Terraform Cloud
FastTrack Fundamentals Project

Terraform

2 week engagement

The Team

Project Manager
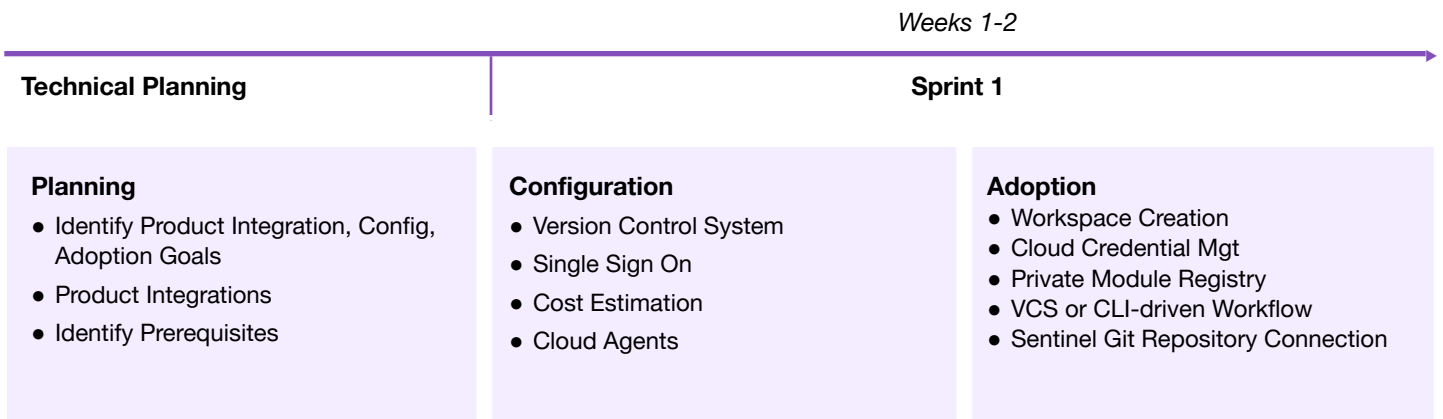

Delivery Manager

Engineer

Certified Partner

With a FastTrack program package, you will **collaborate with a skilled and trusted team** of HashiCorp staff and Certified Partners, including a Services Project Manager, Product Delivery Manager, and a Implementation Services Engineer(s), to accelerate your adoption of HashiCorp's Terraform Cloud product.

Methodology

Our FastTrack Project Approach is a proven and successful method providing focus and direction of the deployment and adoption of Terraform Cloud, using reference architectures and best practices. Our Fundamental package includes team collaboration during active working sessions focused on configuration and adoption use cases.

We begin with a team **Technical Planning** to get an understanding of your current environment and goals for your product configuration and adoption so we can focus the **Implementation Sprint** around the prioritized scope of the engagement.

Weeks 1-2

Technical Planning | **Sprint 1**

Planning
- Identify Product Integration, Config, Adoption Goals
- Product Integrations
- Identify Prerequisites

Configuration
- Version Control System
- Single Sign On
- Cost Estimation
- Cloud Agents

Adoption
- Workspace Creation
- Cloud Credential Mgt
- Private Module Registry
- VCS or CLI-driven Workflow
- Sentinel Git Repository Connection

Deliverables

At the completion of the engagement, your Terraform Cloud product will be configured and deployed following proven best practices from the HashiCorp team. At the **Project Completion**, the Project Delivery Document detailing the customer specific installation, configuration, and adoption of the product will be provided and your HashiCorp journey continues with our Customer Support team. Upon completion of the project, The Customer team is expected to have gained the knowledge and skills required to continue maintaining any custom code provided during the engagement.

Project Governance

The Terraform Cloud Fundamental package includes two (2) consecutive business weeks, scheduled over full calendar weeks with the project schedule agreed to prior to beginning. In addition, all prerequisites must be completed prior to beginning.
