of the Safety Committee shall take action to implement the
recommendations.

CHAPTER V

Hours of Work and Annual Leave with Wages

18. Conditions for exemption of workers from weekly and compensatory holidays under sub-section (2) of section 26.

(1) For the purpose of section 26, there shall be posted up in a conspicuous place outside the office of every establishment a notice showing the weekly day of rest. Where the weekly day of rest is not the same day for all persons employed in the establishment, the notice shall show the day of rest allowed to each relay, or set of persons or individual.

(2) Except in the case of worker engaged in any work which for technical reasons must be carried on continuously throughout the day, the compensatory holidays to be allowed under sub-section (3) of section 26 of the Code shall be so spaced that not more than two compensatory holidays are given in one week.

(3) The manager of the establishment shall display, on or before the end of the month in which holidays are lost, a notice in respect of workers allowed compensatory holidays during the following month and of the dates thereof, at the place at which the notice of periods of work prescribed under section 26 is displayed. Any subsequent change in the notice in respect of any compensatory holiday shall be made not less than three days in advance of the date of that holiday.

(4) Any compensatory holiday or holidays to which a worker is entitled shall be given to him before he is discharged or dismissed and shall not be reckoned as part of any period of notice required to be given before discharge or dismissal.

19. The total number of hours of overtime under second proviso of section 27.

(1) In pursuance of section 27 of the Code, where in an establishment a worker works for more than eight hours in any day or for more than forty-eight hours in any week, as the case may be, he shall in respect of such overtime work be entitled to wages at the rate of twice his ordinary rate of wages and shall be paid at the end of each wage period.

- xi. exceptional press of work and engaged in any work, which is notified by the Central Government/Government of Jammu and Kashmir in the Official Gazette as a work of national importance :

Provided that no worker shall be allowed to work overtime exceeding one hundred twenty five hours in any quarter of a year.

20. Circumstances for exemption from restriction on double employment in a factory under section 30. The Government of Jammu and Kashmir may in exceptional cases as it deem proper exempt any establishment or any person on double employment under this section by notification in Official Gazette assigning full justification of such order/ notification.

21. The form and notice and manner of display of such notice and the manner in which such notice shall be sent to the Inspector-cum-Facilitator under sub-section (2) of section 31. The notice referred to in sub-section (2) of section 31 shall be displayed at conspicuous places on a notice board or electronic board and maintained in Form-VII and copy of such notice shall be sent to Inspector-cum-Facilitator electronically or otherwise or by registered post.

CHAPTER VI

Maintenance of Registers, Records and Returns

22. The form and register and particulars of workers under clause (a) of section 33. (1) Every employer shall maintain register of workers, wages, overtime, fine, deduction for damage or loss in Form-VIII electronically or otherwise and shall be kept available at an office or the nearest convenient building within the precincts of the establishment.

- (2) (i) in case of manual registers and other records, be legibly entered in ink in English and Hindi/Urdu or the language understood by a majority of the persons employed ;

- (ii) The register mentioned in clause (i) shall be preserved for a period of two years after the last entry in them has been made and shall not be destroyed even after the expiry of that period unless it has been properly transferred to the new register.

CHAPTER VII

Inspector-cum-Facilitator and other Authority

25. The qualification and experience of Chief Inspector-cum-Facilitator under sub-section (5) of section 34.ô The Government of Jammu and Kashmir may appoint an officer not below the rank of Labour Commissioner as Chief Inspector-cum-Facilitator for the whole Territory of Jammu and Kashmir under the provisions of this Code.

26. The manner of taking samples of any article or substance found in any premises and air of atmosphere under clause (x) of sub-section (1) of section 35.ô An Inspector-cum-Facilitator shall take samples or substances in an establishment as per the inspection scheme mandated under Official Portal of Labour Department after informing the employer of the establishment, taken in the manner herein after providing a sufficient sample of any substance used or intended to be used in the establishment such use beingô

- (a) in the belief of the Inspector-cum-Facilitator in contravention of any of the provisions of this Code or the rules made thereunder ; or
- (b) in the opinion of the Inspector-cum-Facilitator likely to cause bodily injury to, or injury to the health of employee in the establishment.

27. The other powers and duties under clause (xiv) of sub-section (1) of section 35.ô (1) Inspector-cum-Facilitator shall, after every inspection, as may be deemed necessary, issue prohibition or improvement notice in the Form-XII pointing out the non-compliance of provisions of safety, health and working conditions under the Code, and rules and regulations framed thereunder, to the employer or occupier or owner or manager or their agent.

(i) 20001 and above contract labour	Rs. 40000

40. Manner of applying for the renewal of licence and the manner of renewal of licence under sub-section (3) of section 48.ô

(1) Every contractor shall apply electronically on the Official Portal of Labour Department (www.jklabour.com) of Jammu and Kashmir Government to the licensing authority for renewal of the license.

34 The J&K Official Gazette, 9th Feb., 2021/20th Magha, 1942. [No. 45-a
of change of employer by the inter-state migrant worker during
the middle of the employment period and has not availed the
journey allowance from his previous employer, then on the basis
of a certificate to be given by inter-state migrant worker, the
employer where the inter-state migrant worker is now working
and the such worker has completed one hundred and eighty days
in preceding twelve months including the period spent with the
previous employer, then the employer shall give journey
allowance.

51. Manner of providing facility of toll free helpline under section 63 . A Toll Free helpline number shall be provided by the Labour and Employment Department, Government of Jammu and Kashmir, to address queries and grievances of the inter-state migrant workers.

52. Manner of providing for study of inter-state migrant workers under section 64. The Government of Jammu and Kashmir may identify the fields where studies are to be carried out to promote safety, health and welfare of inter-state migrant workers. Wherever required the Government of Jammu and Kashmir may also consult the Central Government or expert organizations involved in the safety, health and welfare of inter-state migrant workers.

53. Authority to whom a copy of the agreement shall be forwarded by the producer under sub-section (3) of section 66. The Jammu and Kashmir Government may notify an officer not below the rank of Assistant Labour Commissioner as Authority for the purpose of these rules. The form of agreement for the audio visual workers with the producer shall be given in Form-XVI.

54. Details under clause (vii) of sub-section (4) of section 66. The procedure for reference of dispute to the Conciliation Officer or an Industrial Tribunal shall be in conformity with the Industrial Relations Code, 2020 and rules framed thereunder.

55. Rules in respect of factory or class or description of factories under sub-section (1) of section 79. The Government or the Chief Inspector-cum-Facilitator may require for the purposes of the Code, submission of plans of any factory which was either in existence on

No. 45-a] The J&K Official Gazette, 9th Feb., 2021/20th Magha., 1942. 35
the date of the commencement of these rules or which had not been
constructed or extended since then. Such plans shall be drawn to scale
showing : ô

- (a) the site of the factory and immediate surrounding including adjacent buildings and other structures, roads, drains, etc. ;
- (b) the plan, elevation and necessary cross-sections of the factory buildings indicating all relevant details relating to natural lighting, ventilation and means of escape in case of fire, and the position of the plant and machinery, aisles and passage ways ; and
- (c) such other particulars as the Government or the Chief Inspector-cum-Facilitator, as the case may be, may require.

56. Mode of submission of application under sub-section (2) of section 79. (1) No building shall be constructed or used as factory unless plans in respect of such building are approved by the Chief Inspector-cum-Facilitator.

(2) No addition/alteration or extension in the existing factory building shall be made unless plans in respect of such additions, alterations or extensions are approved by the Chief Inspector-cum-Facilitator.

(3) Application for approval of the plans shall be made electronically in Form-XX along with the following plans and documents to the Inspector-cum-Facilitator of the area :ô

- (a) Flow chart of the manufacturing process giving a brief description of the process in its various stages ;
- (b) Site plan drawn to scale showing the site of the factory and immediate surroundings including adjacent buildings and other structures, roads, drains, etc. ;
- (c) The plan, elevations and necessary cross-sections drawn to scale showing all relevant details relating to natural lighting, ventilation, and means of escape in case of fire, position of plant and machinery, aisles and passage ways ;
- (d) Such other particulars as the Inspector-cum-Facilitator may require in relation to the approval.

No. 45-a] The J&K Official Gazette, 9th Feb., 2021/20th Magha., 1942. 37
Form-XXI signed by a competent person in respect thereof has been sent
by the occupier or manager of the factory to the Chief Inspector-cum-
Facilitator and accepted by him.

No person except in the case of building owned by any Government shall be authorized to sign a certificate of stability or to certify plans and specifications who is in the employment of the owner or builder of the building in respect of which the certificate is given.

(9) The employer seeking registration for a factory and grant of a licence shall apply electronically on the official Portal of the Labour Department (www.jklabour.com), Government of Jammu and Kashmir by giving details about the factory as specified in the Form-IA. The Form shall be signed digitally or in any other manner as may be required on the portal. The applicant shall be responsible for veracity of all information submitted in the application :

Provided that the occupier of the premises in use as a factory on the date of commencement of these rules shall submit such an application within thirty days from the commencement of these rules.

(10) A registration certificate for a factory shall be granted in Form-XXII by the Chief Inspector-cum-Facilitator or any other officer appointed and specially empowered in this behalf by the Chief Inspector-cum-Facilitator electronically immediately, if the application is complete in all respects but not later than seven days from the date of submission of complete application, failing which such license shall be deemed to have been issued and the license shall be auto generated :

Provided that in exceptional circumstances the Government of Jammu and Kashmir may, for such period, by notification, dispense with requirement of electronic registration, in respect of a factory or class of factories, or part or whole of Jammu and Kashmir, and submission of application in the form so provided, may be allowed.

(11) Every application for renewal, complete in all respects, shall be made on the portal of the Labour Department (www.jklabour.com) and shall be made not less than sixty days before the date on which the licence expires and if the application is complete in all respects, the renewal

38 The J&K Official Gazette, 9th Feb., 2021/20th Magha, 1942. [No. 45-a
 certificate shall be auto generated in Form-XXII and the same may be
 downloaded by the applicant from the portal :

Provided that if the application for renewal, complete in all respects,
 is not received within the time specified in sub-rule (11), the licence shall be
 renewed only on payment of a fee of twenty five per cent in excess of the
 fees ordinarily payable for the renewal of the licence.

(12) The fees for grant of licence shall be the same as for renewal
 of licence for one year and shall be as specified in the Schedules mentioned
 below :

- i. Manufacture of aerated water and processes incidental thereto ;
- ii. Electrolytic plating or oxidation of metal articles by use of an electrolyte containing acids, bases or salts of metals such as chromium, nickel, cadmium, zinc, copper, silver or gold ;
- iii. Manufacture and repair of electric accumulators ;
- iv. Glass manufacture ;
- v. Grinding or glazing of metals ;
- vi. Manufacture and treatment of lead and certain compounds of lead ;
- vii. Generation of gas from dangerous petroleum ;
- viii. Cleaning, smoothening or roughening etc. of articles by a jet of sand, metal shot, grit or other abrasive propelled by a blast of compressed air or steam ;
- ix. Liming and tanning of raw hides and skins and processes incidental thereto ;

- x. Carrying on of certain processes of lead and lead material in Printing Presses and Type Foundries ;
- xi. Manufacture of pottery and ceramics ;
- xii. Chemical works ;
- xiii. Manipulation of stone or any other material containing free silica ;
- xiv. Handling and processing of asbestos, manufacture of any article of asbestos and any other process of manufacture or otherwise in which asbestos is used in any form ;
- xv. Handling and manipulation of corrosive substances ;
- xvi. Processing of cashew nuts ;
- xvii. Compression of Oxygen and Hydrogen produced by the electrolysis of water ; Use of ovens and driers in factories ;
- xviii. Process extracting vegetable oils from oil cakes in solvent extraction plants ;
- xix. Manufacture and manipulation of manganese and its compounds ;
- xx. Manufacture or manipulation of dangerous pesticides ;
- xxi. Protection against hazards of poisoning arising from benzene ;
- xxii. Carbon disulphide plants ;
- xxiii. Manufacture or Manipulation of Carcinogenic intermediates ;
- xxiv. Operations involving High Noise levels ;
- xxv. Manufacture of Rayon by Viscose ;
- xxvi. Highly Flammable liquids and Flammable Compressed Gases ;
- xxvii. Operation in foundries.

No. 45-a] The J&K Official Gazette, 9th Feb., 2021/20th Magha., 1942. 45
Schedule B-I to Schedule B-XXVII, in respect of any worker, shall be kept readily available to the Inspector-cum-Facilitator and shall be preserved till the expiry of a period of one year after the worker ceases to be in employment of the factory.

59. Site Appraisal Committee under section 83. (1) The Government of Jammu and Kashmir may constitute a Site Appraisal Committee as and when necessary consisting of

- (i) the Chief Inspector of Factories who shall be its Chairman ;
- (ii) a representative of the State Pollution Control Board of the Government of Jammu and Kashmir ;
- (iii) a representative of the Department of Environment of the Government of Jammu and Kashmir ;
- (iv) a representative of the Local Government wing of the Department of Local Government Housing and Urban Development Department of the Government of Jammu and Kashmir ;
- (v) an expert in the field of occupational health ;
- (vi) a representative of the Department of Industries of the Government of Jammu and Kashmir ; and
- (vii) a scientist having specialised knowledge of the hazardous process which will be involved in the factory ; and
- (viii) any other person as deemed fit by the Government of Jammu and Kashmir.

(2) No member, unless required to do so by a court of law, shall disclose otherwise than in connection with the purposes of the Act, at any time any information relating to manufacturing or commercial business or any working process which may come to his knowledge during his tenure as a Member on this Committee.

- (3) i. Applications for appraisal of sites in respect of the industries covered under clause (za) of sub-section (1) of section 2 of the Code shall be submitted to the Chairman of the Site Appraisal Committee ;

No. 45-a] The J&K Official Gazette, 9th Feb., 2021/20th Magha., 1942. 47
ô ô
to obtain or develop information in the form of Material Safety Data Sheet
(MSDS) in respect of every hazardous substance or material handled in
the manufacture, transportation and storage in the factory. It shall be
accessible upon request to a worker for referenceô

- (i) Every such Material Safety Data Sheet shall include the following information :ô
- (a) The identity used on the label ;
 - (b) Hazardous ingredients of the substance ;
 - (c) Physical and chemical characteristics of the hazardous substance ;
 - (d) The physical hazards of the hazardous substance, including the potential for fire, explosion and reactivity ;
 - (e) The health hazards of the hazardous substance, including signs and symptoms of exposure and any medical conditions which are generally recognised as being aggravated by exposure to the substance ;
 - (f) The primary route(s) of entry ;
 - (g) The permissible limits of exposure prescribed in the Schedule-E of the Code, and in respect of a Chemical not covered by the said Schedule, any exposure limit used for recommended by the manufacturer, importer or occupier ;
 - (h) Any generally applicable precautions for safe handling and use of the hazardous substance, which are known, including appropriate hygienic practices, protective measures during repairs and maintenance of contaminated equipment, procedures for clean-up of spills and leaks ;
 - (i) Any generally applicable control measures, such as appropriate engineering controls, work practices, or use of personal protective equipment ;
 - (j) Emergency and first aid procedures ;

- (b) A list of hazardous processes carried on in the factory ;
 - (c) Location and availability of all Material Safety Data Sheets as per Rule 58 ;
 - (d) Physical and health hazards arising from the exposure to or handling of substances ;
 - (e) Measures taken by the occupier to ensure safety and control of physical and health hazards ;
 - (f) Measures taken by the workers to ensure safe handling, storage and transportation of hazardous substances ;
 - (g) Personal Protective Equipment required to be used by workers employed in hazardous or dangerous operations ;
 - (h) Meaning of various labels and markings used on the containers of hazardous substances as provided under Rule 58 ;
 - (i) Signs and symptoms likely to be manifested on exposure to hazardous substances and to whom to report ;
 - (j) Measures to be taken by the workers in case of any spillage or leakage of a hazardous substance ;
 - (k) Role of workers vis-à-vis the emergency plan of the factory, in particular the evacuation procedures ;
 - (l) Any other information considered necessary by the occupier to ensure safety and health of workers.
- (ii) The information required by sub-rule (i) shall be compiled and made known to workers individually through supply of booklets or leaflets and display of cautionary notices at the workplaces. The booklets, leaflets and the cautionary notices displayed in the factory shall be in the language understood by the majority of the workers and also explained to them ;
- (iii) The Chief Inspector-cum-Facilitator may direct the occupier to supply further information to the workers as deemed necessary.

- (iii) The occupier shall also furnish any other information asked for by the Chief Inspector from time to time for the purpose of this Code and Rules made thereunder.

(8) Emergency plan.ô

- i. The occupier of a factory carrying on a hazardous process shall prepare a draft on-site emergency plan and submit it to the Chief Inspector-cum-Facilitator. The Chief Inspector-cum-Facilitator may make such modification in the plan as necessary, in consultation with the occupier and approve the same ;
- ii. The occupier will submit a copy of the approved plan to the District Emergency Authority ;
- iii. The occupier will intimate the workers the provisions of the emergency plan and hold rehearsals of the plan periodically. He shall review the plan from time to time and make necessary changes therein under intimation to the Chief Inspector-cum-Facilitator and the District Emergency Authority ;
- iv. The Chief Inspector-cum-Facilitator may issue guidelines relating to formulation of emergency plans. He may also direct modifications of the emergency plan in respect of any factory as may be necessary, from time to time.

(9) Disaster Control and Management Plan.ô

- i. The occupier of every factory carrying on a hazardous process shall prepare a draft disaster control and management plan in respect of his factory and submit the same to the Chief Inspector-cum-Facilitator and the District Emergency Authority ;
- ii. The District Emergency Authority on receipt of the plan shall hold consultation with the occupier, representatives of the Chief Inspector, the State Pollution Control Board, local authority as well as police, health fire brigade and other authorities concerned and finalise the plan ;
- iii. The District Emergency Authority shall forward a copy of the final plan to the occupier and all authorities concerned. The occupier shall intimate the workers the contents of the plan ;

- iii. If the worker leaves the employment ;
- iv. If any one of the following authorities so direct :ô

- the Chief Inspector-cum-Facilitator ;
- the Health Authority of the Central or Government of Jammu and Kashmir ;
- the Commissioner of Workmen's Compensation ;
- the Director, Employees State Insurance Corporation (Medical Benefits) ; and
- the Director General, Factory Advice Service and Labour Institutes.

(2) A copy of the up-to-date health records including the record of worker's exposure to hazardous process or, as the case may, the medical records shall be supplied to the worker on receipt of an application from him. X- ray plates and other medical diagnostic reports may also be made available for reference to his medical practitioner.

62. The qualification and experience of persons handling hazardous substance and manner of providing necessary facilities for protecting the workers under clause (b) of section 85.ô

(1) All persons who are required to supervise the handling of hazardous substances shall possess the following qualifications and experience :ô

- i. A degree in Chemistry or Diploma in Chemical Engineering or Technology with 5 years experience ; or
- ii. A Master's Degree in Chemistry or a Degree in Chemical Engineering or Technology with 2 years experience ;
- iii. The experience stipulated above shall be in process operation and maintenance in the Chemical Industry ;
- iv. The Chief Inspector-cum-Facilitator may require to undergo training in Health and Safety for supervision.

(2) The syllabus and duration of the above training and the organisations conducting the training shall be approved by the DGFASLI or

No. 45-a] The J&K Official Gazette, 9th Feb., 2021/20th Magha., 1942. 57
ô ô
the appropriate Government in accordance with the guidelines issued by
the DGFASLI.

63. The manner of providing for medical examination of a worker under sub-clause (ii) of clause (c) of section 85. (1) Workers employed in a hazardous process shall be medically examined by a qualified medical practitioner herein after referred to as a Factory Medical Officer, in the following manner :ô

- i. Once before employment, to ascertain physical fitness of the person to do the particular job ;
- ii. Once in a period of 6 months, to ascertain the health status of all the workers in respect of occupational health hazards to which they are exposed and in cases wherein the opinion of the Factory Medical Officer it is necessary to do so at a shorter interval in respect of any workers ;
- iii. The details of pre-employment and periodical medical examination carried out as aforesaid shall be recorded in the Health Register in the Form XXIV.

(2) No person shall be employed for the first time without a certificate of fitness in Form XXIII granted by the Factory Medical Officer. If the Factory Medical Officer declares a person unfit for being employed in any process covered under sub-rule (1), such a person shall have the right to appeal to the Inspector who shall refer the matter to the Certifying Surgeon whose opinion shall be final in this regard. If the Inspector is also a Certifying Surgeon, he may dispose of the application himself.

(3) Any findings of the Factory Medical Officer revealing any abnormality or unsuitability of any person employed in the process shall immediately be reported to the Certifying Surgeon who shall in turn, examine the concerned worker and communicate his findings to the occupier within 30 days. If the Certifying Surgeon is of the opinion that the worker so examined is required to be taken away from the process for health protection, he will direct the occupier accordingly, who shall not employ the said worker in the same process. However, the worker so taken away shall be provided with alternate placement unless he is in the opinion of the Certifying Surgeon, fully incapacitated in which case the worker affected shall be suitably rehabilitated.

(4) A Certifying Surgeon on his own motion or on a reference from an Inspector may conduct medical examination of a worker to ascertain

58 The J&K Official Gazette, 9th Feb., 2021/20th Magha, 1942. [No. 45-a
the suitability of his employment in a hazardous process or for ascertaining
his health status. The opinion of the Certifying Surgeon in such a case shall
be final. The fee required for this medical examination shall be paid by the
occupier.

(5) The worker taken away from employment in any process under
sub-rule (2) may be employed again in the same process only after obtaining
the Fitness Certificate from the Certifying Surgeon and after making entries
to that effect in the Health Register.

(6) The worker required to undergo medical examination under these
rules and for any medical survey conducted by or on behalf of the Central
Government or the State Government shall not refuse to undergo such
medical examination.

64. **The measures or standards under sub-section (1) of
section 86. (1) Occupational Health Centres.** In respect of any
factory carrying on hazardous process there shall be provided and
maintained in good order an Occupational Health Centre with the services
and facilities as per scale laid down hereunder :

- i. For factories employing up to 50 workers
 - a. The services of a Factory Medical Officer on retainer-ship
basis, in his clinic to be notified by the occupier. He will
carry out the pre-employment and periodical medical
examination as stipulated in rule 61 and render medical
assistance during any emergency ;
 - b. A minimum of 5 persons trained in first-aid procedures
amongst whom at least one shall always be available during
the working period ;
 - c. A fully equipped first-aid box.
- ii. For factories employing 51 to 200 workers
 - a. An occupational Health Centre having a room with a
minimum floor area of 15 sq. mm with floors and walls made
of smooth and impervious surface and with adequate
illumination and ventilation as well as equipment as per the
Schedule-D ;

- b. A part-time Factory Medical Officer shall be in overall charge of the Centre who shall visit the factory at least twice in a week and whose services shall be readily available during medical emergencies ;
 - c. One qualified and trained dresser-cum-compounder on duty throughout the working period ;
 - d. A fully equipped first aid box in all the departments ;
- iii. For Factories employing above 200 workers ;
- a. One full-time Factory Medical Officer for factories employing up to 500 workers and one more Medical Officer for every additional 1000 workers or part thereof ;
 - b. An Occupational Health Centre having at least 2 rooms each with a minimum floor area of 15 sq.metre with floors and walls made of smooth and impervious surface and adequate illumination and ventilation as well as equipment as per the Schedule-D ;
 - c. There shall be one nurse, one dresser-cum-compounder and one Sweeper-cum-Ward Boy through out the working period ;
 - d. The Occupational Health Centre shall be suitably equipped to manage medical emergencies.

(2) The Factory Medical Officer required to be appointed under clause (a) shall have qualifications included in Schedule to the Indian Medical Degrees Act of 1916 or in the Schedules to the Indian Medical Council Act,1956 and possess a Certificate of Training in Industrial Health of minimum three months duration recognised by the Government of Jammu and Kashmir :

Provided tható

- (i) A person possessing a Diploma in Industrial Health or equivalent shall not be required to possess the certificate of training as aforesaid ;
- (ii) The Chief Inspector-cum-Facilitator may, subject to such conditions as he may specify, grant exemption from the

60 The J&K Official Gazette, 9th Feb., 2021/20th Magha, 1942. [No. 45-a
requirement of this sub-rule, if in his opinion a suitable person
possessing the necessary qualification is not available for
appointment ;

- (iii) In case of a person who has been working as a Factory Medical Officer for a period of not less than 3 years on the date of commencement of this rule, the Chief Inspector-cum-Facilitator may, subject to the condition that the said person shall obtain the aforesaid certificate of training within a period of three years, relax the qualification.

(3) The syllabus of the course leading to the above certificate, and the organisations conducting the Course shall be approved by the Directorate General of Factory Advice Service and Labour Institutes or the Government of Jammu and Kashmir in accordance with the guidelines issued by the DGFASLI.

(4) Within one month of the appointment of a Factory Medical Officer, the occupier of the Factory shall furnish to the Chief Inspector-cum-Facilitator the following particulars :

- i. Name and address of the Factory Medical Office ;
- ii. Qualifications ;
- iii. Experience, if any ; and
- iv. The sub-rule under which appointed.

(5) Ambulance Van

- (i) In any factory carrying on hazardous process there shall be provided and maintained in good condition, a suitably constructed ambulance van equipped with items as per sub-rule (5) and manned by a full time Driver- cum-Mechanic and a Helper trained in first aid, for the purposes of transportation of serious cases of accidents or sickness. The ambulance van shall not be used for any purpose other than the purpose stipulated herein and will normally be stationed at or near to the Occupational Health Centre :

Provided that a factory employing less than 200 workers, may make arrangements for procuring such facility at short

66 The J&K Official Gazette, 9th Feb., 2021/20th Magha, 1942. [No. 45-a
specified in the notice for the hearing of the appeal electronically or by
registered post.

(5) If on the date fixed for hearing, the appellant does not appear, the
appellate authority may dismiss the appeal for default of appearance of the
appellants by sending the copy of the order to the applicant electronically or
otherwise.

(6) Wherean appeal has been dismissed, the appellant may apply
electronically to the appellate authority for the restoration of the appeal
within thirty days from the date of receipt of the order and if the appellate
authority is satisfied that the appellant was prevented by sufficient cause
from appearing, the appellate authority shall restore the appeal subject to
costs at the discretion of the authority.

(7) The order of the Appellate Authority shall be communicated
electronically or by registered post to the appellant and copy thereof shall
be sent to the registering officer against whose order the appeal has been
preferred and shall be disposed of within a period of thirty days from the
date of receipt of appeal.

**72. Manner of compounding under sub-section (1) of
section 114.** (1) The officer notified by the Government of Jammu and
Kashmir for the purposes of compounding of offences under sub-section
(1) of section 114 shall issue electronically or otherwise, a compounding
notice for the offences which are compoundable under sub-section (1) of
section 114.

(2) The person so noticed may apply to the officer electronically or
otherwise and deposit the entire compounding amount by electronic transfer
or otherwise, within thirty days of the receipt of the notice.

(3) The Compounding Officer shall issue a composition certificate
within twenty days of receipt of the composition amount, to such person
from whom such amount has been received in satisfaction of the composition
notice.

(4) If a person so noticed fails to deposit the composition amount
within the one month before the institution of prosecution, the prosecution
shall be proceeded with before the Competent Court.

(5) No prosecution shall be instituted without giving an opportunity to
the employer to comply with such provisions subjected to proviso of
sub-section (1) of section 110 and compounding as under section 114.

(1)	(2)	(3)	(4)	(5)
			(a) testing, examination and inspection of lifts and hoists and conversant with current codes and other statutory requirements and such procedures ; (b) able to identify defects and arrive at a reliable conclusion with regards to the safety of hoists and lifts.	working conditions of hoists and lifts.
4	Lifting Machinery and Lifting Tackles	Degree in Electrical/or Mechanical/or Metallurgical Engineering or its equivalent or above	(i) A minimum experience of 07 years in (a) design or erection or operation/maintenance ; (b) testing, examination and inspection of	Facilities for load testing, tensile testing, heat treatment, equipments for measurement, gauges and such other equipments to determine the safe

Cautionary Notice

Electrolytic Plating

1. Chemicals handled in this plant are corrosive and poisonous ;
2. Smoking, chewing tobacco, eating food or drinking, in this area is prohibited. No food stuff or drink shall be brought in this area;
3. Some of these chemicals may be absorbed through the skin and may cause poisoning ;
4. A good wash shall be taken before meals ;
5. Protective devices supplied shall be used while working in this area ;
6. Spillage of the chemicals on any part of the body or on the floor shall be immediately washed away with water ;
7. All workers shall report for the prescribed medical tests regularly to protect their own health ;
8. **Medical facilities and records of examinations and tests.**ô (1) The occupier of every factory in which electrolytic processes are carried on shallô
 - (a) employ a qualified medical practitioner for medical surveillance of the workers employed therein whose appointment shall be subject to the approval of the Chief Inspector-cum-Facilitator ;
 - (b) Provide to the said medical practitioner all the necessary facilities for the purpose referred to in clause (a) ; and
 - (c) maintain a sufficient supply of suitable barrier cream, ointment and impermeable water proof plaster in a separate box readily accessible to the workers ad used solely for the purpose of keeping these substances. In case cyanides are used in the both, the box shall also contain an emergency cyanide kit.
- (2) The medical practitioner shall examine all workers before they are employed in electrolytic processes. Such examination in case of chrome plating shall include inspection of hands, forearms and nose and will be carried out once at least in every fortnight.
- (3) The record of the examinations referred to in sub-paragraph (2) shall be maintained in a separate register

approved by Chief Inspector-cum-Facilitator which shall be kept readily available for inspection by the Inspector-cum-Facilitator.

9. Medical examination by the Certifying Surgeonô

I. Every worker employed in the electrolytic processes shall be examined by a Certifying Surgeon before his first employment. Such examination shall include X-ray of the chest andô

(a) in case of chromium plating include examination for nasal septum perforation and test for chromium in urine ;

(b) in case of nickel plating, test for nickel in urine ; and

(c) in case of cadmium plating, test for cadmium in urine and -2 microglobulin in urine.

II. No worker shall be employed in any electrolytic process unless certified fit for such employment by the Certifying Surgeon.

III. Every worker employed in the electrolytic processes shall be re-examined by a Certifying Surgeon at least once in every year, except in case of the workers employed in cadmium, chromium and nickel plating processes for whom this examination shall be carried out once in every six months. Such re-examination shall, wherever the Certifying Surgeon considers appropriate, include tests as specified under sub-paragraph (I) excluding the X-ray of the chest which shall not be required normally to be carried out earlier than once in three years.

IV. The certifying surgeon after examining a worker, shall issue a Certificate of Fitness in Form XXIII. The record of examination and re-examinations carried out shall be kept in the custody of the manager of the factory. The record of each examination carried out under sub-paragraphs (I) and (II) including the nature and the results of the tests, shall also be entered by the Certifying Surgeon in a health register in Form XXIV.

Schedule B-III

Manufacture and repair of electric accumulators

1. **Savings.** This schedule shall not apply to the manufacture or repair of electric accumulators or parts thereof not containing lead or any compound of lead ; or to the repair on the premises, of any accumulator forming part of a stationary battery.

2. **Definitions.** For the purposes of this schedule,

- (a) "Lead process" means the melting of lead or any material containing lead, casting, pasting, lead burning, or any other work, including trimming, or any other abrading or cutting of pasted plates, involving the use, movement or manipulation of or contact with, any oxide of lead ;
- (b) "manipulation of raw oxide of lead" means any lead process involving any manipulation or movement of raw oxides of lead other than its conveyance in a receptacle or by means of an implement from one operation to another.

3. **Prohibition relating to women and young persons.** No women or young person shall be employed or permitted to work in any lead process or in any room in which the manipulation of raw oxide of lead or pasting is carried on.

4. **Separation of certain processes.** Each of the following processes shall be carried on in such a manner and under such conditions as to secure effectual separation from one another , and from other processes :

- (a) manipulation of raw oxide of lead ;
- (b) pasting ;
- (c) drying of pasted plates ;
- (d) formation with lead turning (tacking) necessarily carried on in connection therewith ; and
- (e) melting down of pasted plates.

5. **Air space** - In every room in which a lead process is carried on, there shall be at least 14.2 cubic meters of air space for each person employed therein, and in computing this air space no height over 3.65 meters shall be taken into account.

14. **Racks and shelves drying room.**ô

- (a) The racks and shelves provided in any drying room shall not be more than 2.4 m from the floor and not more than 60 cm in width :

Provided that as regards racks or shelves set or drawn from both sides the total width shall not exceed 120 cm.

- (b) Such racks and shelves shall be cleaned only after being thoroughly damped unless so efficient suction cleaning apparatus is used for this purpose.

15. **Protective clothing.**ô

- I. Protective clothing shall be provided and maintained in good condition for all person employed inô

- (a) Manipulation of raw oxide of lead ;
(b) Pasting ;
(c) The formation room ;

and such clothing shall be worn by the person concerned.

- II. The protective clothing shall consist of a water-proof apron and water-proof footwear ; and also as required persons employed in the manipulation of raw oxide of lead or in the pasting the head covering shall be washed daily.

16. **Mess room.**ô There shall be provided and maintained for the use of all persons employed in a lead process and remaining on the premises during the meal intervals, a suitable mess room which shall be furnished with sufficient tables and benches. The mess room shall be placed under the charge of a responsible person and shall be kept clean.

17. **Cloak room.**ô There shall be provided and maintained for the use of all persons employed in a lead processô

- (a) a cloak room for clothing put-off during working hours with adequate arrangements for drying the clothes, if wet. Such accommodation shall be separate from mess room ;
(b) separate and suitable arrangements for the storage of protective clothing provided as per sub-rule (15).

- V. If at any time the Certifying Surgeon is of the opinion that a worker is no longer fit for employment in the said processes on the ground that continuance therein would involve special danger to the health of the worker he shall make record of his findings in the said certificate and the health register. The entry of his findings in those documents should also include the period for which he considers that the said person is unfit for work in the said processes ;
- VI. No person who has been found unfit to work as said in subparagraph (V) shall be re-employed or permitted to work in the said processes unless the Certifying Surgeon, after further examination, again certifies him fit for employment in those processes.

Schedule B-IV

Glass Manufacture

1. **Definitions.**ô For the purpose of this schedule—

- (a) ôefficient exhaust draughtö means localised ventilation effected by mechanical means for the removal of gas, vapour, dust or fumes so as to prevent them (as far as practicable under the atmospheric conditions usually prevailing) from escaping into the air of any place in which work is carried on. No draught shall be deemed efficient which fails to remove smoke generated at the point where such gas, vapour, fume, or dust originate ;
- (b) ôlead compoundö means any compound of lead other than galena which, when treated in the manner described below, yields to an aqueous solution of hydrochloric acid a quantity soluble lead compound exceeding, when calculated as lead monoxide, five per cent of the dry weight of the portion taken analysis.

The method of treatment shall be as follows :ô

A weighed quantity of the material which has been dried at 100 degrees centigrade and thoroughly mixed shall be continuously shaken for one hour at the common temperature with 1,000 times its weight of an aqueous solution of hydrochloric acid containing 0.25 per cent by weight of hydrogen chloride. This solution shall thereafter be allowed to stand for one hour and then filtered. The lead salt contained in the clear filtrate shall then be precipitated as lead sulphide and weighed as lead sulphate.

ii. at least one wash basin for every five such persons employed at any one time, fitted with a waste pipe and plug and having an adequate supply of water laid on or always readily available ;

(b) a sufficient supply of clean towels made of suitable material renewed daily with sufficient supply of soap or other suitable cleansing material and of nail brushes ; and

(c) a sufficient number of stand pipes with taps the number and location of which shall be to the satisfaction of the Chief Inspector-cum-Facilitator.

11. Medical facilities and record of examinations and tests.ô

I. The occupier of every factory in which glass manufacturing processes are carried out, shallô

(a) employ a qualified medical practitioner for medical surveillance of the workers employed therein whose appointment shall be subject to the approval of the Chief Inspector-cum-Facilitator ; and

(b) Provide to the said medical practitioner all the necessary facilities for the purpose referred to in clause (a).

II. The records of medical examinations and appropriate tests carried out by the said medical practitioner shall be maintained in a separate register approved by the Chief Inspector-cum-Facilitator, which shall be kept readily available for inspection by the Inspector-cum-Facilitator.

12. Medical Examination by Certifying Surgeon.ô

I. Every worker employed in processes specified in paragraph 2 shall be examined by the Certifying Surgeon within 15 days of his first employment. Such examination shall include pulmonary function tests and in suspected cases chest X-ray as well as tests for lead and urine. No worker shall be allowed to work after 15 days of first employment in the factory unless certified for such employment by the Certifying Surgeon ;

II. Every worker employed in the said processes shall be re-examined by the Certifying Surgeon at least once in every twelve calendar months. Such re-examination shall, wherever the Certifying Surgeon considers appropriate, include tests as specified in sub-paragraph (I).

- III. The Certifying Surgeon after examining a worker, shall issue a Certificate of Fitness in Form XXIII. The record of examination and re-examination carried out shall be entered in the Certificate and the Certificate shall be kept in the custody of the manager of the factory. The record of each examination carried out under sub-paragraph (I) and (II), including the nature and the results of the tests, shall also be entered by the Certifying Surgeon in a health register in Form XXIV.
- IV. The Certificate of Fitness and the health register shall be kept readily available for inspection by the Inspector.
- V. If at any time the Certifying Surgeon is of the opinion that a worker is no longer fit for employment in the said processes on the ground that continuance therein would involve special danger to the health of worker, he shall make a record of his findings in the said certificate and the health register. The entry of his findings in those documents should also include the period for which he considers that the said person is unfit for work in the said processes. The person so suspended from the process shall be provided with alternate placement facilities unless he is fully incapacitated in the opinion of the Certifying Surgeon, in which the person affected shall be suitably rehabilitated.
- VI. No person who has been found unfit to work as said in sub-paragraph (V) shall be re-employed or permitted to work in the said processes unless the Certifying Surgeon , after further examination, again certifies him fit for employment in those processes.
- 13. Exemption-** If the Chief Inspector-cum-Facilitator is satisfied in respect of any factory or any class of process that, owing to the special methods of work or the special conditions in a factory or otherwise, any of the requirements of this Schedule Ban be suspended or relaxed without danger to the persons employed therein, or that the application of this schedule or any part thereof is for any reason impracticable, he may by certificate in writing authorize such suspension or relaxation as may be indicated in the certificate for such period and on such conditions as he may think fit.

- (b) Provide to the said medical practitioner all the necessary facilities for the purpose referred to in clause (a).

- II. The record of medical examinations and appropriate tests carried out by the said medical practitioner shall be maintained in a separate register approved by the Chief Inspector-cum-Facilitator, which shall be kept readily available for inspection by the Inspector-cum-Facilitator.

9. **Medical examination by the Certifying Surgeon.**

- I. Every worker employed in grinding or glazing of metal and processes incidental thereto shall be examined by a Certifying Surgeon within 15 days of his first employment. Such examination shall include pulmonary function tests and in suspected cases chest X-rays. No worker shall be allowed to work after 15 days of his first employment in the factory unless certified fit for such employment by the Certifying Surgeon.
- II. Every worker employed in the said processes shall be re-examined by a Certifying Surgeon at least once in every 12 calendar months. Such re-examination shall, wherever the Certifying Surgeon considers appropriate, include tests as specified in sub-paragraph (I).
- III. The Certifying Surgeon after examining a worker shall issue a Certificate of Fitness in Form XXIII. The record of examination and re-examinations carried out shall be entered in the Certificate and the Certificate shall be kept in the custody of the manager of the factory. The record of each examination carried out under sub-paragraphs (I) and (II), including the nature and the results of the tests, shall also be entered by the Certifying Surgeon in a health register in Form XXIV.
- IV. The Certificate of Fitness and the health register shall be kept readily available for inspection by the Inspector.
- V. If at any time the Certifying Surgeon is of the opinion that a worker is no longer fit for employment in the said processes on the found that continuance therein would involve special danger to the health of the worker, he shall make record of his findings in the said certificate

- Such examination shall include pulmonary function tests and in suspected cases chest X-rays. No worker shall be allowed to work after 15 days of his first employment in the factory unless certified fit for such employment by the Certifying Surgeon.
- II. Every worker employed in the said processes shall be re-examined by a Certifying Surgeon at least once in every 3 calendar months. Such re-examination shall, wherever the Certifying Surgeon considers appropriate, include tests as specified in sub-paragraph (I).
 - III. The Certifying Surgeon after examining a worker, shall issue a Certificate of Fitness in Form XXIII. The record of examination and re-examinations carried out shall be entered in the Certificate and the Certificate shall be kept in the custody of the manager of the factory. The record of each examination carried out under subparagraphs (I) and (II), including the nature and the results of the tests, shall also be entered by the Certifying Surgeon in a health register in Form XXIV.
 - IV. The Certificate of Fitness and the health register shall be kept readily available for inspection by the Inspector-cum-Facilitator.
 - V. If at any time the Certifying Surgeon is of the opinion that a worker is no longer fit for employment in the said processes on the ground that continuance therein would involve special danger to the health of the worker he shall make record of his findings in the said certificate and the health register. The entry of his findings in those documents should also include the period for which he considers that the said person is unfit for work in the said processes. The person so suspended from the process shall be provided with alternate placement facilities unless he is fully incapacitated in the opinion of the Certifying Surgeon, in which case the person affected shall be suitably rehabilitated.
 - VI. No person who has been found unfit to work as said in sub-paragraph (5) shall be re-employed or permitted to work in the said processes unless the Certifying Surgeon, after further examination, again certifies him fit for employment in those processes.

Schedule B-VIII

***Cleaning or smoothing, roughening, etc. of articles, by a jet of sand,
metal shot, or grit, or other abrasive propelled by a blast of
compressed air or steam***

(Blasting Regulations)

1. **Definitions.**ô For the purposes of this scheduleô

- (a) ôblastingö means cleaning, smoothing, roughening, or removing of any part of the surface of any article by the use of an abrasive of a jet of sand, metal shot, or grit or other material, propelled by a blast of compressed air or steam ;
- (b) ôblasting enclosureö means a chamber, barrel, cabinet or any other enclosure designed for the performance of blasting therein;
- (c) ôblasting chamberö means a blasting enclosure in which any person may enter at any time in connection with any work or otherwise; and
- (d) ôcleaning of castingsö where done as an incidental or supplemental process in connection with the making of metal castings, means the freeing of the casting from adherent sand or other substance and includes the removal of cores and the general smoothening of a casting, but does not include the free treatment.

2. **Prohibition of sand blasting.**ô Sand or any other substance containing free silica shall not be introduced as an abrasive into any blasting apparatus and shall not be used for blasting :

Provided that this clause shall come into force two years after the coming into operation of this schedule :

Provided further that no woman or young person shall be employed or permitted to work at any operation of sand blasting.

3. **Precautions in connection with blasting operations.**ô

- (a) Blasting shall not be done except in a blasting enclosure and no work other than blasting and any work immediately incidental thereto and clearing and repairing of the enclosure including the plant and appliances situated therein, shall be kept closed and air tight while blasting is being done therein ;
- (b) **Maintenance of blasting enclosure.**ô Blasting enclosure shall always be maintained in good condition and effective measures

shall be taken to prevent dust escaping from such enclosure, and from apparatus connected therewith, into the air of any room ;

- (c) **Provision of separating apparatus.**—There shall be provided and maintained for and in connection with every blasting enclosure, efficient apparatus for separating, so far as practicable, abrasive which has been used for blasting and which is to be used again as an abrasive, from dust or particles of other materials arising from blasting; and no such abrasive shall be introduced into any blasting apparatus and used for blasting until it has been so separated :

Provided that this clause shall not apply, except in the case of blasting chambers, to blasting enclosures constructed or installed before the coming into force of this schedule, if the Chief Inspector-cum-Facilitator is of opinion that it is not reasonably practicable to provide such separating apparatus.

- (d) **Provision of ventilating plant:**ô There shall be provided and maintained in connection with every blasting enclosure efficient ventilating plant to extract, by exhaust draught effected by mechanical means, dust produced in the enclosure. The dust extracted and removed shall be disposed of by such method and in such manner that it shall not escape into the air of any room; and every other filtering or settling device situated in a room in which persons are employed, other than persons attending to such bag or other filtering or settling device, shall be completely separated from the general air of that room in an enclosure ventilated to the open air.

- (e) **Operation of ventilating plant.**—The ventilating plant provided for the purpose of sub-paragraph (d) shall be kept in continuous operation whenever the blasting enclosure is in use whether or not blasting is actually taking place therein, and in the case of a blasting chamber, it shall be in operation even when any person is inside the chamber for the purpose of cleaning.

4. **Inspection and examination.**ô

- I. Every blasting enclosure shall be specially inspected by a competent person at least once in every week in which it is used for blasting. Every blasting enclosure, the apparatus connected therewith and the ventilating plant shall be thoroughly examined and in the case of ventilating plant, tested by a competent person at least once in every month.

connection with any blasting apparatus or blasting enclosure or with any apparatus or ventilating plant connected therewith so that he is exposed to the risk of inhaling dust which has arisen from blasting, all practicable measures shall be taken to prevent such inhalation.

- II. In connection with any cleaning operation referred to in paragraph 5, and with the removal of dust from filtering or settling devices all practicable measures shall be taken to dispose of the dust in such a manner that it does not enter the air of any room. Vacuum cleaners shall be provided and used wherever practicable for such cleaning operations.

7. Storage accommodation for protective wear. Adequate and suitable storage accommodation for the helmets, gauntlets and overalls required to be provided by paragraph 5 shall be provided outside and conveniently near to every blasting enclosure and such accommodation shall be kept clean. Helmets, gauntlets and overalls when not in actual use shall be kept in this accommodation.

8. Maintenance and cleaning of protective wear. All helmets, gauntlets, overalls and other protective devices or clothings provided and worn for the purposes of this schedule, shall be kept in good condition and so far as is reasonably practicable shall be cleaned on every weekday in which they are used. Where dust arising from the cleaning of such protective clothing or devices is likely to be inhaled, all practicable measures shall be taken to prevent such inhalation. Vacuum cleaners shall, wherever practicable, be used for removing dust from such clothing and compressed air shall not be used for removing dust from any clothing.

9. Maintenance of vacuum cleaning plant. Vacuum cleaning plant used for the purpose of this schedule shall be properly maintained.

10. Restrictions in employment of young persons.

- I. No person under 18 years of age shall be employed in blasting or assisting at blasting or in any blasting chamber or in the cleaning of any blasting apparatus or any blasting enclosure or any apparatus or ventilating plant connected therewith or be employed on maintenance or repair work at such apparatus, enclosure or plant.
- II. No person under 18 years of age shall be employed to work regularly within twenty feet of any blasting enclosure unless the enclosure is in a room and he is

outside that room where he is effectively separated from any dust coming from the enclosure.

11. Power to exempt or relax.ô

- I. If the Chief Inspector-cum-Facilitator is satisfied that in any factory or any class of factory, the use of sand or other substance containing free silica as an abrasive in blasting is necessary for a particular manufacture or process (other than the process incidental or supplemental to making of metal castings) and that the manufacture or process cannot be carried on without the use of such abrasive or that owing to the special conditions or special method of work or otherwise any requirement of this Schedule Ban be relaxed without endangering the health of the persons employed or that application of any such requirements is for any reason impracticable or inappropriate, he may, with the previous sanction of the J&K Government, by an order in writing exempt the said factory or class of factory from such provisions of this schedule, to such an extent and subject to such conditions and for such period as may be specified in the said order.
- II. Where an exemption has been granted under sub-paragraph (I), a copy of the order shall be displayed at a notice board at a prominent place at the main entrance or entrances to the factory and also at the place where the blasting is carried on.

12. Medical facilities and records of examinations and tests.ô

- I. The occupier of every factory to which the Schedule applies, shallô
 - (a) employ a qualified medical practitioner for medical surveillance of the workers employed therein whose employment shall be subject to the approval of the Chief Inspector of Factories ; and
 - (b) Provide to the said medical practitioner all the necessary facilities for the purpose referred to in clause (a).
- II. The record of medical examinations and appropriate tests carried out by the said medical practitioner shall be maintained in a separate register approved by the Chief

Inspector of Factories, which shall be kept readily available for inspection by the Inspector.

13. Medical examination by the Certifying Surgeon.ô

- I. Every worker employed in any of the processes to which this schedule shall be examined by a Certifying Surgeon within 15 days of his first employment. Such examination shall include pulmonary function tests and chest X-rays. No worker shall be allowed to work after 15 days of his first employment in the factory unless certified fit for such employment by the Certifying Surgeon.
- II. Every worker employed in the said processes shall be re-examined by a Certifying Surgeon at least once in every 12 calendar months and such re-examination shall, wherever the Certifying Surgeon considers appropriate, include pulmonary function test and chest X-ray once in every three years.
- III. The Certifying Surgeon after examining a worker shall issue a Certificate of Fitness in Form XXIII. The record of examination and re-examinations carried out shall be entered in the Certificate and the Certificate shall be kept in the custody of the manager of the factory. The record of each examination carried out under sub-paragraphs (I) and (II), including the nature and the results of the tests, shall also be entered by the Certifying Surgeon in a health register in Form XXIV.
- IV. The Certificate of Fitness and the health register shall be kept readily available for inspection by the Inspector-cum-Facilitator.
- V. If at any time the Certifying Surgeon is of the opinion that a worker is no longer fit for employment in the said processes on the ground that continuance therein would involve special danger to the health of the worker, he shall make record of his findings in the said certificate and the health register. The entry of his findings in those documents should also include the period for which he considers that the said person is unfit for work in the said processes. The person so suspended from the process shall be provided with alternate placement facilities unless he is fully incapacitated in the opinion of

2. **Protective clothing.**ô The occupier shall provide and maintain in good condition the following articles of protective clothing :ô

- (a) waterproof footwear leg coverings, aprons and gloves for persons employed in processes involving contact with chrome solutions, including the preparation of such solutions ;
- b) gloves and boots for persons employed in lime yard ;
- (c) protective footwear, aprons and gloves for persons employed in processes involving the handling of hides and skins, other than in processes specified in sub-paragraphs (a) and (b) above :

Provided that the gloves, aprons, leg coverings or boots may be of rubber or leather, but the gloves and boots to be provided under sub-paragraphs (a) and (b) shall be of rubber :

Provided further that the gloves may not be provided to persons fleshing by hand or employed in processes in which there is no risk of contact with lime, sodium sulphide or other caustic liquor.

3. **Washing facilities, mess room and cloakroom.**ô There shall be provided and maintained in a clean state and in good repair for the use of all persons employedô

- (a) a trough with a smooth impervious surface fitted with a waste pipe, without plug, and of sufficient length to allow of at least 60 centimetres for every five such persons employed at any one time, and having a constant supply of water from taps or jets above the trough at intervals of not more than 60 centimetres ; or at least on wash-basin for every ten such persons employed at any one time, fitted with a waste pipe and plug and having a constant supply of clean water; together with, in either case, a sufficient supply of nail brushes, soap or other suitable cleansing material and clean towels ;
- (b) a suitable mess room, adequate for the number remaining on the premises during the meal intervals, which shall be furnished with sufficient tables and benches and adequate means for warming food and for boiling water. The mess room shallô
 - i. be separate from any room or shed in which hides or skins are stored, treated or manipulated ;
 - ii. be separate from the cloakroom ; and
 - iii. be placed under the charge of a responsible person ; and

- (c) the occupier shall provide and maintain for use of all persons employed suitable accommodation for clothing put off during working hours and another accommodation for protective clothing and also adequate arrangements for drying up the clothing in both the cases, if wet. The accommodation so provided shall be kept clean at all times and placed under the charge of a responsible person.

4. **Food, drinks, etc. prohibited in workrooms.**ô No food, drink, pan and supari or tobacco shall be brought into or consumed by any worker in any workroom or shed in which hides or skins are stored, treated or manipulated.

5. **Medical facilities and record of examinations and tests.**ô

- I. The occupier of every factory in which the schedule applies, shallô

- (a) Employ a qualified medical practitioner for medical surveillance of the workers employed therein whose employment shall be subject to the approval of the Chief Inspector of Factories ;
- (b) Provide to the said medical practitioner all the necessary facilities for the purpose referred to in clause (a) ;
- (c) Arrange for inspection of the hands of all the persons keeping in contact with chromium substances to be made twice a week ; and
- (d) Provide and maintain and supply suitable ointment and plaster in a box readily accessible to the workers and solely used for the purpose of keeping the ointment and the plaster.

- II. The records of medical examinations and appropriate tests carried out by the said medical practitioner shall be maintained in a separate register approved by the Chief Inspector-cum-Facilitator, which shall be kept readily available for inspection by the Inspector-cum-Facilitator.

6. **Medical Examination by Certifying Surgeon.**ô

- I. Every worker employed in shall be examined by a Certifying Surgeon within 15 days of his first employment. Such examination shall include No worker shall be allowed to work after 15 days of his first employment in

III. The Certifying Surgeon after examining a worker, shall issue a Certificate of Fitness in Form XXIII. The record of examination and re-examinations carried out shall be entered in the Certificate and the Certificate shall be kept in the custody of the manager of the factory. The record of each examination carried out under sub-paragraphs (I) and (II), including the nature and the results of the tests, shall also be entered by the Certifying Surgeon in a health register in Form XXIV.

IV. The Certificate of Fitness and the health register shall be kept readily available for inspection by the Inspector-cum-Facilitator.

V. If at any time certifying surgeon is of the opinion that a worker is no longer fit for employment in the said process on the ground that continuance therein would involve special danger to the health of the worker he shall make a record of his findings in the said Certificate and the health register. The entry of his findings in these documents should also include the period for which he considers that the said person is unfit for work in the said processes. The person so suspended from the process shall be provided with alternate placement facilities unless he is fully incapacitated in the opinion of the Certifying Surgeon, in which case the person affected shall be suitably rehabilitated.

VI. No person who has been found unfit to work as said in sub-paragraph (V) above shall be re-employed or permitted to work in the said processes unless the Certifying Surgeon, after further examination, again certifies him fit for employment in those processes.

11. **Food, drinks, etc. prohibited in workrooms.**ô No food, drink, pan and supari or tobacco shall be consumed or brought by any worker into any workroom in which any lead process is carried on.

12. The occupier shall provide to all persons employed in lead process two full sleeve overall every year, arrange for their weekly washing and maintain these in good condition. The person employed in such a process shall wear these overall while engaged in such work.

13. **Exemption.**—Where the Chief Inspector-cum-Facilitator is satisfied that all or any of the provisions of this schedule are not necessary for the protection of persons employed, he may by certificate in writing exempt any factory from all or any such provisions subject to such conditions as he may specify therein. Such certificate may at any time be revoked by the Chief Inspector-cum-Facilitator.

- (b) separate and suitable arrangements for the storage of protective equipment provided under paragraph 10.

16. Medical facilities and records of examinations and tests.ô

- I. The occupier of every factory in which manufacture of pottery is carried on, shallô
 - (a) employ a qualified medical practitioner for medical surveillance of the workers employed therein whose employment shall be subject to the approval of the Chief Inspector of Factories ; and
 - (b) provide to the said medical practitioner all the necessary facilities for the purpose referred to in clause (a).
- II. The record of medical examinations and appropriate tests carried out by the said medical practitioner shall be maintained in separate register approved by the Chief Inspector of Factories, which shall be kept readily available for inspection by the Inspector.

17. Medical examination by Certifying Surgeon.ô

- I. Every worker employed in any process mentioned under paragraph 3, shall be examined by a Certifying Surgeon within 15 days of his first employment. Such examination shall include tests for lead in urine and blood, ALA in urine, hemoglobin content, stippling of cells and no worker shall be allowed to work after 15 days of his first employment in the factory unless certified fit for such employment by the Certifying Surgeon.
- II. All persons employed in any of the processes included under sub-paragraphs 3(a) and 3(n) shall be examined by a Certifying Surgeon once in every 3 calendar months. Those employed in any other processes mentioned in the remaining sub-paragraphs of paragraph 3 shall be examined by a Certifying Surgeon once in every 3 months. Such examinations in respect of all the workers shall include all the tests as specified in sub-paragraph (1) except chest X-ray which will be once in 3 years.
- III. The Certifying Surgeon after examining a worker, shall issue a Certificate of Fitness in Form XXIII. The record of examination and re-examinations carried out shall be entered in the Certificate and the Certificate shall be kept in the

hazardous nature of the contents. They shall also be provided with adequate labelling and colour coding arrangements to enable identification of the containers and their contents indicating the hazards and safe handling methods and shall conform to the respective ISI standards. The instructions given in the label shall be strictly adhered to. Damaged containers shall be handled only under supervision of a knowledgeable and responsible person and spillage shall be rendered innocuous in a safe manner using appropriate means.

- II. The arrangements for the storage of chemicals including charging of chemicals in reaction vessels and containers shall be such as to prevent any risk of fire or explosion or formation of toxic concentration of substances above the limits specified in Rule 66.
- III. Without prejudice to the generality of the requirements in sub- Para (II) above, the arrangements shall have suitable ventilation facilities and shall enable the maintenance of safe levels in vessels and containers. Such arrangements shall also take into consideration, the type of flooring and the capacity of flooring and the compatibility requirements of substances with other chemicals stored nearby.
- IV.
 - (a) Storage of chemicals and intermediate products, which are highly unstable or reactive or explosive, shall be limited to the quantities required for two months use ;
 - (b) Whenever the quantities laid down in the above clause (a) are to be exceeded, the permission of the Chief Inspector-cum-Facilitator shall be obtained ;
 - (c) Notwithstanding anything contained in clauses (a) and (b) above, the Chief Inspector-cum-Facilitator may direct any factory carrying out processes covered in Appendix A to further limit the storage of hazardous substances to quantities less than two months on considerations of safety ;
 - (d) Standby arrangements equal to the biggest container shall always be available to transfer the toxic substances quickly into the standby storage facility if any defect develops in any of the container resulting in the release of toxic substances.

materials are being used and spillage or leakage of which may cause wide spread poisoning in or around the plant.

13. Control of escape of substances into the work atmosphere .ó

- I. Effective arrangements such as, enclosure, or by pass, or efficient exhaust draught, maintenance of negative pressure etc., shall be provided in all plants, containers, vessels, sewers, drains, flues, ducts, culverts, and buried pipes and equipment, to control the escape and spread of substances which are likely to give rise to fire or explosion or toxic hazards during normal working and in the event of accident or emergency.
- II. In the event of the failure of the arrangements for control resulting in the escape of substances in the work atmosphere immediate steps shall be taken to control the process in such a manner, that further escape is brought down to the safe level.
- III. the substances that would have escaped into the work atmosphere before taking immediate steps as required in sub-Para (II), shall be rendered innocuous by diluting with air or water or any other suitable agent or by suitably treating the substances.

14. Control of dangerous chemical reactions.ó Suitable provision, such as automatic and or remote control arrangements, shall be made for controlling the effects of dangerous chemical reactions. In the event of failure of control arrangements automatic flooding or blanketing or other effective arrangements shall come into operation.

15. Testing, examination and repair of plant and equipment.ó

- I. All parts of plant, equipment and machinery used in the process which in the likely event of their failure may give rise to an emergent situation shall be tested by a competent person before commencing process and retested at an interval of two years or after carrying out repairs to it. The competent person shall identify the parts of the plant, equipment and machinery required to be tested as aforesaid and evolve a suitable testing procedures. In carrying out the test mentioned above in respect of pressure vessels or reaction vessels the following precautions shall be observed, namelyó
 - (a) before the test is carried out, each vessel shall be thoroughly cleaned and examined externally, and as far

- III. All the staging constructed for the purpose of this Para shall have appropriate access which are safe and shall be fitted with proper hand rails to a height of one metre and toe board.

17. **Seating Arrangements.** The seating arrangements provided for the operating personnel working in processes covered in Appendix A shall be located in a safe manner as to prevent the risk of exposure to toxic, flammable and explosive substances evolved in the work environment in the course of manufacture or repair or maintenance, either due to failure of plant and equipment or due to the substances which are under pressure, escaping into the atmosphere.

18. **Entry into or work in confined spaces.**

- I. The occupier of every factory to which the provisions of this schedule apply, shall ensure the observance of the following precautions before permitting any person to enter or work inside the confined spaces
- (a) identify all confined spaces and the nature of hazards that are encountered in such spaces, normally or abnormally, and arrange to develop the most appropriate safeguards for ensuring the safety and health of persons entering into or working inside, the confined spaces ;
 - (b) regulate the entry or work inside the confined spaces through a permit to work system which should include the safeguards so developed as required under sub-clause (a) above ;
 - (c) before testing the confined space for entry into or work, the place shall be rendered safe by washing or cleaning with neutralising agents; or purging with steam or inert gases and making adequate forced ventilation arrangements or such measure which will render the confined space safe ;
 - (d) Shall arrange to carry out such tests as are necessary for the purpose by a competent person and ensure that the confined space is safe for the persons to enter or work. Such testing shall be carried out as often as is necessary during the course of work to ensure its continued safety ;
 - (e) shall arrange to educate and train the personnel who would be required to work in confined spaces about the hazards involved in the work. He shall also keep in readiness the

occurs in material or equipment so that continued safety is ensured ;

- (d) persons who are assigned to carry out the permit to work system shall be physically fit in all respects taking into consideration the demands and nature, of the work before entering into the confined space. Such person shall be adequately informed about the correct work procedures as well as the precautions to be observed while carrying out the permit to work system ;
- (e) adequate rescue arrangements wherever considered necessary and adequate first aid, rescue and resuscitation arrangements shall be available in good working condition near the place of work while carrying out the permit to work system, for use in emergency ;
- (f) appropriate and approved personal protective equipment shall be used while carrying out the permit to work system ;
- (g) after completion of work subject to the permit to work system the person responsible shall remove all the equipment and tools and restore to the original condition so as to prevent any danger while carrying out regular process.

21. **Safety sampling personnel.** The occupier shall ensure the safety of persons assigned for collecting samples by instructing them on the safe procedures. Such personnel shall be provided with proper and approved personal protective equipment, if required.

22. **Ventilation.** Adequate ventilation arrangements shall be provided and maintained at all times in the process area where dangerous or toxic or flammable or explosive substances could be evolved. These arrangements shall ensure that concentrations, which are either harmful or could result in explosion, are not permitted to be built up in the work environment.

23. **Procedures for meeting emergencies.**

- I. The occupier of every factory carrying out the works covered in Appendix A shall arrange to identify all types of possible emergencies that could occur in the processes during the course of work or while carrying out maintenance work or repair work. The emergencies so identified shall be reviewed every year.
- II. The occupier shall formulate a detailed plan to meet all such identified emergencies including arrangements for

summoning outside help for rescue and fire fighting arrangements for making available urgent medical facilities.

- III. The occupier shall send the list of emergencies and the details of procedures and plans formulated to meet the emergencies, to the Chief Inspector of Factories.
- IV. The occupier shall arrange to install distinctive and recognisable warning arrangements to caution all persons inside the plant as well as the neighbouring community, if necessary, to enable evacuation of persons and to enable the observance of emergency procedures by the persons who are assigned emergency duties. All concerned must be well informed about the warning arrangements and their meaning. The arrangements must be checked for its effectiveness every month.
- V. Alternate power supply arrangements shall be made and interlocked with the normal power supply system so as to ensure constant supply of power to the facilities and equipment meant for compliance with requirements of Paragraphs 10, 11, 12, 13, 14, 18, 22, and this paragraph of Part II, Part III, Part IV and Part V of this Schedule.
- VI. The occupier shall arrange to suspend the further process work in a place where emergency is established and shall forthwith evacuate all persons in that area except workers who have been assigned emergency duties.
- VII. All the employees of the factory shall be trained about the action to be taken by them including evacuation procedures during emergencies.
- VIII. All emergency procedures must be rehearsed every three months and deficiencies, if any, in the achievement of the objectives shall suitably be corrected.
- IX. The occupier shall arrange to have ten per cent of the workers trained in the use of First Aid Fire Fighting appliances and in the rendering of specific hazards of the particular process.
- X. The occupier shall furnish immediately on request the specific chemical identity of the hazardous substance to the treating physician where the information is needed to administer proper emergency or first-aid treatment to exposed persons.

2. Static Electricity.

- I. All machinery and plant, particularly, pipe lines and belt drives, on which static charge is likely to accumulate, shall be effectively earthed. Receptacles for flammable liquids shall have metallic connections to the earthed supply tanks to prevent static sparking. Where necessary, humidity shall be regulated.
- II. Mobile tanker wagons shall be earthed during filling and discharge, and precautions shall be taken to ensure that earthing is effective before such filling or discharge take place.

3. Lightning protection. Lightning protection arrangement shall be fitted where necessary, and shall be maintained.

4. Process heating. The method of providing heat for a process likely to result in fire and explosion shall be as safe as possible and where the use of naked flame is necessary, the plant shall be so constructed as to prevent any escaping flammable gas, vapour, or dust coming into contact with the flame, or exhaust gases, or other sources likely to cause ignition. Wherever possible, the heating arrangement shall be automatically controlled at a pre-determined temperature below the danger temperature.

5. Leakage of flammable liquids.

- I. Provision shall be made to confine by means of bund walls, dykes, sumps etc. Possible leakages from storage vessels containing flammable liquids.
- II. Waste material in contact with flammable substances shall be disposed off suitably under the supervision of knowledgeable and responsible person.
- III. Adequate and suitable fire-fighting appliances shall be installed in the vicinity of such vessels.

6. Safety valves. Every still and every closed vessel which gas is evolved or into which gas is passed, and in which the pressure is liable to rise above the atmospheric pressure, shall have attached to it a pressure gauge, and a proper safety valve or other equally efficient means to relieve the pressure. These appliances shall be maintained in good condition.

7. Installation of pipe line etc. All pipelines carrying flammable or explosive substances shall be protected from mechanical damage and shall be examined by a responsible person once a week to detect any

No. 45-a] The J&K Official Gazette, 9th Feb., 2021/20th Magha., 1942. 141
deterioration or defects, or accumulation of flammable or explosive substances, and record kept of any defects found and repairs made.

8. Fire fighting systems.

- I. Every factory employing 500 or more persons and carrying out processes listed in Appendix -A shall provide
 - (a) Trained and responsible fire fighting squad so as to effectively handle the fire fighting and life saving equipment in the event of fire or other emergency. Number of persons in this squad will necessarily depend upon the size of risk involved, but in no case shall be less than 8 such trained persons to be available at any time. The squad shall consist of watch and ward personnel, fire pump man and departmental supervisors and operators trained in the operation of fire and emergency services ;
 - (b) Squad leaders shall preferably be trained in a recognized government institution and their usefulness enhanced by providing residence on the premises ;
 - (c) Squad personnel shall be provided with clothing and equipment including helmets, boots and belts.
- II. A muster roll showing the duties allocated to each member of the squad shall be prepared and copies supplied to each leader as well as displayed in prominent places so as to be easily available for reference in case of emergency.
- III. The pump man shall be thoroughly conversant with the location of all appliances. He shall be responsible for maintaining all fire fighting equipment in proper working order. Any defect coming to his notice shall be immediately be brought to the notice of squad leader.
- IV. As far as is practicable, the fire pump room and the main gate(s) of the factory be connected to all manufacturing or storing areas through telephone interlined and placed in a convenient location near such areas.

PART IV

Risks of Toxic Substances

1. Leakage.

- I. All plants shall be so designed and constructed as to prevent the escape of toxic substance. Where necessary, separate

arrangement shall be interlocked in the process control wherever possible.

- II. In the event of failure of continuous exhaust arrangement means shall be provided to automatically stop the process.

5. **Work Bench.** All the work benches used in the processes involving the manipulation of toxic substances shall be graded properly and shall be made of smooth impervious surface which shall be washed daily after the completion of work.

6. **Waste disposal.**

- I. There shall be provided a suitable receptacle made of non-absorbable material with a tightly fitting cover for depositing waste material soiled with toxic substances and the contents of such receptacle shall be destroyed by burning or using other suitable methods under the supervision of a responsible person.
- II. During the course of manufacture, whenever any batch or intermediate products having toxicity is rejected on considerations of quality, sufficient precautions shall be taken to render them innocuous or otherwise treat them or inactivate them, before disposal.
- III. The empty containers of toxic substances shall be cleaned thoroughly before disposal under the supervision of a responsible person.

PART V

Special Provisions

1. **Special precautions for Nitro or Amino Processes.**

- I. Unless the crystallized nitro or amino substances or any of its liquor is broken or agitated in a completely enclosed process so as not to give rise to dust or fume, such process shall be carried on under an efficient exhaust draught or by adopting any other suitable means in such a manner as to prevent the escape of dust or fume in the working atmosphere.
- II. No part of the plant or equipment or implements which was in contact with nitro or amino compounds shall be repaired, or handled unless they have been emptied and thoroughly cleaned and decontaminated.

substantial wire mesh covering to protect persons working nearby in the event of breakage of glass vessel.

- II. Any spillage or emission of vapour from the all glass vessel due to breakage, shall be immediately inactivated or rendered innocuous by suitable means such as dilution with water or suitable solvents so as to avoid the risks of fire or explosion or health hazards.

4. Special precautions for processes involving chlorate manufacture.ô

- I. Crystallisation, grinding or packing of chlorate shall not be done in a place used for any other purpose and such places shall have hard, smooth and impervious surface made of non-combustible material. The place shall be thoroughly cleaned daily.
- II. The personal protective equipment likes overall, etc. provided for the chlorate workers shall not be taken from the place of work and they shall be thoroughly cleaned daily.
- III. Adequate quantity of water shall be available near the place of chlorate process for use during fire emergency.
- IV. Wooden vessels shall not be used for the crystallisation of chlorate or to contain crystallised ground chlorate.

5. Special precautions in the use of plant and equipment made from reinforced plastics.ô

- I. All plant and equipment shall conform to appropriate Indian or any other National Standard.
- II. Care shall be taken during storage, transport, handling and installation of plant and equipment to avoid accidental damage.
- III. All plant and equipment shall be installed in such a way as to ensure that loads are distributed as intended in design or as per the recommendations of the manufacture.
- IV. All pipe work shall be supported so that total loads local to the branches on the vessel or tank do not exceed their design values.
- V. After erection all plant and equipment shall be subjected to a pressure test followed by a thorough examination by a competent person. The test and examination shall be as per

No. 45-a] The J&K Official Gazette, 9th Feb., 2021/20th Magha., 1942. 147
in good order an occupational health centre with facilities as per scale laid
down hereunder

- i. For factories employing upto workers
 - (a) the services of a qualified medical practitioner hereinafter known as Factory Medical Officer, available on a retainership basis, in his notified clinic near to the factory for seeking medical help during emergency. He will also carry out the pre-employment and periodical medical examinations as stipulated in paragraph 4 of this Part.
 - (b) A minimum of five persons trained in first aid procedures, amongst whom at least one shall always be available during the working period.
 - (c) A fully equipped first aid box.
- ii. For factories employing 51 to 200 workers
 - (a) The occupational health centre shall have a room having a minimum floor area of 15 sq.m., with floors and walls made of smooth, hard and impervious surface and shall be adequately illuminated, ventilated and equipped.
 - (b) A part-time Factory Medical Officer will be in over all charge of the Centre who shall visit the factory minimum twice in a week and whose services shall be readily available during emergencies.
 - (c) There shall be one qualified and trained dresser-cum-compounder on duty throughout the working period.
 - (d) A fully equipped first aid box.
- iii. For factories employing above 200 workers
 - (a) There shall be one full-time Factory Medical Officer for factories employing upto 500 workers and one more medical officer for every 1000 workers or part thereof.
 - (b) The occupational health centre in this case shall have a minimum of 2 rooms each having a minimum floor area of 15 sq.m. with floors and walls made of smooth, hard and impervious surface and shall be adequately illuminated, ventilated and equipped.
 - (c) There shall be one trained nurse, one dresser-cum-compounder and one sweeper-cum-ward boy throughout the working period.
 - (d) The Occupational Health Centre in this case shall be suitably equipped to manage medical emergencies.

incapacitated in the opinion of the Certifying Surgeon, in which case the person affected shall be suitably rehabilitated :

Provided that the Certifying Surgeon on his own may examine any other worker whom he feels necessary to be examined for ascertaining the suitability of his employment in the process covered in Appendix ~~A~~ or for ascertaining the health status of any other worker and his opinion shall be final.

- III. No person shall be newly appointed without the Certificate of Fitness granted by the Factory Medical Officer. If the Factory Medical Officer declares a person unfit for being appointed to work in the process covered in Appendix ~~A~~ such person shall have a right of appeal to the Certifying Surgeon, whose opinion shall be final in this regard.
- IV. The worker suspended from the process owing to the circumstances covered in sub-para (2) shall be employed again in the same process only after obtaining the Fitness Certificate from the Certifying Surgeon and after making entries to that effect in the health register.

PART VII

Additional Welfare Amenities

1. Washing facilities.—

- I. There shall be provided and maintained in every factory for the use of all the workers taps for washing, at the rate of one every 15 persons including liquid soap in a container with tilting arrangements and nail brushes or other suitable means for effective cleaning. Such facilities shall be conveniently accessible and shall be kept in a clean and hygienic condition.
- II. If washing facilities as required above are provided for women, such facilities shall be separate for them and adequate privacy at all times shall be ensured in such facilities.

2. Mess room facilities.ô

- I. The occupier of all the factories carrying out processes covered in Appendix ~~A~~ and employing 50 workers or more, shall provide for all the workers working in a shift mess room facilities which are well ventilated and provided with tables and sitting facilities along with the provision of cold and hygienic drinking water facilities.

- appliance or any guarding or fencing arrangement, inoperative or defective and shall report the defective condition of the aforesaid arrangements as soon as he is aware of any such defect.
- II. Before commencing any work, all workers employed in processes covered in Appendix ~~A~~ shall check their workplace as well as the machinery, equipment or appliance used in the processes and report any mal-function or defect immediately to the supervisor or any responsible person of the management.
- III. All workers shall co-operate in all respects with the management while carrying out any work or any emergency duty assigned to them in pursuance of this schedule and shall always use all the personal protective equipment issued to them in a careful manner.
- IV. All workers employed in the processes covered in Appendix ~~A~~ or Appendix ~~B~~ shall not smoke in the process area or storage area. If special facilities are provided by the management only such facilities should be used.
- V. All workers employed in the processes covered in Appendix ~~A~~ shall not remain in unauthorised place or carry out unauthorised work or improvise any arrangement or adopt short out method or misuse any of the facilities provided in pursuance of the Schedule, in such a manner as to cause risk to themselves as well as or to others employed.
- VI. The workers shall not refuse undergoing medical examination as required under these rules.

PART IX

Restrictions on the employment of young persons under 18 years of age and women

1. The Chief Inspector of Factories may by an order in writing, restrict or prohibit the employment of women and young persons under the age of 18, in any of the processes covered in Appendix ~~A~~ of this schedule on considerations of health and safety of women and young persons.
2. Such persons who are restricted or prohibited from working in the process due to the order issued in pursuance of sub-para (1) above shall be provided with alternate work which is not detrimental to their health or safety.

PART X

Exemptions

1. **Power of exemption.**ô The State Government or subject to the control of the State Government the Chief Inspector may exempt from the compliance with any of the requirements of this Schedule partly or fully, any factory carrying out processes covered in Appendix ~~A~~ if it is clearly and satisfactorily established by the occupier that the compliance with any of the requirement is not necessary to ensure the safety and health of persons employed suitable and effective alternate arrangements are available to any of the requirements covered in this schedule.

Appendix 'A'

Any works or that part of works in which-

- (a) the manufacture, manipulation or recovery of any of the following is carried on :ô
 - i. sodium, potassium, iron, aluminium, cobalt, nickel, copper, arsenic, antimony, chromium, zinc, selenium, magnesium, cadmium, mercury, beryllium and their organic and inorganic salts, alloys, oxides and hydroxides ;
 - ii. ammonia, ammonium hydroxide and salts of ammonium;
 - iii. the organic or inorganic compounds of sulphurous, sulphuric, nitric, nitrous, hydrochloric, hydrofluoric, hydriodic, hydro sulphuric, hydrobromic, boric ;
 - iv. cyanogen compounds, cyanide compounds, cyanate compounds ;
 - v. phosphorous and its compounds other than organo phosphorus insecticides ;
 - vi. chlorine.
- (b) hydrogen sulphide is evolved by the decomposition of metallic sulphides, or hydrogen sulphide is used in the production of such sulphides ;
- (c) bleaching powder is manufactured or chlorine gas is produced in chlor-alkali plants;
- (d) i. gas tar or coal tar or bitumen or shale oil asphalt or any residue of such tar is distilled or is used in any process of chemicals manufacture ;

- Fixed oxygen supply with equipment ;
- Pillow with case ;
- Sheets ;
- Blankets ;
- Towels ;
- Emesis bag ;
- Bed pan ;
- Urinal ;
- Glass

Safety equipment :

- Flares with life of 30 minutes
- Flood lights;
- Flash lights;
- Fire extinguisher dry powder type;
- Insulated gauntlets.

Emergency care equipment :-

Resuscitation :

- Portable suction unit ;
- Portable oxygen unit ;
- Bag-valve-mask, hand operated artificial ventilation unit ;
- Airways ;
- Mouth gags ;
- Tracheostomy adapters ;
- Short spine board ;
- I. V. Fluids with administration unit ;

- II. The surface of every floor of every work room or place where any work is carried on or where any person has to pass during the course of his work, shall be cleansed of dust once at least during each shift after being sprayed with water or by any other suitable method so as to prevent dust being airborne in the process of cleaning.

5. **Prohibition relating young persons.**ô No young person shall be employed or permitted to work in any of the operations involving manipulation or at any place where such operations are carried out.

6. **Medical Facilities and records of examinations and tests.**ô

- I. The occupier of every factory to which the schedule applies, shallô
 - (a) employ a qualified medical practitioner for medical surveillance of the workers employed therein whose employment shall be subject to the approval of the Chief Inspector of Factories ; and
 - (b) provide to the said medical practitioner all the necessary facilities for the purpose referred to in clause (I).
- II. The record of medical examinations and appropriate tests carried out by the said medical practitioner shall be maintained in separate register approved by the Chief Inspector of Factories, which shall be kept readily available for inspection by the Inspector.

7. **Medical examination by Certifying Surgeon.**ô

- I. Every worker employed in the processes specified in paragraph 1, shall be examined by a Certifying Surgeon within 15 days of his first employment. Such medical examination shall include pulmonary function test and chest X-Rayô Posterior Anterior (PA) view to be compared with standard ILO Radiographs on Pneumoconiosis. No worker shall be allowed to work after 15 days of his first employment in the factory unless certified fit for such employment by the Certifying Surgeon.
- II. Every worker employed in the said processes shall be re-examined by a Certifying Surgeon at least once in every twelve months. Such re-examination shall, wherever the Certifying Surgeon considers appropriate, include all the tests as specified in sub-paragraph (I) except chest X-ray which

- (d) "breathing apparatus" means a helmet or face piece with necessary connection by means of which a person using it breathes air free from dust, or any other approved apparatus;
- (e) "Efficient exhaust draught" means a localised ventilation by mechanical means for the removal of dust so as to prevent dust from escaping into air of any place in which work is carried on. No draught shall be deemed to be efficient which fails to control dust produced at the point where such dust originates ;
- (f) "preparing" means crushing, disintegrating, and any other processes in or incidental to the opening of asbestos ;
- (g) "Protective clothing" means overalls and head covering, which (in either case) will when worn exclude asbestos dust.

2-A. **Demolition of plants or structures.**—No person shall carry out any demolition of plants or structures containing friable asbestos insulation material and removal of asbestos from building or structures in which asbestos is liable to become air-borne, unless he is recognized and duly empowered by the Chief Inspector of Factories as qualified to carry out such work in accordance with the provisions of this Schedule.

3. **Tools and equipment.** Any tools or equipment used in processes to which this schedule applies shall be such that they do not create asbestos dust above the permissible limit or are equipped with efficient exhaust draught.

4. **Exhaust draught.**

- I. An efficient exhaust draught shall be provided and maintained to control dust from the following processes and machines :
 - (a) manufacture and conveying machinery namely
 - i. preparing, grinding, or dry mixing machines ;
 - ii. carding, card waste and ring spinning machines, and looms ;
 - iii. machines or other plant fed with asbestos ;
 - iv. machines used for the sawing, grinding, turning, drilling, abrading or polishing; in the dry state, of articles composed wholly or partly of asbestos ;
 - (b) cleaning, and grinding of the cylinders or other parts of a carding machine ;

- (c) chambers, hoppers or other structures into which loose asbestos is delivered or passes ;
- (d) work-benches for asbestos waste sorting or for other manipulation or asbestos by hand ;
- (e) workplaces at which the filling or emptying of sacks, skips or other portable containers, weighing or other process incidental thereto which is effected by hand, is carried on ;
- (f) sack cleaning machines ;
- (g) mixing and blending of asbestos by hand ; and
- (h) any other process in which dust is given off into the work environment.

II. Exhaust ventilation equipment provided in accordance with sub-paragraph (I) shall, while any work of maintenance or repair to the machinery, apparatus or other plant or equipment in connection with which it is provided is being carried on, be kept in use so as to produce an exhaust draught which prevents the entry of asbestos dust into the air of any work place.

III. Arrangements shall be made to prevent asbestos dust discharged from exhaust apparatus being drawn into the air of any workroom.

IV. The asbestos bearing dust removed from any workroom by the exhaust system shall be collected in suitable receptacles or filter bags which shall be isolated from all work areas.

5. Testing and examination of ventilating systems.—

I. All ventilating systems used for the purpose of extracting or suppressing dust as required by this schedule shall be examined and inspected once every week by a responsible person. It shall be thoroughly examined and tested by a competent person once in every period of 12 months. Any defects found by such examinations or test shall be rectified forthwith.

II. A register containing particulars of such examination and tests and the state of the plant and the repairs or alternations (if any) found to be necessary shall be kept and shall be available for inspection by an Inspector.

be washed at suitable intervals. The cleaning schedule and procedure should be such as to ensure the efficiency in protective the wearer.

- V. All breathing apparatus shall be cleaned and disinfected at suitable intervals and thoroughly inspected once every month by a responsible person.
- VI. A record of the cleaning and maintenance and of the condition of the breathing apparatus shall be maintained in a register provided for that purpose which shall be readily available for inspection by an Inspector.
- VII. No person shall be employed to perform any work specified in sub-paragraph (I) for which breathing apparatus is necessary to be provided under that sub-paragraph unless he has been fully instructed in the proper use of that equipment.
- VIII. No breathing apparatus provided in pursuance of sub-paragraph (I) which has been worn by a person shall be worn by another person unless it has been thoroughly cleaned and disinfected since last being worn and the person has been fully instructed in the proper use of that equipment.

11. **Separate accommodation for personal clothing.**ô A separate accommodation shall be provided in a conveniently accessible position for all persons employed in operation to which this schedule applies for storing of personal clothing. This should be separated from the accommodation provided under sub-paragraph (II) of paragraph 10 to prevent contamination of personal clothing.

12. **Washing and bathing facilities.**ô

- I. There shall be provided and maintained in a clean state and in good repair for the use of all workers employed in the processes covered by the schedule, adequate washing and bathing places having a constant supply of water under cover at the rate of one such place for every 15 persons employed.
- II. The washing places shall have standpipes place at intervals of not less than one metre.
- III. Not less than one half of the total number of washing places shall be provided with bathrooms.

- IV. Sufficient supply of clean towels made of suitable material shall be provided :

Provided that such towels shall be supplied individually for each worker if so ordered by the Inspector.

- V. Sufficient supply of soap and nail brushes shall be provided.

13. **Mess room.**—

- I. There shall be provided and maintained for the use of all worker employed in the factory covered by this schedule, remaining on the premises during the rest intervals, a suitable mess room which shall be furnished withô

- (a) sufficient tables and benches with back rest ; and
- (b) adequate means for warming food.

- II. The mess room shall be placed under the charge of a responsible person and shall be kept clean.

14. **Prohibition of employment of young persons.**ô No young person shall be employed in any of the process covered by this schedule.

15. **Prohibition relating to smoking.**—No person shall smoke in any area where processes covered by this schedule are carried on. A notice in the language understood by majority of the workers shall be posted in the plant prohibiting smoking at such areas.

Cautionary notices.—

- I. Cautionary notices in the form specified in the appendix shall be displayed at the approaches and along the perimeter of every asbestos processing area to warn all persons regardingô

- (a) hazards to health from asbestos dust ;
- (b) need to use appropriate protective equipment ;
- (c) Prohibition of entry to unauthorised persons, or authorised persons but without protective equipment.

- II. Such notices shall be in the language understood by the majority of the workers.

17. **Air monitoring.**—To ensure the effectiveness of the control measures, monitoring of asbestos fibre in air shall be carried out once at least in every shift and the record of the results so obtained shall be entered in a register specially maintained for the purpose.

168 The J&K Official Gazette, 9th Feb., 2021/20th Magha, 1942. [No. 45-a
examined under sub-paragraphs (I) and (II), including the nature and the results of the tests, shall also be entered by the Certifying Surgeon in a health register in Form XXIV.

- IV. The certificate of Fitness and the health register shall be kept readily available for inspection by the Inspector.
- V. If at any time the Certifying Surgeon is of the opinion that a worker is no longer fit for employment in the said processes on the ground that continuance therein would involve special danger to the health of the worker, he shall make a record of his findings in the said certificate and the health register. The entry of his findings in those documents should also include the period for which he considers that the said person is unfit to work in the said processes. The person so suspended from the process shall be provided with alternate placement facilities unless he is fully incapacitated in the opinion of the Certifying Surgeon, in which case the person affected shall be suitably rehabilitated.
- VI. No person who has been found unfit to work as said in sub-paragraph (V) shall be re-employed or permitted to work in the said processes unless the Certifying Surgeon, after future examination, again certifies him fit for employment in these processes.

20. **Exemptions.**—If in respect of any factory, the Chief Inspector is satisfied that owing to the exceptional circumstances or infrequency of the processes or for any other reason, all or any of the provisions of this schedule is not necessary for protection of the workers in the factory, the Chief Inspector may by a certificate in writing, which he may at his discretion revoke at any time, exempt such factory from all or any of such provisions subject to such conditions, if any, as he may specify therein.

21. **Pictorial cautionary notice.**

- 1. Asbestos/asbestos dust which is used, handled or manipulated in this factory is a very hazardous to health.
- 2. Prolonged exposure to asbestos dust may lead to serious diseases like lung fibrosis (Asbestosis) and lung cancer.
- 3. Entry is prohibited without protective equipment.
- 4. Wear the Protective Equipments to safeguard your health.
- 5. No food stuffs or drinks shall be brought into this area.

Schedule B-XV

Handling or manipulation of corrosive substances

1. **Definitions.**ô For the purposes of this scheduleô

- (a) ôcorrosive operationö means an operation of manufacturing, storing, handling processing, packing, or using any corrosive substance in a factory; and
- (b) ôcorrosive substanceö includes sulphuric acid, nitric acid, hydrochloric acid, hydrofluoric acid, carboic acid, phosphoric acid, liquid chlorine, liquid bromine, ammonia, sodium hydroxide and potassium hydroxide and a mixture thereof, and any other substance which the State Government by notification in the Official Gazette specify to be corrosive substance.

2. **Flooring.**ô The floor of every workroom of a factory in which corrosive operation is carried on shall be made of impervious, corrosion and fire resistance material and shall be so constructed as to prevent collection of any corrosive substance. The surface of such flooring shall be smooth and cleaned as often as necessary and maintained in a sound condition.

3. **Protective equipment.**ô

- (a) the occupier shall provide for the use of all persons employed in any corrosive operation suitable protective wear for hands and feet, suitable aprons, face shields, chemical safety goggles, and respirators. The equipment shall be maintained in good order and shall be kept in clean and hygienic condition by suitably treating to get rid of the ill effects of any absorbed chemicals and by disinfecting. The occupier shall also provide suitable protective creams and other preparations wherever necessary.
- (b) The Protective equipment and preparations provided shall be used by the persons employed in any corrosive operation.

4. **Water facilities.**—Where any corrosive operation is carried on, there shall be provided as close to the place of such operation as possible, a source of clean water at a height of 210 centimetres from a pipe of 1.25 centimetres diameter and fitted with a quick acting valve so that in case of injury to the worker by any corrosive substance, the injured part can be thoroughly flooded with water. Whenever necessary, in order to ensure continuous water supply, a storage tank having a minimum length, breadth and height of 210 centimetres, 120 centimetres and 60 centimetres respectively or such dimensions as are approved by the Chief Inspector shall be provided as the source of clean water.

Schedule B-XVI

Processing of cashewnut

1. **Application.**ô This schedule shall apply to all factories in which roasting, scrubbing and shelling of cashewnuts or extracting oil from cashewnuts or cashewnut shells are carried on.

2. **Prohibition of employment of women and young persons.**ô No woman or young person shall be employed in any of the processes specified in paragraph 1 except in shelling of roasted cashewnuts.

3. **Protective clothing and equipment.**ô The occupier shall provide and maintain for the use of all persons employed in roasting and scrubbing of cashewnuts or extracting oil form cashewnuts or cashewnut shellsô

- (a) suitable rubber or washable leather gloves ;
- (b) suitable type of impervious aprons with sleeves to cover body down to knees and shoulders ; and
- (c) suitable type footwear to afford protection to feet and legs against cashewnut oil; and for the workers employed in cashewnut shelling, either ;
- (d) a protective ointment containing 10% of shellac, 5% of alcohol, 10% of sodium perborate, 5% of carbitol and 20% talc ; or
- (e) sufficient quantity of kaolin and coconut oil ; and
- (f) any other material or equipment, which the Chief Inspector of Factories may deem to be necessary for the protection of the workers.

4. **Use of protective clothing and equipment.**ô Every person employed in processes specified in paragraph 1 shall make use of protective clothing and equipment supplied and arrangements shall be made by the occupier to supervise the use, maintenance and cleanliness.

5. **Disposal of shells, ashes, or oil of cashewnut.**ô (1) shells, ashes or oil of cashewnut shall not be stored in any room in which workers are employed and shall be removed at least twice a day to any pit or enclosed place in the case shells and ashes and to closed containers kept in a separate room in the case of oil.

(2) No worker shall be allowed to handle shells or oil of cashewnuts without using the protective clothing or equipment provided under paragraph 3 above.

No. 45-a] The J&K Official Gazette, 9th Feb., 2021/20th Magha., 1942. 177
ô ô
worker, he shall make a record of his findings in the said certificate and the health register. The entry of his findings in those documents should also include the period for which he considers that the said person is unfit to work in the said process shall be provided with alternate placement facilities unless he is fully incapacitated in the opinion of the Certifying Surgeon, in which case the person affected shall be suitably rehabilitated.

(6) No person who has been found unfit to work as said in subparagraph (5) shall be re-employed or permitted to work in the said processes unless the Certifying Surgeon, after further examination, again certifies him fit for employment in those processes.

15. **Exemption.**ô The Chief Inspector of Factories may grant exemptions from the operation of any of these where he is satisfied that their observance is not necessary for safeguarding the health of the workers.

ôôôôôô

Schedule B-XVII

***Compression of oxygen and hydrogen produced
by electrolysis of water***

1. **Location of electrolyte plant.**ô The room in which electrolysis plant is installed shall be separate from the plant for storing and compressing the oxygen and hydrogen and also the electric generator room.

2. **Testing of purity.**ô

I. The purity of oxygen and hydrogen shall be tested by a competent person at least once in every shift at the following posts :-

(a) in the electrolysis room ;

(b) at the gas holder inlet ; and

(c) at the suction and of the compressor.

II. The purity figures shall be entered in a register and signed by the persons carrying out such test :

Provided, however, that if the electrolysis plant is fitted with automatic recorder of purity of oxygen and hydrogen with alarm lights, it shall be sufficient if the purity of gases is tested at the suction and of the compressor only.

3. **Restriction as to the compression.**ô The oxygen and hydrogen gases shall not be compressed if their purity as determined under paragraph 2 above falls below 98% at any time.

4. **Limit switch for gas holder.**ô The bell of any gas holder shall not be permitted to go within the 30 centimetres of its lowest position when empty and a limit switch shall be fitted to the gas holder in such a manner as to switch off the compressor motor when the limit is reached.

5. **Provision of negative pressure switch.**ô In addition to the limit switch in the gas holder, a sensitive negative pressure switch shall be provided in or adjacent to the suction main for hydrogen close to the gas holder and between the gas holder and the hydrogen compressor to switch off the compressor motor in the event of the gas holder being emptied to the extent as to cause vacuum.

6. **Purity of caustic soda.**ô The water and caustic soda used for making lye shall be chemically pure within pharmaceutical limits.

- IV. Boiler houses and other buildings where open flame processes are carried on shall be located at least 30 meters away from the solvent extraction plant; If godowns and preparatory processes are at a distance of less than 30 metres from the solvent extraction plant, these shall be at least 15 meters distant from the plant, and a continuous barrier wall of non-combustible material 1.5 meters high shall be erected at a distance of not less than 15 meters from the solvent extraction plant so that it extends to at least 30 meters of vapour travel around its ends from the plant to the possible sources of ignition.

3. **Electrical installations.**ô

- I. All electrical motors and wiring and other electrical equipment installed or housed insolvent extraction plant shall be of flameproof construction.
- II. All metal parts of the plant and building including various tanks and containers where solvents are stored or are present and all parts of electrical equipment not required to be energised shall be properly bonded together and connected to earth so as to avoid accidental rise in the electrical potential of such parts above the earth potential.

4. **Restriction on smoking.**ô Smoking shall strictly prohibited within 15 meters distance from solvent extraction plant. For this purpose, òNo smokingö signs shall be permanently displayed in the area.

5. **Precautions against friction.**ô

- I. All tools and equipment including ladders, chains and other lifting tackle required to be used in solvent extraction plant shall be of non-sparking type.
- II. No machinery or equipment in any solvent extraction plant shall be belt driven, unless the belt used is of such a type that it does not permit accumulation of static electricity to a dangerous level.
- III. No person shall be allowed to enter and work in the solvent extraction plant if wearing clothes made of nylon or such other fibre that can generate static electrical charge, or wearing footwear which is likely to cause sparks by friction.

6. Fire-fighting apparatus.

- I. Adequate number of portable fire extinguishers suitable for use against flammable liquid fires shall be provided in the solvent extraction plant.
- II. An automatic water spray sprinkler system on a wet pipe or open-head deluge system with sufficient supply of storage water shall be provided over solvent extraction plant and throughout the building housing such plant.

7. **Precautions against power failure.** Provision shall be made for the automatic cutting off of steam in the event of power failure and also for emergency overhead watersupply for feeding water by gravity to condensers which shall come into play automatically with the power failure.

8. **Magnetic Separators.** Oil cake shall be fed to the extractor by a conveyer through a hopper and a magnetic separator shall be provided to remove any pieces of iron during pressure in the event of fire.

9. Venting.

- I. Tanks containing solvents shall be protected with emergency venting to relieve excessive internal pressure in the event of fire.
- II. All emergency relief vents shall terminate at least 6 meters above the ground and be so located that vapours will not re-enter the building in which solvent extraction plant is located.

10. **Waste water.** Process waste water shall be passed through a flash evaporator to remove any solvent before it is discharged into a sump which should be located within the fenced area but not closer than 8 meters to the fence.

11. **Ventilation.** The solvent extraction plant shall be well ventilated and if the plant is housed in a building, the building shall be provided with mechanical ventilation with provision for at least six air changes per hour.

12. Housekeeping.

- I. Solvents shall not be stored in an area covered by solvent extraction plant except in small quantities which shall be stored in approved safety cans.
- II. Waste materials such as oily rags, other wastes and absorbents used to wipe off solvent and paints and oils

shall be deposited in approved containers and removed from the premises at least once a day.

- III. Space within the solvent extraction plant and within 15 meters from the plant shall be kept free from any combustible materials and any spills of oil or solvent, shall be cleaned up immediately.

13. Examination and repairs.ô

- I. The solvent extraction plant shall be examined by the competent person to determine any weakness or corrosion and wear once in every 12 months. Report of such examination shall be supplied to the Inspector with his observation as to whether or not the plant is in safe condition to work.
- II. No repairs shall be carried out to the machinery or plant except under the direct supervision of the competent person.
- III. Facility shall be provided for purging the plant with inert gas or steam before opening for cleaning or repairs and before introducing solvent after repairs.

14. Operating personnel.ô The operation of the plant and machinery in the solvent extraction plant shall be in the charge of such duly qualified and trained persons as are certified by the competent person to be fit for the purpose and no other person shall be allowed to operate the plant and machinery.

15. Employment of women and young persons.ô No woman or young person shall be employed in the solvent extraction plant.

16. Vapour detection.ô A suitable type of flameproof and portable combustible gas indicator shall be provided and maintained in good working order and a schedule of routine sampling of atmosphere at various locations as approved by the chief inspector shall be drawnout and entered in a register maintained for the purpose.

17. Exemption.ô If in respect of any factory, the Chief Inspector-cum-Facilitatoris satisfied that owing to the exceptional circumstances or infrequency of the processes or for any other reason, all or any of the provisions of this schedule is not necessary for the protection of the workers in the factory, the Chief Inspector-cum-Facilitator may by a certificate in writing(which he may in his discretion revoke at any time) exempt such factory from all or any of such provisions subject to conditions, if any, as he may specify therein.

No. 45-a] The J&K Official Gazette, 9th Feb., 2021/20th Magha., 1942. 185
under an efficient exhaust ventilation which shall be applied as near to the
point of generation as practicable.

6. Medical facilities and records of examinations and tests.—

- I. The occupier of every factory to which this schedule applies, shall
 - a) employ a qualified medical practitioner for medical surveillance of the workers employed therein whose employment shall be subject to the approval of the Chief Inspector of Factories ; and
 - b) Provide to the medical practitioner all the necessary facilities for the purpose referred to in clause (a).
- II. The record of medical examinations and appropriate tests carried out by the said medical practitioner shall be maintained in a separate, register approved by the Chief Inspector-cum-Facilitator, which shall be kept readily available for inspection by the Inspectorcum facilitator.

7. Medical examination by certifying Surgeon.

- I. Every worker employed in any manganese process shall be medically examined by a Certifying Surgeon within 15 days of his first employment. Such examinations shall include tests for detection of serum calcium, serum phosphate and manganese in blood and urine and also include steadiness tests and other neuro-muscular coordination tests. No worker shall be allowed to work after 15 days of his first employment in the factory unless certified for such employment by the Certifying Surgeon.
- II. Every worker employed in a manganese process shall be re-examined by a Certifying Surgeon at least once in every three calendar months and such examination shall, wherever the Certifying Surgeon considers appropriate, include all the tests in sub-paragraph (I).
- III. The Certifying Surgeon after examining a worker shall issue a Certificate of Fitness in Form XXIII. The record of examination and re-examinations carried out shall be entered in the Certificate and the Certificate shall be kept in the custody of the manager of the factory. The record of each examination carried out under sub-paragraph (I) and (II), including the nature and the

results of this test, shall also be entered by the certifying Surgeon in a health register in Form XXIV.

- IV. The Certificate of Fitness and the health register shall be kept readily available for inspection by the Inspectorcum facilitator.
- V. If at any time the Certifying Surgeon is of the opinion that a worker is no longer fit for employment in the said processes on the ground that continuance therein would involve special danger to the health of the worker, he shall make a record of his findings in the said certificate and the health register. The entry of his findings in those documents should also include the period for which he considers that the said person is unfit to work in the said process shall be provided with alternate placement facilities unless he is fully incapacitated in the opinion of the Certifying Surgeon, in which case the person affected shall be suitably rehabilitated.
- VI. No person who has been found unfit to work as said in sub-paragraph (5) shall be re-employed or permitted to work in the said processes unless the Certifying Surgeon, after further examination, again certifies him fit for employment in those processes.

8. Personal protective equipment.—

- I. The occupier of the factory shall provide and maintain in good and clean condition suitable overalls and head coverings for all persons employed in any manganese process and such overalls and head coverings shall be worn by the persons while working on a manganese process.
- II. The occupier of the factory shall provide suitable respiratory protective equipment for use by works in emergency to prevent inhalation of dusts, fumes or mists. Sufficient number of complete sets of such equipment shall always be kept near the work place and the same shall be properly maintained and kept always in a condition to be used readily.
- III. The occupier shall provide and maintain for the use of all persons employed, suitable accommodation for the

188 The J&K Official Gazette, 9th Feb., 2021/20th Magha, 1942. [No. 45-a
arrangement shall be made by the occupier to instruct periodically all workers
employed in a manganese process regarding the health hazards connected
with their duties and the best preventive measures and methods to protect
themselves. The notices shall always be maintained in a legible condition.

APPENDIX

CAUTIONARY NOTICE

Manganese and Manganese Compounds

1. Dust free and mists of manganese and its compounds are toxic when inhaled or when ingested.
2. Do not consume food or drink near the work place.
3. Take a good wash before taking meals.
4. Keep the working area clean.
5. Use the protective clothing and equipment provided.
6. When required to work in situations where dusts, fumes or mists are likely to be inhaled, use respiratory protective equipment provided for the purpose.
7. If you get severe headaches, prolonged sleeplessness or abnormal sensations in the body, report to the manager who would make arrangements for your examination and treatment.

óóóóóó

- III. Work-benches where dangerous pesticides are manipulated shall be made of smooth, non-absorbing material preferably stainless steel and shall be cleaned at least once daily.

9. Spillage and waste.—

- I. If a dangerous pesticide during its manipulation splashes or spills on the work-bench, floor or on the protective clothing worn by a worker, immediate action shall be taken for through decontamination of such areas or articles.
- II. Cloth, rags, paper or other material soaked or soiled with a dangerous pesticide shall be deposited in a suitable receptacle with tight fitting cover. Contaminated waste shall be destroyed by burning at least once a week.
- III. Suitable deactivating agents, where available, shall be kept in a readily accessible place for use while attending to a spillage.
- IV. Easy means of access shall be provided to all parts of the plant for cleaning, maintenance and repairs.

10. Empty containers used for dangerous pesticides.ô

Containers used for dangerous pesticides shall be thoroughly cleaned of their contents and treated with an inactivating agent before being discarded or destroyed.

11. Manual handling.ô

- I. A dangerous pesticide shall not be required or allowed to be manipulated by hand except by means of a long handled scoop.
- II. Direct contact of any part of the body with a dangerous pesticide during its manipulation shall be avoided.

12. Ventilation.—

- I. In every workroom or area where a dangerous pesticide is manipulated, adequate ventilation shall be provided at all times by the circulation of fresh air.
- II. Unless the process is completely enclosed, the following operations during manipulation of a dangerous pesticide shall not be undertaken without an efficient exhaust draught :ô
- (a) emptying a container holding a dangerous pesticide ;

- (b) blending a dangerous pesticide ;
 - (c) preparing a liquid or powder formulation containing a dangerous pesticide ; and
 - (d) Changing or filling a dangerous pesticide into a container, tank hopper or machine or small sized containers.
- III. In the event of a failure of the exhaust draught provided on the above operation, the said operations shall be stopped forthwith.

13. Time allowed for washing.

- I. Before each meal and before the end of the day's work at least ten minutes in addition to the regular rest interval shall be allowed for washing to each worker engaged in the manipulation of dangerous pesticide.
- II. Every worker engaged in the manipulation of dangerous pesticides shall have a thorough wash before consuming any food and also at the end of the day's work.

14. Washing and bathing facilities.—

- I. There shall be provided and maintained in a clean state and in good repair for the use of all workers employed in the factory where the said manufacturing process is carried on, adequate washing and bathing places having a constant supply of water under cover at the rate of one such place for every 5 persons employed.
- II. The washing places shall have standpipes placed at intervals of not less than one meter.
- III. Not less than one half of the total number of washing places shall be provided with bathrooms.
- IV. Sufficient supply of clean towels made of suitable material shall be provided :

Provided that such towels shall be supplied individually for each worker is so ordered by the Inspector.
- V. Sufficient supply of soap and nail brushes shall be provided.

15. **Cloakroom.**ô There shall be provided and maintained for the use of all workers employed in the factory where the said manufacturing process is carried onô

- (a) a cloakroom for clothing put off during working hours with adequate arrangements for drying clothing, if wet; and
- (b) separate and suitable arrangements for the storage of protective clothing provided under paragraph 7.

16. **Mess room.**—

- I. There shall be provided and maintained for the use of all workers employed in the factory in which the said manufacturing process is carried on and remaining on the premises during the rest intervals, suitable mess room which shall be furnished withô
 - (a) Sufficient tables and benches with back rest, and
 - (b) Adequate means for warming food.
- II. The mess room shall be placed under the charge of responsible person and shall be kept clean.

17. **Manipulation not be undertaken.**ô Manufacture or manipulation of a pesticides shall not be undertaken in any factory unless a certificate regarding its dangerous nature or otherwise is obtained from the Chief Inspector-cum-Facilitator.

18. **Medical facilities and records of examinations and tests.**—

- I. The occupier of every factory to which this schedule applies, shallô
 - (a) Employ a qualified medical practitioner for medical surveillance of the workers employed therein whose employment shall be subject to the approval of the Chief Inspector of Factories ; and
 - (b) Provide to the medical practitioner all the necessary facilities for the purpose referred to in clause (a).
- II. The record of such examinations carried out by the medical practitioner shall be maintained in a separate, register approved by the Chief Inspector of Factories, which shall be kept readily available for inspection by the Inspector.

19. Medical examination by certifying Surgeon.—

- I. Every worker employed in the processes specified in paragraph 1 shall be examined by a Certifying Surgeon within 15 days of his first employment. Such examinations in respect of Halogenated Pesticides, shall include tests for determination of chemical in blood and in fat tissues, E.E.G abnormalities and memory tests. In respect of organic phosphate compounds, such examinations shall include tests for depression of cholinesterase in plasma and red blood cells. No worker shall be allowed to work after 15 days of his first employment in the factory unless certified fit for such employment by the Certifying Surgeon.
- II. Every worker employed in the said process shall be re-examined by a Certifying Surgeon at least once in every six calendar months. Such examination shall, wherever the Certifying Surgeon considers appropriate, include the tests specified in sub-paragraph (I). Further every worker employed in the said processes shall also be examined once in every three months by the factory medical officer.
- III. The Certifying Surgeon after examining a worker, shall issue a Certificate of Fitness in Form XXIII. The record of examination and re-examinations carried out shall be entered in the Certificate and the Certificate shall be kept in the custody of the manager of the factory. The record of each examination carried out under sub-paragraph (I) and (II), including the nature and the results of these test, shall also be entered by the certifying Surgeon in a health register in Form XXIV.
- IV. The Certificate of Fitness and the health register shall be kept readily available for inspection by the Inspector.
- V. If at any time the Certifying Surgeon is of the opinion that a worker is no longer fit for employment in the said processes on the ground that continuance therein would involve special danger to the health of the worker, he shall make a record of his findings in the said certificate and the health register. The entry of his findings in those documents should also include the period for which he considers that the said person is unfit to work in the said

process shall be provided with alternate placement facilities unless he is fully incapacitated in the opinion of the Certifying Surgeon, in which case the person affected shall be suitably rehabilitated.

- VI. No person who has been found unfit to work as said in sub-paragraph (V) shall be re-employed or permitted to work in the said processes unless the Certifying Surgeon, after further examination, again certifies him fit for employment in those processes.

z . . **Exemption.**ô If in respect of any factory the Chief Inspector-cum-Facilitator is satisfied that owing to the exceptional circumstances or the infrequency of the said manufacturing process or for any other reason which shall record in writing all or any of the provisions of this Part are not necessary for the protection of workers employed in the factory, he may by a certificate in writing exempt such factory, from all or any of the provisions on such condition as he may specify thereinô

APPENDIX

CAUTIONARY NOTICE

Insecticides and pesticides

1. Chemicals handled in this plant are poisonous substances.
2. Smoking, eating food or drinking, chewing tobacco in this area is prohibited. No food stuff or drink shall be brought in this area.
3. Some of these chemicals may be absorbed through skin and may cause poisoning.
4. A good wash shall be taken before meals.
5. A good bath shall be taken at the end of this shift.
6. Protective clothing and equipment supplied shall be used while working in this area.
7. Containers of pesticides shall not be used for keeping food stuffs.
8. Spillage of the chemicals on any part of the body or on the floor or workbench shall be immediately washed away with water.
9. Clothing contaminated due to splashing shall be removed immediately.
10. Scrupulous cleanliness shall be maintained in this area.

- III. The Certifying Surgeon after examining a worker, shall issue a Certificate of Fitness in Form XXIII. The record of examination and re-examinations carried out shall be entered in the Certificate and the Certificate shall be kept in the custody of the manger of the factory. The record of each examination carried out under sub-paragraph (I) and (II), including the nature and the results of this test, shall also be entered by the Certifying Surgeon in a health register in Form XXIV.
- IV. The Certificate of Fitness and the health register shall be kept readily available for inspection by the Inspector.
- V. If at any time the Certifying Surgeon is of the opinion that a worker is no longer fit for employment in the said processes on the ground that continuance therein would involve special danger to the health of the worker, he shall make a record of his findings in the said certificate and the health register. The entry of his findings in those documents should also include the period for which he considers that the said person is unfit to work in the said process shall be provided with alternate placement facilities unless he is fully incapacitated in the opinion of the Certifying Surgeon , in which case the person affected shall be suitably rehabilitated.
- VI. No person who has been found unfit to work as said in sub-paragraph (5) shall be re-employed or permitted to work in the said processes unless the Certifying Surgeon, after further examination, again certifies him fit for employment in those processes.

APPENDIX-A

1. Production of benzene
2. Process where benzene is used for chemical synthesis
3. Motor spirits (used as fuel)

APPENDIX-B

[See Paragraph 11 of this Schedule]

CAUTIONARY NOTICE

Benzene and substances containing benzene

No. 45-a] The J&K Official Gazette, 9th Feb., 2021/20th Magha., 1942. 207
ô ô
or spark in buildings in which carbon disulphide is refined or stored, and a notice in the language understood by a majority of the workers shall be posted in the plant prohibiting smoking and carrying of matches, fire or naked light or other means of producing naked light or spark into such rooms.

13. **Means of escape.** Adequate means of escape shall be provided and maintained to enable persons to move to a safe place as quickly as possible in case of an emergency. At least two independent staircases of adequate width shall be provided in every building housing the furnaces at reasonable intervals at opposite ends. These shall always be kept clear of all obstructions and so designed to afford easy passage.

14. **Warnings in case of fire.** There shall be adequate arrangements for giving warnings in case of fire or explosion which shall operate on electrically and in case of failure of electricity by some mechanical means.

15. **Fire-fighting equipment.—**

- I. Adequate number of suitable fire extinguishers or other fire-fighting equipment shall be kept in constant readiness for dealing with risks involved and depending on the amount and nature of materials stored.
- II. Clear instructions as to how the extinguishers or other equipment should be used printed in the language which the majority of the workers employed understand, shall be affixed to each extinguisher or other equipment and the personnel trained in their use.

16. **Bulk Sulphur.—**

- I. Open or semi-enclosed spaces for storage of bulk sulphur shall be sited with due regard to the dangers which may arise from sparks given off by nearby locomotives, etc., and precautions shall be taken to see that flames, smoking and matches and other sources of ignition do not come in contact with the clouds of dust arising during handling of bulk sulphur.
- II. All enclosures for bulk sulphur shall be of non-combustible construction, adequately ventilated and so designed as to provide a minimum of ledges on which dust may lodge.
- III. The bulk sulphur in the enclosures shall be handled in such a manner as to minimise the formation of dust clouds and no flame, smoking and matches or other sources of ignition shall

212 The J&K Official Gazette, 9th Feb., 2021/20th Magha, 1942. [No. 45-a
processes when there is danger of injury during the performance of normal
duties or in the event of emergency :ô

- (a) rubber hand-gloves ;
- (b) rubber aprons ; and
- (c) airline respirators or other suitable respiratory protective equipment.

(3) It shall be the responsibility of the manager to maintain all items of personal protective equipment in a clean and hygienic condition and in good repair.

8. Prohibition relating to employment of women and young persons.ô No woman or young person shall be employed or permitted to work in any room in which the said processes are carried on.

9. Floors of workroom.ô The floor of every workroom in which the said processes are carried on shall beô

- (a) smooth and impervious to water provided that asphalt or tar shall not be used in the composition of the floor ;
- (b) maintained in a state of good repair ;
- (c) with a suitable slope for easy draining and provided with gutters ; and
- (d) thoroughly washed daily with the drain water being led into a sewer through a closed channel.

10. Disposal of empty containers.ô Empty containers used for holding controlled substances shall be thoroughly cleaned of their contents and treated with an inactivating agent before being discarded.

11. Manual handling.ô Controlled substances shall not be allowed to be mixed, filled, emptied or handled except by means of a scoop with a handle. Such scoop shall be thoroughly cleaned daily.

12. Instructions regarding risk.ô Every worker on his first employment in the said processes shall be fully instructed on the properties of the toxic chemicals to which he is likely to be exposed to, of the dangers involved and the precautions to be taken. Workers shall also be instructed on the measures to be taken to deal with an emergency.

13. Cautionary placards.ô Cautionary placards in the form specified in appendix attached to this schedule and printed in the language of the majority of the workers employed in the said processes shall be affixed in prominent places frequented by them in the factory, where the

No. 45-a] The J&K Official Gazette, 9th Feb., 2021/20th Magha., 1942. 213
placards can be conveniently read. Arrangements shall be made by the manager to instruct periodically all such workers regarding the precautions contained in the cautionary placards.

14. **Obligations of the workers.** It shall be the duty of the persons employed in the said processes to submit themselves for the medical examination including exfoliative cytology of urine by the Certifying Surgeon or the qualified medical practitioner as provided for under these rules.

15. **Washing and bathing facilities.** (1) The following washing and bathing facilities shall be provided and maintained in a clean state and in good repair for the use of all workers employed in the said processes :

- (a) a wash place under cover having constant supply of water and provided with clean towels, soap and nail brushes and with at least one stand pipe for every five such workers ;
- (b) 50 per cent of the stand pipes provided under clause (a) shall be located in bathrooms where both hot and cold water shall be made available during the working hours of the factory and for one hour thereafter ;
- (c) the washing and bathing facilities shall be in close proximity of the area housing the said processes ;
- (d) clean towels shall be provided individually to each worker ; and
- (e) in addition to the taps mentioned under clause (a), one stand pipe, in which warm water is made available, shall be provided on each floor.

(2) Arrangement shall be made to wash factory uniforms and other work clothes everyday.

16. **Food, drinks, etc. prohibited in workroom.** No worker shall consume food, drink, pan, supari or tobacco or shall smoke in any workroom in which the said processes are carried on and no worker shall remain in any such room during intervals for meals or rest.

17. **Cloakroom.** There shall be provided and maintained in a clean state and in good repair for the use of the workers employed in the said processes

- (a) a cloakroom with lockers having two compartments-one for street clothes and the other for work clothes ; and
- (b) a place separate from the locker room and the messroom, for the storage of protective equipment provided under

214 The J&K Official Gazette, 9th Feb., 2021/20th Magha, 1942. [No. 45-a
paragraph 7. The accommodation so provided shall be under
the care of a responsible person and shall be kept clean.

18. **Messroom.** There shall be provided and maintained for the use of workers employed in the said processes who remain on the premises during the meal intervals, a messroom which shall be furnished with tables and benches and provided with suitable means for warming food.

19. **Time allowed for washing.** Before the end of each shift 30 minutes shall be allowed for bathing for each worker who is employed in the said processes. Further, atleast 10 minutes shall be allowed for washing before each meal in addition to the regular time allowed for meals.

20. **Restriction on age of persons employed.** No worker under the age of 40 years shall be engaged in the factory in the said processes for the first time after the date on which the schedule comes into force.

21. **Medical facilities and records of examinations and tests.**

- (1) The occupier of every factory to which this schedule applies, shall
 - (a) employ a qualified medical practitioner for medical surveillance of the workers employed therein whose employment shall be subject to the approval of the Chief Inspector of Factories ; and
 - (b) provide to the medical practitioner all the necessary facilities for the purpose referred to in clause (a).

(2) The record of such examinations carried out by the medical practitioner shall be maintained in a separate register approved by the Chief Inspector of Factories, which shall be kept readily available for inspection by the Inspector.

22. **Medical examination by Certifying Surgeon.** (1) Every worker employed in the processes specified in paragraph 1 shall be examined by a Certifying Surgeon within 15 days of his first employment. Such examinations shall include skin test for dermatitis and no worker shall be allowed to work after 15 days of his first employment in the factory unless certified fit for such employment by the Certifying Surgeon.

(2) Every worker employed in a manganese process shall be re-examined by a Certifying Surgeon at least once in every three calendar months and such examination shall, wherever the Certifying Surgeon considers appropriate, include all the tests in sub-paragraph (1).

(3) The Certifying Surgeon after examining a worker, shall issue a Certificate of Fitness in Form XXIII. The record of examination and re-examinations carried out shall be entered in the Certificate and the

Certificate shall be kept in the custody of the manger of the factory. The record of each examination carried out under sub-paragraph (1) and (2) , including the nature and the results of these test, shall also be entered by the Certifying Surgeon in a health register in Form XXIV.

(4) The Certificate of Fitness and the health register shall be kept readily available for inspection by the Inspector.

(5) If at any time the Certifying Surgeon is of the opinion that a worker is no longer fit for employment in the said processes on the ground that continuance therein would involve special danger to the health of the worker, he shall make a record of his findings in the said certificate and the health register. The entry of his findings in those documents should also include the period for which he considers that the said person is unfit to work in the said process shall be provided with alternate placement facilities unless he is fully incapacitated in the opinion of the Certifying Surgeon , in which case the person affected shall be suitably rehabilitated.

(6) No person who has been found unfit to work as said in sub-paragraph (5) shall be re-employed or permitted to work in the said processes unless the Certifying Surgeon , after further examination, again certifies him fit for employment in those processes.

23. Exemptions-prohibited substances.ô (1) The Chief Inspector may by a certificate in writing (which he may at his discretion revoke at any time), subject to such conditions, if any, as may be specified therein, exempt any process in the course of which any of the prohibited substances is formed, processed, manufactured, handled, or used, form the provisions of paragraph 5 if he is satisfied that the process is carried out in a totally enclosed and hermetically sealed system in such a manner that the prohibited substance is not removed from the system except in the quantities no greater than that required for the purpose of control, of the process or such purposes as is necessary to ensure that the product is free from any of the prohibited substances.

(2) The Chief Inspector may allow the manufacture, handling or use of benzidine hydrochloride provided that all the processes in connection with it are carried out in a totally enclosed system in such a manner that no prohibited substance other than benzidine hydrochloride is removed therefrom except in quantities no greater than that required for the purpose of control of the processes or such purposes as is necessary to ensure that the product is free from prohibited substances and that adequate steps are taken to ensure that benzidine hydrochloride is, except while not in a totally enclosed system, kept wet not less than one part of water to two parts of benzidine hydrochloride at all times.

Table 1

Permissible exposure in cases of continuous noise

Total time of exposure (continuous dBA Sound pressure level in or a per day, in hours number of short term exposures) :

8 90
6 92
4 95
3 97
2 100
1 ½ 102
1 105
¾ 107
½ 110
¼ 115

- Notes :** 1. No exposure in excess of 115 dBA is to be permitted.
2. For any period of exposure falling in between any figure and the next higher or lower figure as indicated in column 1, the permissible sound pressure level is to be determined by extrapolation on a proportionate basis.

oooooooo

Table 2

Permissible exposure levels of impulsive or impact noise

Peak sound pressure level in dB Permitted number of impulses or impact per day :

140 100
135 315
130 1,000
125 3,160
120 10,000

- Notes :** 1. No exposure in excess of 140 dB peak sound pressure level is permitted.

2. For any peak sound pressure level falling in between any figure and the next higher or lower figure as indicated in column 1, the permitted number of impulses or impacts per day is to be determined by extrapolation on a proportionate basis.
3. For the purposes of this schedule, if the variations in the noise level involve maximum at intervals of one second or less, the noise is to be considered as a continuous one and the criteria given in Table 1 would apply. In other cases, the noise is to be considered as impulsive or impact noise and the criteria given in Table 2 would apply.
4. When the daily exposure is composed of two or more periods of noise exposure at different levels their combined effect should be considered, rather than the individual effect of each. The mixed exposure should be considered to exceed the limit value if the sum of the fractions $C1/T1 + C2/T2 + \dots + Cn/Tn$ exceeds unity, - Where the C1, C2 etc. indicate the total time of actual exposure at a specified noise level and T1, T2, etc. denote the time of exposure of less than 90 dBA may be ignored in the above calculation.
5. Where it is not possible to reduce the noise exposure to the levels specified in Point (1) of the Note by reasonably practicable engineering control or administrative measures, the noise exposure shall be reduced to the greatest extent feasible by such control measures, and each worker so exposed shall be provided with suitable ear protectors so as to reduce the exposure to noise to the levels specified in Point (1) of the Note.
6. Where the ear protectors provided in accordance with subparagraph (2) and worn by a worker cannot still attenuate the noise reaching near his ear, as determined by subtracting the attenuation value in dBA of the ear protectors concerned from the measured sound pressure level, to a level permissible under Table 1 or Table 2 as the case may be, the noise exposure period shall be suitably reduced to correspond to the permissible noise exposures specified in point (1) of the Note.
7. (a) In all cases where the prevailing sound levels exceed the permissible levels specified in point (1) of the Note there shall be administered an effective hearing conservation

programme which shall include among other hearing conservation measures, pre-employment and periodical auditory surveys conducted on workers exposed to noise exceeding the permissible levels, and rehabilitation of such workers either by reducing the exposure to the noise levels or by transferring them to places where noise levels are relatively less or by any other suitable means ;

- (b) Every worker employed in areas where the noise exceeds the maximum permissible exposure levels specified in point (1) of the Note shall be subjected to any auditory examination by a Certifying Surgeon within 14 days of his first employment and thereafter, shall be re-examined at least once every 12 months. Such initial and periodical examinations shall include tests which the Certifying Surgeon may consider appropriate and shall include determination of auditory thresholds for pure tones of 125, 250, 500, 1000, 2000, 4000 and 8000 cycles per second.

to control the concentration of carbon-disulphide and hydrogen sulphide in the air at the following locations :ô

- (a) dumping hoppers of dry churns ;
- (b) spinning machines ;
- (c) trio rollers and cutters used in staple fibre spinning ;
- (d) gydro-extractors for yarn cakes ;
- (e) after treatment processes ; and
- (f) spin baths.

III. In so far as the spinning machines and trio rollers and cutters used in staple fibre spinning are concerned, they shall be, for the purpose of ensuring the effectiveness of the exhaust draft to be provided as required in sub-paragraph (1), enclosed as fully as practicable and provided with suitable shutters in sections to enable the required operations to be carried out without giving rise to undue quantities of carbon-di-dulphide escaping to the work environment.

IV. No dry churn shall be opened after completion of reaction without initially exhausting the residual vapours of carbon-di-sulphide by operation of a suitable and efficient arrangement for exhausting the vapours which shall be continued to be operated as long as the churn is kept opened.

V. Whenever any ventilation apparatus normally required for the purpose of meeting the requirements in sub-paragraphs (II), (III), and (IV) is ineffective, fails, or is stopped for any purpose whatsoever, all persons shall be required to leave the work areas where the equipment or processes specified in the above said sub-paragraphs are in use, as soon as possible, and in any case not later than 15 minutes after such an occurrence.

VI. (a) All ventilating systems provided for the purposes as required in sub-paragraphs (II), (III) and (IV) shall be examined and inspected once every week by a responsible person. It shall be thoroughly examined and tested by a competent person once in every period of 12 months. Any defects found by such examinations or test shall be rectified forthwith ;

8. Protective equipment.

I. the occupier shall provide and maintain in good condition protective equipment as specified in the Table for use of persons employed in the processes referred to therein.

Table

No.	Process	Protective equipment
1.	Dumping	Overalls, face-shields, gloves and footwear all made of suitable material
2.	Spinning	Suitable aprons, gloves and footwear
3.	Process involving or likely to involve contact with viscose solution	Suitable gloves and footwear
4.	Handling of sulphur	Suitable chemical goggles
5.	Any other process involving contact with hazardous chemicals	Protective equipment as may be directed by the Chief Inspector by an order in writing

II. A suitable room, rooms or lockers shall be provided exclusively for the storage of all protective equipment supplied to workers and no such equipment shall be stored at any place other than the room, rooms or lockers so provided.

9. Breathing apparatus.

I. There shall be provided in every factory where fume process is carried on, sufficient supply of

- (a) breathing apparatus ;
- (b) oxygen and a suitable appliances for its administration ;
and
- (c) life belts.

II. (a) The breathing apparatus and other appliances referred to in sub-paragraph (I) shall be maintained in good condition and kept in appropriate locations so as to be readily available ;

- (b) The breathing apparatus and other appliances referred at (a) and (b) of sub-paragraph (I) shall be cleaned and disinfected at suitable intervals and thoroughly inspected once every month by a responsible person ;
 - (c) A record of the maintenance of the condition of the breathing apparatus and other appliances referred to in sub- paragraph (I) shall be entered in a register provided for that purpose which shall be readily available for inspection by an Inspector.
- III. Sufficient number of workers shall be trained and periodically retrained in the use of breathing apparatus and administering artificial respiration so that at least 2 such trained persons would be available during all the working hours in each room in which fume process is carried on.
- IV. Breathing apparatus shall be kept properly labeled in clean, dry, light-proof cabinets and if liable to be affected by fumes, shall be protected by placing them in suitable containers.
- V. No person shall be employed to perform any work for which breathing apparatus is necessary to be provided under sub-paragraph (1) unless he has been fully instructed in the proper use of that equipment.
- VI. No breathing apparatus provided in pursuance of sub-paragraph (1) which has been worn by a person shall be worn by another person unless it has been thoroughly cleaned and disinfected since last being worn and the person has been fully instructed in the proper use of that equipment.
10. **Electric fittings.**ô All electric fittings in any room in which carbon-di-sulphide is produced, used or given off or is likely to be given off into the work environment, other than a spinning room, shall be of flame-proof construction and all electric conductors shall either be enclosed in metal conduits or be lead-sheathed.
11. **Prohibition relating to smoking, etc.**ô No person shall smoke or carry matches, fire or naked light or other means of producing a naked light or spark in a room in which fume process is carried on. A notice in the language understood by the majority of the workers shall be posted a prominent locations in the plant prohibiting smoking and carrying of matches,

226 The J&K Official Gazette, 9th Feb., 2021/20th Magha, 1942. [No. 45-a
fire or naked light or other means of producing naked light or spark into
such rooms :

Provided that fire, naked light or other means of producing a naked
light of spark may be carried on in such room only when required for the
purposes of the process itself under the direction of a responsible person.

12. Washing and bathing facilities.

- I. There shall be provided and maintained in a clean state and in good repair for the use of all workers employed and in the processes covered by the schedule, adequate washing and bathing places having a constant supply of water under cover at the rate of one such place for every 25 persons employed.
- II. The washing places shall have standpipes placed at intervals of not less than one meter.
- III. Not less than one half of the total number of washing places shall be provided with bathrooms.
- IV. Sufficient supply of clean towels made of suitable material shall be provided :
Provided that such towels shall be supplied individually for each worker if so ordered by the Inspector.
- V. Sufficient supply of soap and nail brushes shall be provided.

13. Rest Room.

- I. A rest room shall be provided for the workers engaged in doffing operations of filament yarn spinning process.
- II. Such rest room shall be provided with fresh air supply and adequate seating arrangement.

14. Cautionary notice and instructions—

- I. The following cautionary notice shall be prominently displayed in each fume process room :

Cautionary Notice.

- i. Carbon disulphide (CS₂) and Hydrogen Sulphide (H₂S) which may be present in this room are hazardous to health ;
- ii. Follow safety instructions ;

- iii. Use protective equipment and breathing apparatus as and when required ;
- iv. Smoking is strictly prohibited in this area.

This notice shall be in a language understood by the majority of the workers and displayed where it can be easily and conveniently read. If any worker is illiterate, effective steps shall be taken to explain carefully to him the contents of the notice so displayed.

- II. Arrangements shall be made to instruct each worker employed in any room in which a fume process is carried on regarding the health hazards connected with their work and the preventive measures and methods to protect themselves. Such instructions shall be given on his first employment and repeated periodically.
- III. Simple and special instructions shall be framed to ensure that effective measures will be carried out in case of emergency involving escape of carbondi-sulphide and hydrogen sulphide. Those instructions shall be displayed in the concerned areas and workers shall be instructed and trained in the actions to be taken in such emergencies.

15. Medical facilities and records of examinations and tests.ô

- I. The occupier of every factory to which this schedule applies, shallô
 - (a) employ a qualified medical practitioner for medical surveillance of the workers employed therein whose employment shall be subject to the approval of the Chief Inspector of Factories ; and
 - (b) Provide to the said medical practitioner all the necessary facilities for the purpose referred at (a).
- II. The record of such examinations carried out by the medical practitioner shall be maintained in a separate, register approved by the Chief Inspector of Factories, which shall be kept readily available for inspection by the Inspector.

16. Medical examination by certifying Surgeon.ô

- I. Every worker employed in the processes specified in paragraph 1 shall be examined by a Certifying Surgeon within days of his first employment. Such examinations

No. 45-a] The J&K Official Gazette, 9th Feb., 2021/20th Magha., 1942. 229
ô ô
the processes or for any other reason, all or any of the provisions of this
schedule is not necessary for the protection of the workers in the factory,
the Chief Inspector may be a certificate in writing which he may in his
discretion revoke at any time, exempt such factory from all or any of such
provisions subject to such conditions, if any, as he may specify therein.

5. Preventing Formation of Flammable Mixture with Air.—

Wherever there is a possibility for leakage or spill of highly flammable liquid or flammable compressed gas from any equipment, pipeline, valve, joint or other part of a system, all practicable measures shall be taken to contain, drain off or dilute such spills or leakage as to prevent formation of flammable mixture with air.

6. Prevention of Ignition.ô In every room, work place or other location where highly flammable liquid or flammable combustible gas is stored, conveyed, handled or used or where there is danger of fire or explosion from accumulation of highly flammable liquid or flammable compressed gas in air, all practicable measures shall be taken to exclude the sources of ignition. Such precautions shall include the following :ô

- (a) All electrical apparatus shall either be excluded from the area of risk or they shall be of such construction and so installed and maintained as to prevent the danger of their being a source of ignition ;
- (b) Effective measures shall be adopted for prevention of accumulation of static charges to a dangerous extent ;
- (c) no person shall wear or be allowed to wear any foot wear having iron or steel nails or any other exposed ferrous materials which is likely to cause sparks by friction ;
- (d) Smoking, lighting or carrying of matches, lighters or smoking materials shall be prohibited ;
- (e) Transmission belts with iron fasteners shall not be used ; and
- (f) all other precautions, as are reasonably practicable, shall be taken to prevent initiation of ignition from all other possible sources such as open flames, frictional sparks, overheated surfaces of machinery or plant, chemical or physical-chemical reaction and radiant heat.

7. Prohibition of smoking.ô No person shall smoke in any place where highly flammable liquid or flammable compressed gas is present in circumstances that smoking would give a risk of life. The occupier shall take all practicable measures to ensure compliance with this requirement including display of a bold notice indicating prohibition of smoking at every place where this requirement applies.

8. Fire Fighting.ô In every factory where highly flammable liquid or flammable compressed gas is manufactured, stored, handled or used, appropriate and adequate means of fighting a fire shall be provided.

232 The J&K Official Gazette, 9th Feb., 2021/20th Magha, 1942. [No. 45-a
The adequacy and suitability of such means which expression includes the
fixed and portable fire extinguishing systems, extinguishing material,
procedures and the process of fire fighting, shall be to the standards and
levels prescribed by the Indian Standards applicable.

9. **Exemptions.**—If in respect of any factory, the Chief Inspector
is satisfied that owing to the exceptional circumstances or infrequency of
the processes or for any other reason, all or any of the provisions of this
schedule is not necessary for the protection of the workers in the factory,
the Chief Inspector may be a certificate in writing which he may in his
discretion revoke at any time, exempt such factory from all or any of such
provisions subject to such conditions, if any, as he may specify therein.

óóóóóóóó

- (c) Calcined aluminous fire clay ;
 - (d) Sillimanite ;
 - (e) Calcined or fused alumina ;
 - (f) Olivine ;
 - (g) Natural sand.
- II. Dust or other matter deposited from a fettling or blasting process shall not be used as a parting material or as a constituent in a parting material.

4. **Arrangement and storage.**—For the purposes of promoting safety and cleanliness in workrooms the following requirements shall be observed :ô

- (a) moulding boxes, loam plates, ladles, patterns, pattern plates, frames, boards, box weights, and other heavy articles shall be so arranged and placed as to enable work to be carried on without unnecessary risk ;
- (b) Suitable and conveniently accessible racks, bins, or other receptacles shall be provided and used for the storage of other gear and tools ;
- (c) Where there is bulk storage of sand, fuel, metal scrap or other materials or residues, suitable bins, bunkers or other receptacles shall be provided for the purpose of such storage.

5. **Construction of floors.**—

- I. Floors of indoor workplaces in which the processes are carried on, other than parts which are of sand, shall have been surface of hard material.
- II. No part of the floor of any such indoor workplace shall be of sand except where this is necessary by reason of the work done.
- III. All parts of the surface of the floor of any such indoor workplace which are of sand shall, so far as practicable, be maintained in an even and firm condition.

6. **Cleanliness of indoor workplaces.**—

- I. All accessible parts of the walls of every indoor workplace in which the processes are carried on and of everything

applies, sufficient and clearly defined main gangway shall be provided and properly maintained whichô

- (a) shall have an even surface of hard material and shall, in particular, not be of sand or have on them more sand than is necessary to avoid risk of flying metal from accidental spillage ;
- (b) shall be kept, so far as reasonably practicable, free from obstruction ;
- (c) if not used for carrying molten metal, shall be at least 920 millimetres in width ;
- (d) if used for carrying molten metal shall beô
 - i. Where truck ladles are used exclusively, at least 600 millimetres wider than the overall width of the ladle ;
 - ii. Where hand shanks are carried by not more than two men, at least 920 millimetres in width ;
 - iii. Where hand shanks are carried by more than two men, at least 1.2 meters in width ; and
 - iv. Where used for simultaneous travel in both directions by men carrying hand shanks, at least 1.8 metres in width.

II. In workroom to which this Paragraph applies constructed, reconstructed or converted for use as such after the making of this Schedule, sufficient and clearly defined pouring aisles shall be provided and properly maintained whichô

- (a) shall have an even surface of hard material and shall, in particular, not be sand or have on them more sand than is necessary to avoid risk of flying metal from accidental spillage ;
- (b) Shall be kept so far as reasonably practicable free from obstruction ;
- (c) if molten metal is carried in hand ladles or bulk ladles by not more than two men per ladle, shall be at least 460 millimetres wide, but where any moulds alongside the aisle are more than 510 millimetres above the floor of the aisle, the aisle shall be not less than 600 millimetres wide ;

impurities from entering into or remaining in the atmosphere of the workroom.

- II. No open coal, coke or wood fires shall be used for drying moulds except in circumstances in which the use of such fires is unavoidable.
- III. Mould stoves, core stoves and annealing furnaces shall be so designed constructed, maintained and worked as to prevent, so far as practicable, offensive or injurious fumes from entering into any workroom during any period when a person is employed therein.
- IV. All knock-out operations shall be carried out
 - (a) in a separate part of foundry suitably partitioned off, being a room or part in which, so far as reasonably practicable, effective and suitable local exhaust ventilation and a high standard of general ventilation are provided ; or
 - (b) in an area of the foundry in which, so far as reasonably practicable, effective and suitable local exhaust ventilation is provided, or where compliance with this requirement is not reasonably practicable, a high standard of general ventilation is provided.
- V. All dressing or fettling operations shall be carried out
 - (a) In a separate room or in a separate part of foundry suitably partitioned off ; or
 - (b) In an area of the foundry set apart for the purpose ; and shall, so far as reasonably practicable, be carried out with effective and suitable local exhaust ventilation or other equally effective means of suppressing dust, operating as near as possible to the point of origin of the dust.

11. Maintenance and examination of exhaust plant.ô

- I. All ventilation plant used for the purpose of extracting, suppressing or controlling dust or fumes shall be properly maintained.
- II. All ventilating plant used for the purpose of extracting, suppressing or controlling dust or fumes shall be examined and inspected once every week by a responsible person. It

- IV. Where appropriate, suitable screens shall be provided for protection against flying materials (including splashes of molten metal and sparks and chips thrown off in the course of any process).
- V. The occupier shall provide and maintain suitable accommodation for the storage and make adequate arrangements for cleaning and maintaining of the protective equipment supplied in pursuance of this paragraph.
- VI. Every person shall make full and proper use of the equipment provided for his protection in pursuance of sub-paragraph (I) and (IV) and shall without delay report to the occupier, manager, or other appropriate person any defect in, or less of, the same.

13. Washing and bathing facilities.—

- I. There shall be provided and maintained in clean state and good repair for the use of all workers employed in the foundry
 - (a) A wash place under cover with either
 - i. a trough with impervious surface fitted with a waste pipe without plug, and of sufficient length to allow at least 60 centimetres for every 10 such persons employed at any one time and having a constant supply of clean water from taps or jets above the trough at intervals of not more than 60 centimetres ; or
 - ii. at least one tap or stand pipe for every 10 such persons employed at any one time, and having a constant supply of clean water, the tap or stand pipe being spaced not less than 1.2 metres apart ; and
 - (b) Not less than one half of the total number of washing places provided at (a) shall be in form of bath rooms ;
 - (c) A sufficient supply of clean towels made of suitable material changed daily, with sufficient supply of nail, brushes and soap.
- II. The facilities provided for the purposes of sub-paragraph (I) shall be placed in charge of a responsible person or persons and maintained in a clean and orderly condition.

- B. P. Manometer; - Cunn;-Stethoscope.

(iii) **Immobilization :**

- Long and short padded boards; - Wire ladders plints ;
- Triangular bandage; - Long and short spine boards.

(iv) **Dressings :**

- Gauze pads ó 4" x 4" ; - Universal dressing 10" x 36",
- Roll of aluminum foils ; - Soft roller bandages 6" x 5 yards ;
- Adhesive tape in 3" roll; -Safety pins ;
- Bandage sheets; - Burn sheet.

(v) **Poisoning :**

- Syrup of Ipecae; - Activated Charcoal Pre-packeted in dozes; - Snake bite kit ;
- Drinking water.

(vi) **Emergency Medicines :**

- As per requirement (under the advice of Medical Officer only).

DECONTAMINATION FACILITIES

In every factory, carrying out -hazardous processø the following provisions shall be made to meet emergency :ô

- iv. fully equipped first aid box ;
- v. readily accessible means of water for washing by workers as well as for drenching the clothing of workers who have been contaminated with hazardous and corrosive substance; and such means shall be as per the scale shown in the Table below :ô

TABLE

No. of persons employed at any time	No. of drenching showers
(i) Up to 50 workers	2
(ii) Between 51 to 200 workers	2 + 1 for every additional 50 or part thereof.
(iii) Between 201 to 500 workers	5 + 1 for every additional 100 or part thereof.
(iv) 501 workers and above	8 + 1 for every additional 200 or part thereof.

SCHEDULE-E

(See rule 66)

1. Definitions. For the purpose of this schedule

- (a) mg/m³ means milligrams of a substances per cubic metre of air ;
- (b) ppm means million particles of a substance per cubic metre of air ;
- (c) ppmv means parts of vapour or gas per million parts of air by volume at 25 degrees centigrade and 760 mm of mercury pressure ;
- (d) Time weighted average concentration means the average concentration of a substance in the air at any work location in a factory computed from evaluation of adequate number of air samples taken at that location, spread over the entire shift on any day, after giving weightage to the duration for which each such sample is collected and the concentration prevailing at the time of taking the sample.

$$\text{Time weighted average concentration} = \frac{C_1T_1 + C_2T_2 + C_nT_n}{T_1 + T_2 + \dots + T_n}$$

Where C₁ represents the concentration of the substance for duration T₁ (in hours) ;

C₂ represents the concentration of the substance for duration T₂ (in hours) ; and

C_n represents the concentration of the substance for duration T_n (in hours).

- (e) Work location means a location in a factory at which a worker works or may be required to work at any time during any shift on any day.

2. Limits of concentration of substances at work location.

(1) The time weighted average concentration of any substance listed in table 1 or 2 of the schedule, at any work location in a factory during any shift on any day shall not exceed the limit of the permissible time weighted average concentration specified in respect of that substance :

Provided that in the case of a substance mentioned in Table 1 in respect of which a limit in terms of short term maximum concentration is indicated,

254 The J&K Official Gazette, 9th Feb., 2021/20th Magha, 1942. [No. 45-a
 the concentration of such a substance may exceed the permissible limit of
 the time weighted average concentration for the substance for short periods
 not exceeding 15 minutes at a time, subject to the condition that

- (a) such periods during which the concentration exceeds the prescribed time weighted average concentration are restricted to not more than 4 per shift ;
- (b) the time interval between any two such periods of higher exposure shall not be less than 60 minutes ; and
- (c) at no time the concentration of the substance in the air shall exceed the limit of short term maximum concentration.

(2) In the case of any substance given in Table 3, the concentration of the substance at any work location in a factory at any time during any day shall not exceed the limit of exposure for that substance specified in the table.

(3) In the cases where the word *öskinö* has been indicated against certain substance mentioned in Tables 1 and 3, appropriate measures shall be taken to prevent absorption through cutaneous routes particularly skin, mucous membranes, and eyes as the limits specified in these Tables are for conditions where the exposure is only through respiratory tract.

(4) (a) In case, the air at any work location contains a mixture of such substances mentioned in Table 1, 2 or 3, which have similar toxic properties, the time weighted concentration of each of these substances during the shift should be such that when these time weighted concentration divided by the respective permissible time weighted average concentration specified in the above mentioned Tables, and the fractions obtained are added together, the total shall not exceed unity.

$$\frac{C_1}{L_1} + \frac{C_2}{L_2} + \frac{C_n}{L_n} \text{ should not exceed unity}$$

Where C_1, C_2, \dots, C_n are the time weighted concentration of toxic substances 1, 2,and n respectively, determined after measurement at work location ;

and L_1, L_2, \dots, L_n are the permissible time weighted average concentration of the toxic substances 1, 2,and n respectively ;

(b) In case the air at any work location contains a mixture of substances, mentioned in Table 1, 2, 3 and these do not have similar toxic properties, then the time weighted concentration of each of these substances shall not exceed the permissible time weighted average concentration specified in the above mentioned Tables, for that particular substance ;

(c) The requirement in clauses (a) and (b) shall be in addition to the requirements in paragraphs 2 (1) and 2 (2).

3. **Sampling and evaluation procedures.** (1) Notwithstanding provisions in any other paragraphs, the sampling and evaluation procedures to be adopted for checking compliance with the provisions in the schedule shall be as per standard procedures in vogue from time to time.

(2) Notwithstanding the provisions in paragraph 5, the following conditions regarding the sampling and evaluation procedures relevant to checking compliance with the provisions in the schedule are specified :ô

(a) For determination of the number of particles per cubic metre in item 1 (a)(i)(1) in Table 2, samples are to be collected by standard or midget impinger and the counts made by light field technique ;

(b) The percentage of quartz in the 3 formulae given in item 1(a)(i) of Table 2 is to be determined from air borne samples ;

(c) For determination of number of fibres as specified in item 2(a) of Table 2, the membrane filter method at 430 x magnification (4mm objective) with phase contrast illumination should be used ;

(d) Both for determination of concentration and percentage of quartz for use of the formula given in item 1(a)(i)(2) of Table 2, the fraction passing through a size select or with the following characteristics should only be considered :ô

Aerodynamic diameter (unit density sphere)	Percentage allowed by size selector

Question	Answer (Yes/No)	Remarks
Any major illness requiring hospitalization in last 1 year (If Yes, Name of the Disease)		
Occupational Injury in Last 1 year : if yes, specify the location of injury and frequency		
D. Current Symptoms-Diseases Module :		
Smoking habit		
Chewing Tobacco or Pan Masala or Gutkha :		
Alcohol Addiction		
Dermatosis (Irritant Contact Dermatitis/Eczema/Chloracne/ Allergic Contact Dermatitis) :		
Mucosal Irritation of Eyes/Nose/ Throat with response to chemical agent or biological agent :		
Symptoms like Respiratory Difficulty/ Chest Tightness/Dry Cough at beginning of shift :		
Currently suffering from TB :		
Jaundice or Hepatitis :		
Currently suffering from Low Back Pain		
Currently suffering from Pain in hand or Elbow :		
Currently suffering from Visual Problems		
Currently suffering from Hearing Problems		
Any current injury (amputation/ fracture/dislocation)		
Any current musculoskeletal sprains/strains		

For use of Industrial Safety Section :

Walking freely over a horizontal bar at 1 ft. height : PASS/FAIL
Wearing a safety belt and tying the rope knot : PASS/FAIL.

Walking over a horizontal structure at 9 ft. height wearing a belt :
PASS/FAIL General physique (O. K./NOT O. K) : PASS/FAIL.

**K. Any other information/examination/biological investigation/
test as mutually agreed by the employer and qualified
medical practitioner.**

13. Describe briefly how the accident or dangerous occurrence took place :
14. Names and addresses of witnesses :
(1)
(2)
15. (a) Nature and extent of injury (e. g. fatal, loss of finger, fracture of leg, scald, scratch followed by-sepsis, etc.)
(b) Location of injury (e. g. right leg, left hand, left eye, etc.)
16. (a) If the accident or dangerous occurrence was not fatal, state whether the injured person was disabled for more than 48 hours :
(b) date and hour of return of work :
17. (a) Physician, dispensary or hospital from whom or which the injured person received or is receiving treatment :
(b) Name of dispensary/panel doctor elected by the injured person :
18. (a) Has the injured person died ? :
(b) If so, date of death :

I certify that to the best of my knowledge and belief the above particulars are correct in every respect.

Date of dispatch of report :

Place :

**Signature, Name and Designation of Owner/Employer/ Manager/
Agent.**

FORM-X

[See sub-rule (2) of rule 24]

REGISTER OF ACCIDENTS AND DANGEROUS OCCURRENCES

Name of injured person (if any)	Date of accident or dangerous occurrence	Date of report to Inspector-cum-Facilitator	Nature of accident or dangerous occurrence	Date of return of injured person to work	Number of days the injured person was absent from work
1	2	3	4	5	6

REQUIREMENTS

On compliance with all or any of the above contraventions, the Inspector-cum-Facilitator shall be informed in the manner prescribed overleaf, of the date and place at which the establishment, lifting appliance, loose gears or similar gear transport equipment, ladders and staging, scaffold can be re-inspected.

Sir,

The contravention notified by you have been effectively attended to. The establishment, lifting appliance, loose gears or similar gear, transport equipment, ladders and staging, scaffold shall be ready for inspection on the date.

Sir,

The contravention notified by you have been effectively attended to. The establishment, lifting appliance, loose gears or similar gear, transport equipment, ladders and staging, scaffold shall be ready for inspection on the date and place named below :

Date of Inspection	Place
Dated at ____ this day of ____ 20____	Employer, Occupier, Owner, Manager, Master, Officer-in-charge or Agents, owner of machinery and gear or the person, who by himself, his agents or his employers, carried on the establishment.

To

The Inspector-cum-Facilitator under the Occupational Safety, Health and Working Conditions Code, 2020.

PART-II

Improvement Notice

Inspector-cum-Facilitator notice to the employer, Owner, Master, Manager, Officer-in-charge or Agents, Owner of lifting appliances, loose gears lifting devices, scaffold or the person, who, by himself, his agents or his employers, carries on the establishment, as the case may be.....

Name of the establishment, lifting appliances, loose gear lifting device, transport equipment, ladders and staging scaffold	Where situated/ lying/used/ location	Port of Registry	Official No. (if any) of the ship

calamity, order of the public authority or any other reason
beyond his controlô

- (a) he shall be entitled to suspend the operation of this agreement during the period of suspension of production in case the production is suspended. The producer shall serve notice in writing of such suspension on the audio-visual worker and shall pay all his/her dues up to the date of service of such notice. Upon resumption of work on the film, this agreement shall revive and shall remain valid for the period stipulated in Clause I excluding the period of suspension therefrom ; or
 - (b) he shall be entitled to terminate this agreement as form the cessation of production, in case the production ceases completely. The producer shall serve a notice in writing of such cessation on the audio-visual worker and make payment of all the amount due to the audio-visual worker at the time of termination.
19. That in case if the Producer desires to terminate this agreement before the expiry of its term for reasons other than misconduct in relation to performance of the audio-visual worker's duties or of his/her unwillingness to perform the services required under this agreement, the producer shall be entitled to do so only upon payment of the balance of the stipulated amount of the agreement. Only after such payment to the audio-visual worker, the Producer shall be entitled to employ another audio-visual worker in his/her place.
20. That the Producer shall have the right to terminate this agreement on ground of misconduct on the part of the audio-visual worker in relation to performance of his/her duties or his/her unwillingness to perform the service required under the agreement, upon payment to the audio-visual worker of the amount due at the time of termination, calculated taking into consideration the audio-visual worker's total work in the audio-visual and the work he/she has completed till the date of termination of this agreement. Termination under this clause shall not be made unless the charges of the Producer against the audio-visual worker are provided before a forum comprising equal number of representatives of the Producers' Organisation and the audio-visual worker's Organisation to which the
