## AI ORGANIZATION & GOVERNANCE

Responsible AI transformation: lead your organization to sustainable and ethical innovation

The adoption of AI not only offers opportunities, but also brings responsibilities, risks, and challenges. **Ownership and responsible use of AI require adapting your organizational model and governance structures as well as managing risks. This way, you can ensure your organization has a future with confidence and control over the use of AI.**

### RESILIENT ORGANIZATION: AI IN A CHANGING FUTURE

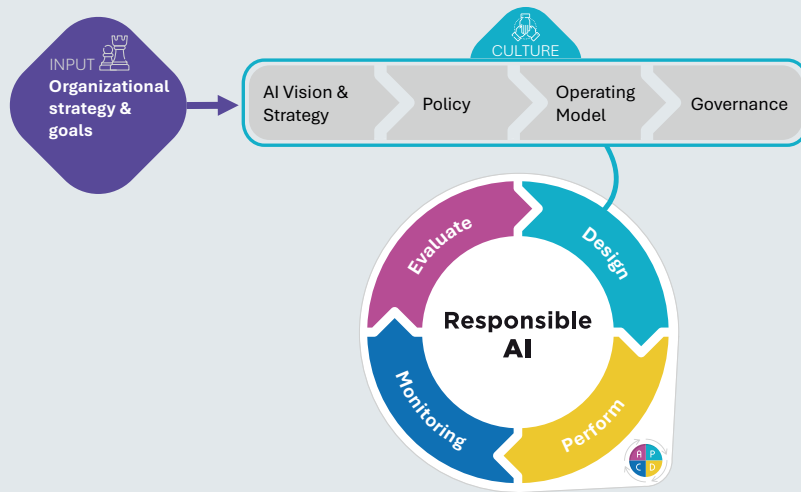

A holistic approach provides grip and control over the AI initiatives and enables you to get maximum value from data and AI. This stimulates the culture of human-centric data- and AI-driven decision-making, increases employee satisfaction, and promotes the balance between people, planet and prosperity.

### WHY CHOOSE THE AI ORGANIZATION & GOVERNANCE PROGRAM?

Our program helps your organization successfully and responsibly integrate AI technologies through clear guidelines and a structured approach:

- **Responsible AI framework:** Six pillars to implement AI responsibly in the organization.
- **Effective use of AI:** Ensure that AI contributes to the realization of strategic goals.
- **Strategic objectives:** Determine with whom and how you will achieve the organizational objectives.
- **Ownership:** Unambiguous assignment of responsibilities and ownership.

# CONCLUSION AI 360
