Sentinel Beginner
ExpertTrack Fundamentals Project

Terraform

2 week engagement

The Team

Project Manager
Delivery Manager
Engineer
Certified Partner

With an ExpertTrack program package, you will collaborate with a skilled and trusted team of HashiCorp staff and Certified Partners, including a Services Project Manager, Product Delivery Manager, and a Implementation Services Engineer(s), to accelerate your adoption of HashiCorp's Vault product.

Methodology

Our ExpertTrack Project Implementation approach is a proven and successful method for getting started with the adoption of Sentinel Policy as Code using best practices. Our Sentinel Beginner package includes team collaboration during active working sessions focused on enablement, configuration, and adoption of Sentinel.

We begin with a team **Technical Planning** to get an understanding of your current environment and goals for Sentinel adoption to focus the **Implementation Sprint** around the prioritized scope.

Weeks 1-2

Technical Planning	**Sprint 1**
Planning	**Adoption**
• Discover environment details and Sentinel Goals • Enablement of Sentinel features and common patterns • Identify required prerequisites	• Prepare environment for Sentinel and its' repository • Implement up to five (5) Sentinel Policies organized in one or more Policy Sets • Enable Sentinel Policy testing leveraging the Sentinel CLI • Apply Sentinel Policy to an existing Workflow

---

Methodology

At the completion of the engagement, your Terraform product will be configured following proven best practices from the HashiCorp team. At the Project Completion, the Project Delivery Document detailing the customer specific configuration and adoption of the product will be provided and your HashiCorp journey continues with our Customer Success team. The Customer team is expected to have gained the knowledge and skills required to continue maintaining any custom code provided during the engagement.

Project Governance

The ExpertTrack Fundamentals package is two (2) consecutive business weeks, scheduled over full calendar weeks with the project schedule agreed to prior to beginning and the completion of all prerequisites.
