need of care. We sincerely appreciate your assistance and cooperation as this allows for a smooth office flow and more efficiently uses your time.

Our Cancellation and No-Show Policy is as follows: We request that you please give our office at least 24-hour notice in the event that you need to reschedule your appointment. If you do not provide us with a 24-hour notice, or if you do not show up for a scheduled appointment, you may be charged a $65 rescheduling fee, or you may be asked to prepay in full for your next appointment. The charge for a consultation "no-show" will be the consultation fee. A patient who is a no-show two times or more may not be rescheduled for future appointments and may be dismissed from the practice.

Our Late Arrival Policy is as follows: If a patient is more than 15 minutes late to their appointment, the appointment may be canceled and need to be rescheduled. Patients arriving late may also be asked to wait to be seen until the provider has an opening in their schedule. If you have any questions regarding these policies, please let our staff know and we will be glad to speak with you in more detail.

Important Surgical Policies
Preoperative Arrival Requirement
To help ensure your surgery proceeds as scheduled, all patients must be physically present in the state of Georgia at least 48 hours before their scheduled surgery date. This requirement allows adequate time for any final preoperative needs and minimizes the risk of travel-related delays or cancellations. Please plan your travel accordingly. Failure to arrive in Georgia at least 48 hours before surgery may result in postponing or rescheduling your procedure.

Lipedema Staged Surgery Planning
Lipedema treatment typically involves staged surgical procedures. To allow adequate healing and to evaluate your recovery and results, future surgeries will not be discussed or scheduled until at least six (6) weeks after your most recent procedure. During your six-week postoperative follow-up, Dr. CV will assess your healing and determine the appropriate timing and plan for any additional staged procedures.

I have read and understand the Aesthera Plastic Surgery Cancellation, No-Show Policy and Surgical policies. I agree to be bound by its terms. I also understand and agree that such terms may be amended from time to time by the practice
