

The text 'Our Story' in a large, white, serif font, positioned over a background of a wooden pillar and a colorful abstract painting.

Our Story

We are leaders in our field

Moalem Weitemeyer is a dedicated Danish corporate law firm with strong international relations. We operate an experienced Disputes & Investigations team that supports our Corporate team. We have all the legal support areas required to deliver first-in-class advice to our clients across any sector and industry.

We have a reputation for creating novel and innovative legal solutions, and we are always available to our clients. We take pride in visiting our clients instead of (video) calling them, and in (video)calling our clients instead of emailing them. We believe that client relations are best developed and maintained by a continual investment of our time and genuine interest in understanding our clients' legal landscape.

We create solutions to complex issues. Top decision makers are often required to take a holistic view on issues, also legal issues. We train our attorneys to be trusted advisors to top decision makers. Consequently, we do not believe in early specialization for our attorneys. Our attorneys receive a broad education with individual development of key competences relevant to our clients.

We have an extensive secondment programme with leading law firms worldwide as well as with several of our clients, which provides our attorneys with the opportunity to learn even more about the specific businesses as well as the legal and commercial needs of our clients. While this strengthens the professional and international skills of the individual attorney, it also enables our Firm to remain professionally updated on the international developments in a globalized world.

We attribute a great deal of our success to our strong firm culture and values. We are competitive, but in a healthy way – and never towards each other. Our remuneration system is based on the lock-step model for all employees, which creates an equal compensation system.

We take an active part in our community, and we support organizations committed to creating a better, safer and more sustainable world, domestically and on a global scale. As a member of the United Nations Global Compact, we remain committed to making an active effort to advance the fundamental freedom rights and do our part to safeguard the environment.
