OSS Downloads

## The Road to 1.0

- 2011 **Initial Idea**  
A cloud-agnostic version of the newly released AWS CloudFormation.

- 2014 **Terraform 0.1**  
Released with support for AWS and Digital Ocean

- 2016 **OSS, Community, Providers**  
By the end of 2016 there were 7 major releases, dozens of Providers for Azure, GCP, Docker, OpenStack, and more, and 750+ contributors.

- 2017 **Provider Program**  
Launched the Provider program for partners and community to build, post, maintain Providers.

**Microsoft Partnership**  
Microsoft and HashiCorp commit to partnership to build out Azure providers.

**Terraform Registry**  
Launch of the Registry for partners and community to compose and share modules.

**Terraform Enterprise**

- 2019 **Terraform Cloud**

**Terraform 0.12**  
Next generation of HCL for programmability and usability.

- 2021 **1.0**

### Automation

OSS approach to infrastructure as code for any infrastructure.
