

Please Notify the office prior to visit if you present with any of the following:

- Pacemaker or internal defibrillator, or any other metallic or electronic implant anywhere in the body.
- A permanent implant in the treated area such as metal plates and screws, silicone implants or an injected chemical substance, unless deep enough in the periosteal plane.
- Intra-dermal or superficial sub-dermal areas that have been injected with hyaluronic acid, collagen, or fat injections or other augmentation methods with bio-material during the last six months.
- Current or history of skin cancer, or current condition of any other type of cancer, or premalignant moles.
- Severe concurrent conditions, such as cardiac disorders, sensory disturbances, epilepsy, uncontrolled hypertension, and liver or kidney diseases.
- Pregnancy and nursing.
- Impaired immune system due to immunosuppressive diseases such as AIDS and HIV, or use of immunosuppressive medications.
- Patients with a history of diseases stimulated by heat, such as recurrent Herpes Simplex in the treatment area, may be treated only following a prophylactic regimen.
- Poorly controlled endocrine disorders, such as diabetes or thyroid dysfunction, and hormonal virilization.
- Any active condition in the treatment area, such as sores, psoriasis, eczema, and rash.
- History of skin disorders, keloids, abnormal wound healing, as well as very dry and fragile skin.
- History of bleeding coagulopathies.
- Any surgery in the treated area within three months prior to treatment.
- Having received treatment with light, laser, RF, or other devices in the treated area within three months or before complete healing.
- Use of Isotretinoin (Accutane®) within six months prior to treatment.
