# ARK SERIES

ecosmar<sup>+</sup>  
Fire

**Natural hues, weatherproof materials and industrial design features combine to create an eco-friendly fire solution that is as striking as it is sustainable.**

With a wide lip to perch a drink on, and an unobtrusive shape that suits all types of décors and settings, EcoSmart's Ark44 and Ark40 fire furniture create an instant talking point – even when they are not in use.

## Key Features

### Indoor/Outdoor Design

A contemporary take on the traditional fire pit, the Ark Series fit right at home in both indoor and alfresco settings.

### Long Burn Time

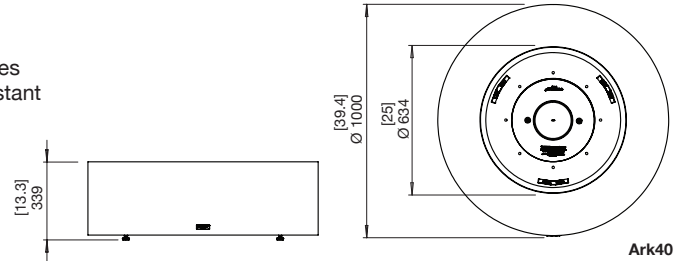

Fuelled by environmentally friendly e-NRG bioethanol, the Ark Series can burn up to 11 hours straight, depending on installation and weather conditions.

### Generous Dimensions

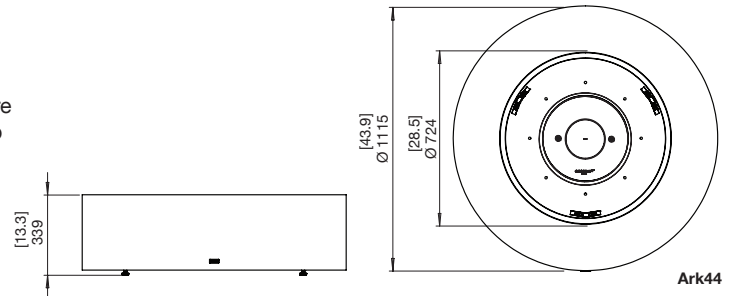

Tabletop design accommodates glassware, leaving hands free to enjoy finger food and canapés.

### Low Maintenance Fireplace

Unlike traditional wood burning fire pits, there is no need to sweep up ash after using the Ark fire tables.

Ark40
