The Challenge Before greytHR

As Teyro Labs continued to grow, managing its expanding workforce and HR operations became increasingly difficult. Several key challenges emerged.

Manual Payroll Processing

Payroll was handled using CSV formats, leading to high chances of errors and delays.

Time-Consuming Leave and Attendance Management

Tracking leave and attendance was inefficient, particularly for remote employees.

Lack of a Unified Platform

HR processes such as attendance, leave management, and payroll were disconnected, making it difficult to keep track of data and create reports.

Increased Administrative Overhead

The HR team had to spend a significant amount of time on routine tasks like attendance correction, payroll adjustments, and manual data entry.

The Shift to greytHR: Improving Efficiency and Reducing Workload

With a growing team and a global footprint, Teyro Labs sought a **future-ready HR solution** that would scale with its ambitions and ensure smooth, compliant operations right from day one. greytHR delivered exactly that.

By adopting greytHR, Teyro Labs unified its core HR functions: attendance, leave, and payroll into a single platform. This improved data accuracy, simplified report generation, and made leave management more efficient. Employees could easily track their leave balances and request time off without relying on HR, freeing up valuable time across the team.

This move to a unified HR solution boosted operational efficiency, reduced manual effort, and enhanced the overall employee experience.

“

The system is extremely easy to use and has significantly reduced our workload. The transition from manual payroll processing to an automated, error-free process was smooth and seamless.

The greytHR Difference

By moving payroll, attendance, leave, and onboarding into one automated platform, Teyro Labs unlocked measurable improvements in efficiency, accuracy, and employee experience.

50% Faster Payroll

Payroll processing time was reduced from 1.5 days to 0.75 day per month. Automation replaced spreadsheets with in-built calculations, real-time data sync, and one-click processing. This cut errors and effort across the payroll cycle.

75% Faster Reports

Monthly report generation once took half a day due to scattered data sources. With consolidated records on greytHR, reports are now ready in under an hour—freeing up time for review, insights, and strategic action.

40% Reduction in Routine HR Work

Admin load was reduced from 5 to 3 working days/week by digitizing leave approvals, payslip distribution, and attendance adjustments.

50% Fewer Compliance Corrections

greytHR's auto-validation flagged discrepancies early, cutting monthly payroll compliance corrections by 50%. This saved time and improved accuracy without manual intervention.

58% Drop in Employee Queries

With self-service access via greytHR's ESS portal, employees could retrieve payslips and manage leave independently. As a result, the number of routine queries directed to HR fell by 58%, saving the team 0.5 working day per week and allowing more time for strategic priorities.

67% Faster Onboarding

Manual onboarding took 3 days. With greytHR's digital workflows and employee self-service, this was brought down to 1 day.

“

With greytHR, everything is on a single, error-free platform, covering leave management, payroll, and more. We've eliminated paperwork, reduced manual effort, and saved significant time every week. The system is simple and highly reliable, making payroll processing smooth and stress-free for our team.
