USE AND MAINTENANCE

For an optimal maintenance of the products and to maintain the characteristics of the materials with which they are made unaltered, some simple attentions are necessary.

WOODS

Cleaning: clean with a soft, damp cloth soaked in lukewarm water. Always dry after cleaning. Immediately remove any liquid substances or other residues to avoid absorption. Use: wooden surfaces, being a natural material, may, over time, undergo color changes with use and exposure to light. Remember that woods cannot withstand direct heat sources on the surface.

METALS

Cleaning: both steel or aluminum metal surfaces and painted surfaces must be cleaned with a soft, damp cloth soaked in hot water. For stubborn stains, mild liquid soap can be diluted in water in moderation. Always dry after cleaning with a soft cloth or chamois leather. Do not use creams and pastes to clean steel, do not use chlorine, do not use bleach and other aggressive detergents. It is not recommended to use abrasive pastes, scouring pads and abrasive sponges that can scratch metal surfaces. Use: pay attention to food stains such as coffee, cola, fruit juices that can leave indelible stains on surfaces

WARRANTY

QUINTI guarantees that the products will keep their characteristics for 6 years from delivery, except for normal wear and tear and on condition that they are used according to the instructions provided. QUINTI will replace at no charge any product found to be non-compliant with this guarantee, without bearing any other liability whatsoever. The application of the guarantee on components, external accessories or materials supplied by the buyer and applied to the products for the purpose of customizing them is excluded.
