

CHEAT SHEET

Do cloud right

While cloud adoption is nearly universal — 94% of organizations have embraced it across most or all of their business — only 20% report achieving full ROI. Why? Operational inefficiencies, security risks, and fragmented tooling continue to challenge cloud success. The **Do cloud right** white paper from HashiCorp introduces **The Infrastructure Cloud**, a unified, lifecycle-driven solution to streamline operations, boost security, and maximize returns across hybrid, multi-cloud, and on-prem environments.

The problem: why cloud ROI falls apart

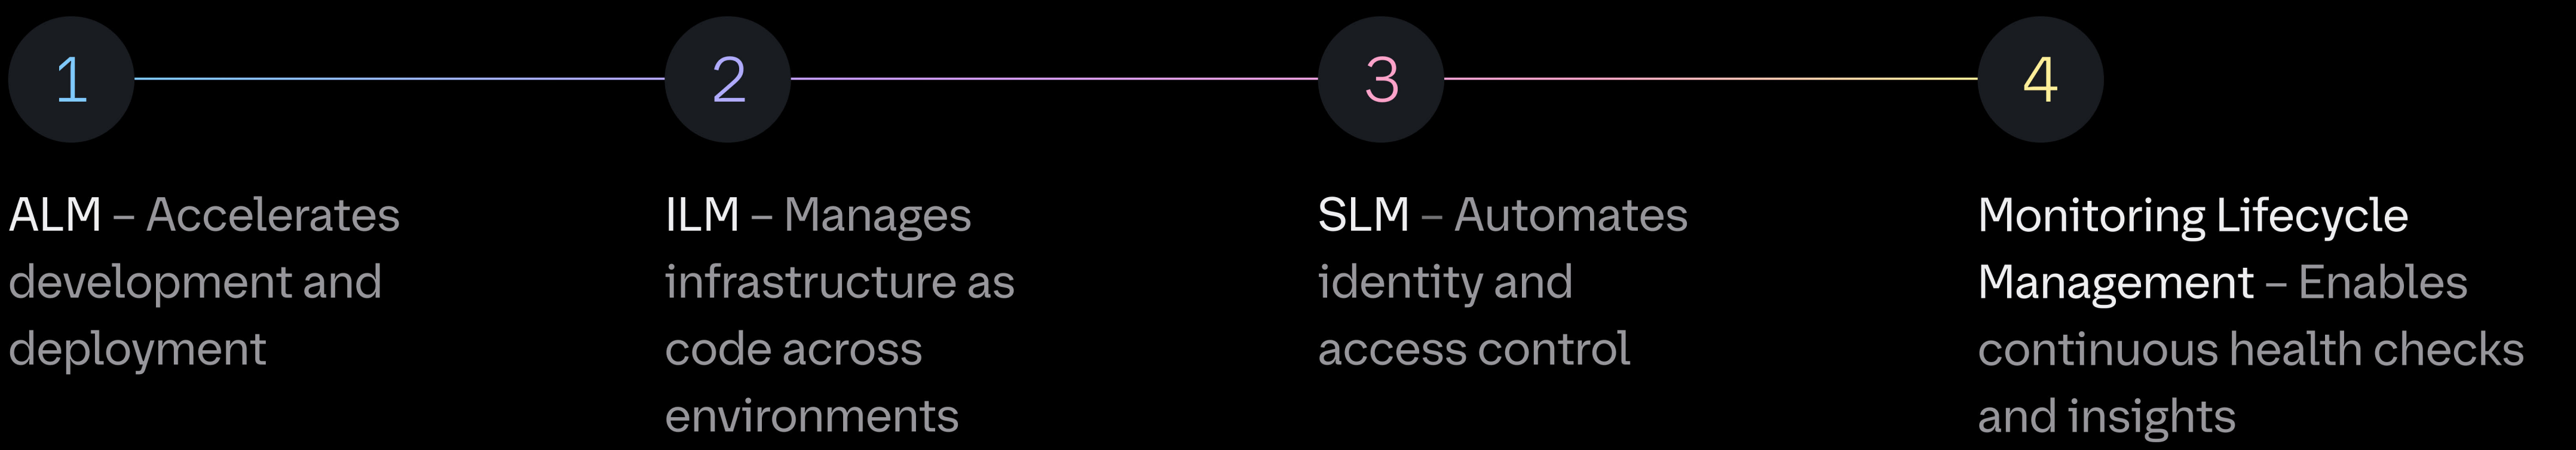

Rethinking the cloud operating model

Organizations often treat the Day 2+ processes of Infrastructure Lifecycle Management (ILM) and Security Lifecycle Management (SLM) as afterthoughts	Success requires building out ILM and SLM as core components that are as important as Application Lifecycle Management (ALM)	Outcome: Improved scalability, security, and operational efficiency from Day 0, Day 1, and Day 2+
--	---	--

Doing cloud right: 2 key principles

Standardized workflows  <ul style="list-style-type: none">Automate provisioning, access, and governanceAlign infrastructure, security, and development from the start	A unified platform  <ul style="list-style-type: none">One system of record for infrastructure and securitySimplifies audit, governance, and team collaboration
--	--

4 lifecycle phases for cloud success

Business value of a unified cloud platform

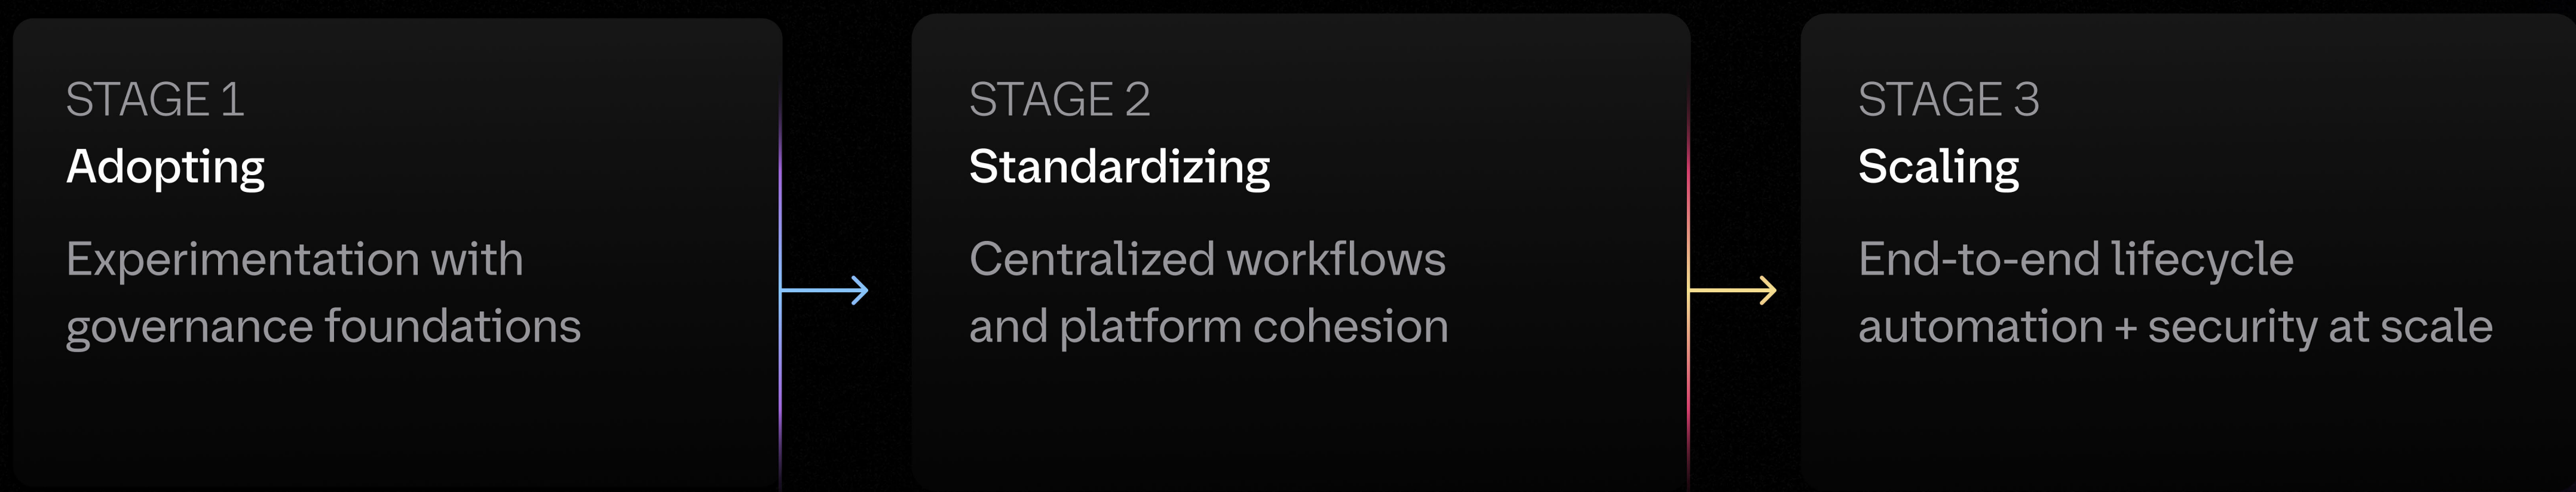

ILM in action: Infrastructure that scales

 Terraform Infrastructure as code provisioning across cloud vendors	 Packer Image automation and lifecycle management	 Waypoint Developer workflows abstracted from infra/security complexity	 Nomad Multi-tenant workload orchestration across any environment	 Sentinel Policy as code enforcement
---	---	---	---	--

SLM in action: Security that moves at speed

 Vault Centralized machine identity, encryption, and secrets management	 Boundary Secure, just-in-time remote access	 Consul Identity-based service networking and automation	 Sentinel Policy as code enforcement
---	--	--	--

Cloud maturity blueprint

Ready to unlock the full ROI of your cloud investments?
