APPLICATION INSTRUCTION PARKOUR

ATTENTION

Check the product before application. Any defect should be claimed at this stage

Application of the product implies acceptance of the same

Please note that small dark marks may occur on the surface of the perforated wallcoverings

This is a natural result of the printing process. After painting the marks will be completely covered and no longer visible

SURFACE PREPARATION

The surface must be perfectly dry, clean and stable

Remove old wall-coverings which could come off

In case of highly absorbent walls, it is recommended to treat the surface with GAVADES adhesive diluted with 50% water

APPLICATION

Prepare the fabric according to the pattern and allow for 5-10 cm in excess of the height of the wall

Spread GAVADES diluted with 10% water uniformly on the wall by means of a roller

Apply the fabric and press with a trowel from the center to the edge to eliminate air bubbles and to improve adherence

Join the fabric rolls side by side without overlapping them

Trim the exceeding fabric using a cutter

FINISHING AND PAINTING

When the glue is dry apply two layers of paint

It is recommended to use acrylic paints: satin, mat, gloss or metallic

For the perforated designs SEQUENCE, LABIRINTH, TWIST: after painting brush up on the whole surface using a short-haired roller to obtain a better finish

Suitable colours and finishing techniques offer a wide range of decorative effects in order to achieve a rich variety of harmonious patterns for any environment
