

FastTrack Premium Project

6 week engagement

The Team

Project Manager

Delivery Manager

Engineer

Certified Partner

With a FastTrack program package, you will **collaborate with a skilled and trusted team** of HashiCorp staff and Certified Partners, including a Services Project Manager, Product Delivery Manager, and a Implementation Services Engineer(s), to accelerate your adoption of HashiCorp's Consul product.

Methodology

Our FastTrack Project Approach is a proven and successful method providing focus and direction of the deployment and adoption of Consul, using reference architectures and best practices. Our Premium package includes team collaboration during active working sessions focused on deployment, configuration, and adoption use cases.

We begin with a team **Technical Planning Sprint** to get an understanding of your current environment and goals for your product deployment, configuration and adoption so we can focus the **Implementation Sprints** around the prioritized scope of the engagement. The Consul Premium allows additional time over and above the Standard offering to drive adoption with some of our more advanced use cases.

Week 1*	Weeks 2-3*	Weeks 4-5*	Week 6
Technical Planning Sprint	Sprint 1	Sprint 2	Sprint 3

Deliverables

At the completion of the engagement, your Consul product will be configured and deployed following proven best practices from the HashiCorp team. At the **Project Completion**, the Project Delivery Document detailing the customer specific installation, configuration, and adoption of the product will be provided and your HashiCorp journey continues with our Customer Support team. Upon completion of the project, The Customer team is expected to have gained the knowledge and skill set required to continue maintaining any custom code provided during the engagement.

Project Governance

The Consul Premium package includes six (6) business weeks of projectized effort, each Implementation Sprint scheduled over a full calendar week and project scheduled agreed to prior to Sprint 1 beginning. In addition, all prerequisites must be completed prior to Sprint 1 beginning.

*Up to two (2) weeks between sprints can be accommodated as needed.
