

SIPTeleport Quickstart

The [SIPTeleport](https://www.subspace.com) Quickstart is here to help you get started and create your first accelerator for your real-time application. Learn more about SIPTeleport and Subspace by visiting: <https://www.subspace.com>.

Quickstart

1. Log in or Sign up using *LinkedIn*, *Github*, or *Google* credentials on the Subspace console at: <https://console.subspace.com>.

2. In the navigation menu on the left, click on the link for "SIPTeleport."

3. In the "SIPTeleport" screen, click on the [+ ADD](#) button.

4. Fill out the menu with the **name** of your new SIPTeleport instance and a **destination IP/URI** and **port** (e.g. sip:sip.mypbx.com:443) you want sent over Subspace. Finally, click **CREATE**.

The screenshot shows the 'Create SIPTeleport' form in the Subspace dashboard. The form has two main input fields: 'Name (required)' and 'Destination (required)'. The 'Name' field contains the text 'Project'. The 'Destination' field contains the text 'sip:128.66.0.1:443'. Below the 'Destination' field, there is a small text note: 'The formatted destination for the SIP Teleport (example: sip:1.1.1.1:1111)'. At the bottom right of the form, there are three buttons: 'DELETE' (in red), 'CANCEL', and 'CREATE' (in green). A mouse cursor is pointing at the 'CREATE' button.

5. On creation, all necessary details are returned, including its unique ID, Subspace-assigned IP address, and port.

The screenshot shows the 'SIPTeleport Details' page in the Subspace dashboard. The page is divided into two main sections: 'SIPTeleport Details' and 'Teleport Entry Points'. The 'SIPTeleport Details' section contains a table with the following information:

Id	Name
0f45c8a2-293c-4655-9315-d9ea78381693	Project

Destination	Status
sip:128.66.0.1:443	ENABLED

The 'Teleport Entry Points' section contains a table with the following information:

Address	Transport Type
129.203.31.1:5094	UDP_TCP
129.203.31.1:10094	TLS

At the bottom right of the page, there is a green 'FINISH' button with a mouse cursor pointing at it.

6. Click **FINISH** to complete the process.
