Uso e Manutenzione

For an optimal maintenance of the products and to maintain unchanged the characteristics of the materials with which they are made, some simple attentions are necessary.

THE LEATHERS

Cleaning: clean with a damp white cloth soaked in water only. Use high-quality leather care products according to the manufacturer's instructions. In case of doubt, test the product on a part hidden from view to verify the result, waiting at least 24 hours for possible problems. Use: remember that the leather is a delicate material therefore it is recommended to take care during use.

THE METALS

Cleaning: both metal surfaces made of steel or aluminium, as well as painted surfaces, must be cleaned with a damp and soft cloth soaked in hot water. For the most stubborn stains, you can dilute liquid neutral soap in water with moderation. Always dry after cleaning with a soft cloth or deer leather. Do not use creams and pastes to clean steel, do not use chlorine, do not use bleach and other aggressive detergents. It is not recommended to use abrasive pastes, scouring pads and sponges that can scratch metal surfaces. Use: be careful of food stains such as coffee, cola, fruit juices that can leave indelible stains on surfaces.

THE WOODS

Cleaning: Clean with a damp, soft cloth soaked in warm water. Always dry after cleaning. Remove any liquid or other residue immediately to prevent absorption.

Use: wood surfaces, being a natural material, may, over time, undergo color changes with use and exposure to light. Remember that wood cannot withstand direct heat sources on the Surface.
