Welcome VISIA Skin Analysis.....WHAT IS VISIA?

The **VISIA** will scan your **skin**, looking at its strengths and weaknesses. **VISIA** scans measure your **skin** pigmentation, pore size, and porphyrins (evidence of bacteria lodged in pores). It also scans UV spots, sun damage, texture, and wrinkles. This allows us to help you create a highly customized plan that will specifically target your skin care needs. This can also be repeated after a treatment to see the benefits beyond the surface of the skin! Call to schedule your consultation today! (315) 737-6230
