

## April Gardening Calendar

### Approximate Dates & Gardening Activities:

#### Early April

- Remove any cold-weather flowers that have faded with the heat. Summer annuals are available now!
- Plant your shade trees now, so they can begin to get established before it gets too hot!
- It's aphid season. Spray your roses and flowering plants with Bonide Captain Jack's Tomato & Vegetable 3-in-1 RTU spray.
- Install a drip irrigation system now, so your plants get the water they need—especially throughout the summer, when hand-watering is the least effective method to support your plants.

#### Mid-April

- It's time to plant veggies and herbs that like it hot, such as squashes, watermelons & more!
- Cacti are blooming! We have a variety of beautiful low-water desert plants to choose from.
- Check your watering system for clogged drippers and torn lines, so that your system is watering as desired before our warm weather hits!

#### Late April

- Add iron and nitrogen to soil to stave off the yellowing of plants.
- Transition to your summer lawn with Bermuda Grass Seed.
- Apply Pre-Emergent weed controls to prevent summer weeds!
