

THE GABAYAN STANDARD OF CARE

By **Ashleigh Cahn**

In a city defined by excellence, Dr. Arash “Ari” Gabayan and Dr. Afshin Eli Gabayan have established the definitive new standard for health and longevity. These globally recognized, board-certified physicians lead one of the most prestigious medical entities in the world, serving as Medical Directors and leading practitioners at both the Beverly Hills Cancer Center and the Beverly Hills Concierge Health Center.

The Gabayan brothers bring an unparalleled dual expertise to their patients: guiding individuals through the most critical diagnoses while simultaneously curating bespoke programs for peak performance and long-term vitality.

ACADEMIC RIGOR MEETS CLINICAL MASTERY

The foundation of their practice is built on an elite academic pedigree. Dr. Ari, a world-renowned radiation oncologist, graduated Summa Cum Laude from UCLA before earning his medical degree from the David Geffen School of Medicine at UCLA and serving as Chief Resident at the University of Arizona. In parallel, Dr. Eli, an expert in hematology and medical oncology, completed his MD at the Keck School of Medicine of USC, followed by a Chief Residency at UCLA and a fellowship at Cedars-Sinai Medical Center. This shared training ensures that every patient benefits from medical brilliance rooted in the rigor of top-tier academia.

THE PINNACLE OF PRECISION MEDICINE

As Medical Directors of the Beverly Hills Cancer Center, the Gabayans are synonymous with next-generation oncology. Their leadership provides patients with access to state-of-the-art treatment, including advanced radiotherapy, targeted therapies, innovative clinical trials, and rapid diagnostic workups. They understand that when it comes to a cancer diagnosis, time is everything, and they have structured the center to deliver comprehensive care under one roof, eliminating the stress and delays of navigating multiple facilities.

DR. ARASH “ARI” GABAYAN

CONCIERGE MEDICINE, REDEFINED
