# October Gardening Calendar

Approximate dates and gardening activities:

***Now is the time for clean up!***

- October 7 - Deciduous trees are going to start dropping leaves so get those gloves and rakes out
- October 9 - It's time to pull out your tomatoes and peppers and replant with either cover crops or winter vegetables
- October 15 - Winter veggies are cabbage, cauliflower, Brussel sprouts, kale, and spinach
- October 16 - Cover crops are fava beans, alfalfa, and or clover
- October 19 - Final feeding for all garden - E.B. Stone Organics Ultra Bloom Plant Food
- October 21 - Don't end up with picked over pumpkins for Halloween and fall décor. We have a great selection and now is a great time with the weather cooling to start decorating your home. Fertilize fruit trees before winter. Fertilizing citrus can help with leaf yellowing in the winter
- October 22 - Bring in flowers for fall through spring like primrose, pansies, snapdragons, Chrysanthemums, and cyclamen
- October 26 - Deadhead roses and other flowers
- October 29 - Last feeding for your lawn
- October 31 - Start to plan where to plant bulbs in November
