

Menu of Plastic Surgeries

Face

Face Lift: *Tightens and refreshes a patient's facial appearance, addressing forehead lines and wrinkles, frown lines, smile lines, crow's feet, marionette lines, hollows under eyes, and droopy eyes.* **11,000+**

Neck Lift: *Improves visible signs of aging in neck and jawline, addressing a double chin, sagging jowls, a turkey wattle, creases or bands in the neck, fatty tissue deposits, a soft jawline and sagging skin.* **9,000+**

Face/Neck Lift: *Designed to restore the youthful contours of the face and address a sagging neck and jawline. Includes tightening of the facial and neck muscles, facia, as well as the lifting and removal of any excess skin.* **12,500+**

Brow Lift: *Raises the eyebrows and eliminates deep creases, furrows and frown lines that form between the brows and along the forehead.* **3,500+**

Upper Eyelid Blepharoplasty: *Removes upper eye puffiness and reduces the amount of excess skin surrounding the eyes.* **3,500+**

Lower Eyelid Blepharoplasty: *Eliminates under-eye bags and reduces the amount of excess skin surrounding the eyes.* **6,750+**

Earlobe Repair: *Corrects stretched, split or torn earlobes.* **1,350+ for each ear**

Otoplasty: *Improves the shape, position or proportion of the ears, bringing balance to the face.* **6,500+ for bilateral**

Ear Pinning: *A procedure typically selected when ears are too large or protrude from the sides of the head. Cartilage is shaped and sculpted to create a more attractive facial silhouette.* **6,750+ for bilateral**

Breast

Breast Augmentation with Implants: *A surgical revision of the breasts to make them larger, improve symmetry and provide increased fullness. The augmentation is made possible using silicone or saline-filled implants.* **8,500+**

Breast Augmentation with Fat Transfer: *Breast augmentation using liposuction to take fat from other parts of the body. Often the best option for women looking for a relatively small increase in breast size.* **9,500+**

Breast Reduction: *Removes excess fat, tissue and skin from the breasts. Surgery eases discomfort from large breasts or achieves a breast size proportionate to a patient's body.* **9,500+ sometimes covered by insurance**

Breast Lift: *Elevates and re-contours breasts, eliminates excess skin, and reduces the size of the areola if necessary.* **9,500+**

Breast Implant Removal and Replacement: *Often performed to change the size or material of implants, address changes to the breast tissue caused by weight gain or loss, or correct complications like a rupture or deflation.* **9,500+**

Breast Implant Removal with Lift: *Combining implant removal with a breast lift will tighten loose skin and restore breast tissue to a youthful position.* **10,000+**

Gynecomastia Surgery: *Male breast reduction, also known as gynecomastia, is used to remove excessive breast tissue to achieve a smaller breast size.* **7,000+**

Menu of Plastic Surgeries

Body

Abdominoplasty (Tummy Tuck): <i>Removes excess skin from the abdomen and eliminates stubborn pockets of extra fat that don't respond to diet or exercise. Procedure is best for patients who are already at or near their target weight.</i>	10,000+
Brachioplasty: <i>Arm lift, also referred to as brachioplasty, is a procedure used to remove excess skin and tighten and tone the upper arm.</i>	9,000+
Lipo-abdominoplasty: <i>Surgery that combines liposuction with a tummy tuck to remove loose skin, tighten abdominal muscles, and treat excess fatty pockets.</i>	11,000+
Mini Lipo-abdominoplasty: <i>A lipo-abdominoplasty on a smaller scale. Most effective for patients within their recommended weight range.</i>	8,500+
Liposuction to Small Areas (chin, bra rolls, mons pubis, etc.): <i>Removes unwanted fat beneath the skin to treat bra bulges, sculpt the chin, reduce sagging skin from the mons pubis, and more.</i>	4,500+
Labioplasty: <i>Improves the appearance and functionality of genitals, addressing a lengthened or asymmetrical labia, cosmetic or physical discomfort, relaxed muscle tissue, loss of muscle tone or tightness, or unsatisfying intimate experiences.</i>	3,500+
Skin Lesion Removal: <i>Quick, effective, and painless removal of skin growths.</i>	1,500+ may be covered by insurance
Skin Tag Removal: <i>Requiring only local anesthetic, skin tag removal is painless and performed with precision to minimize scarring.</i>	1,200+
Scar Revision: <i>Clears skin of acne scarring, irregular scars, itching or painful scars, and scars from injury.</i>	1,500+
