

Senior Solution Architect (Customer Implementation)

Description

MATTR is a fast-moving organisation operating in a new market category of verifiable data and digital trust. We do this through SaaS platform offerings that provides enterprise grade decentralised identity capabilities that support the needs of traditional organisations and a new set of web3 companies designing ground up for a decentralised future.

The MATTR Platform is designed for global scale. As a **Solution Architect**, you will be part of the team who are creating the MATTR platform and helping to establish MATTR as a leader in the world of digital trust.

We are looking for someone to work with our customers understanding and interpreting their business needs and drivers and matching those with our cutting-edge solutions

You will become a subject matter expert in decentralised identity, engaging with the standards community, and ensuring our solutions are delivering value to our consumers and contribute to open source and evolving standards.

You will collaborate with internal subject matter experts and engineers to develop innovative customer solutions and proposals leveraging MATTR capabilities to address customer needs and educate customers on the value proposition of MATTR solutions

LOCATION – Auckland or Wellington - central business district

What you will be doing

You will

- Lead customer meetings and translate business requirements and journey's into e2e designs that involve many software components and points of integration
- Build relationships and with customer architects and IT staff to develop confidence in the MATTR solutions
- Represent MATTR solutions to customers, partners and develop or contribute to customer-facing artefacts such as whitepapers, videos and proof of concepts
- Elaborate solution options & choices, technology decisions and develop solution overviews, high-level designs and implementation plans and present to non-technical stakeholders in manner that can be easily understood
- Assist with customer onboarding to the platform and help triage customer problems

- Participate in the sales process, creating presentations, case studies, demonstrations, and proof of concepts and respond to functional, non-functional and technical elements of RFIs/RFPs
- Contribute to open source and evolving standards in the digital identity space
- Depending on customer need, sometimes be required to work in our customers timezone

What are the skills and requirements needed?

You will

- Customer Delivery and / or sales experience
- Have 5+ years' experience working as a Solutions Architect breaking down challenges into component parts and representing them into fit for purpose and solutions that are easy to digest and understand
- Experience designing highly available, resilient, performant and secure solutions that deliver customer outcomes
- Can take a complex technical design involving multiple components and delivery partners and develop an implementation plan (design and build)
- Can think holistically, pulling ideas and concepts together from customer discussions and answer not only the challenge presented but identifying other areas that may not have considered
- Have excellent presentation skills and be comfortable speaking with Executives, IT Management, developers
- Great written and verbal communication, organisational and multitasking skills
- Ability to adapt to new technologies and learn quickly
- Be able to own a relationship with a customer and ensure their outcomes are delivered and participate
- Ability to cope with very high peak workloads, short deadlines and significant pressure and manage priorities and maintain engagement across a number of projects at various lifecycle phases

Personal and work ethics

- You are a self-starter who takes initiative, is creative, has high energy, and would thrive in a very dynamic software company.
- You are a team player who is eager to share their findings and contribute to a collective understanding – someone who is super smart and committed to making a difference - but won't trip over their ego when they turn around!
- You are comfortable with ambiguity, great at solving problems and be capable of getting thing done

- You are collaborative in style and pragmatic in approach, but you won't be afraid to make decisions where necessary to ensure quality, timely outcomes for MATTR and its customers

Advantageous

- Have experience in customer commercial engagements. Preparing and responding to RFP's and the like
- Awareness of Self-Sovereign-Identity, Decentralized Identifiers and the Web of Trust ecosystem
- Experience building SaaS services & products and in particular pre-sales activity
- Have familiarity with architectural, IT and security frameworks, compliance and standards (e.g. TOGAF, UML, ITIL, ISO, SOC2, NIST etc.).

What's in it for you?

The chance to be part of MATTR, to be surrounded by like-minded peers with no ego's, an attractive salary and flexible working arrangements, and a company that lives and breathes its values every day.
