HCP Vault
FastTrack Fundamental Project

▼ **Vault**

2 week engagement

The Team

Project Manager

Delivery Manager

Engineer

Certified Partner

With a FastTrack program package, you will **collaborate with a skilled and trusted team** of HashiCorp staff and Certified Partners, including a Services Project Manager, Product Delivery Manager, and a Implementation Services Engineer(s), to accelerate your adoption of HashiCorp's HCP Vault product.

Methodology

Our FastTrack Project Approach is a proven and successful method providing focus and direction of the deployment and adoption of HCP Vault, using reference architectures and best practices. Our Fundamental package includes team collaboration during active working sessions focused on deployment, configuration, and adoption use cases.

We begin with a team **Technical Planning Sprint** to get an understanding of your current environment and goals for your product deployment, configuration and adoption so we can focus the **Implementation Sprints** around the prioritized scope of the engagement.

Weeks 1-2

Technical Planning Sprint	Sprint 1	Project Completion
Planning • Identify Product Config, Adoption Goals • Design Integrations • Prioritize Use Cases • Identify Prerequisites	**Configuration** • HashiCorp Virtual Network (HVN) • Connect HVN to AWS • HCP Vault Cluster • Administrative Authentication	**Adoption** (1) Use Case May Include: • Secrets Engine • Authentication Method

---

Deliverables

At the completion of the engagement, your HCP Vault product will be configured and deployed following proven best practices from the HashiCorp team. At the **Project Completion**, the Project Delivery Document detailing the customer specific installation, configuration, and adoption of the product will be provided and your HashiCorp journey continues with our Customer Support team. Upon completion of the project, The Customer team is expected to have gained the knowledge and skillset required to continue maintaining any custom code provided during the engagement.

Project Governance

The HCP Vault Fundamental package includes two (2) business weeks of projectized effort, scheduled over a full calendar week and project scheduled agreed to prior to beginning. In addition, all prerequisites must be completed prior to Sprint 1 beginning.
