

Lisuto Platform Key Components

We Scale Up & Down

Lisuto works with large scale feeds or single product by product inventory creation.

International Marketplace Integration

We are already integrated with 9 marketplaces in 3 languages and we grow all the time.

Product Code Support

We recognize and enrich your data with many international product codes helping you to list safely and drive more traffic.

Precise Translations

We provide proper context based listing translations in each language and enable you to create custom translations as well.

Automated Category Classification

We map you listings to the best suited categories on marketplaces in a completely automated way.

Full Inventory Control

You are in full control of your inventory - we monitor, start and stop listings on all marketplaces in real time.

Broad Product Catalog

We use extensive catalog to enrich data and optimize listings on each marketplace. The result - more traffic and better conversion.

Order Status Control

With our order tagging you always know which order was paid and which is due for shipping.

Full Marketplace Control

Marketplaces are different - you can set each marketplace's settings separately. You are in full control.

Go Social

We enable easy sharing of your listings on social media - now is the time to try it.
