Usage and Care

For optimal maintenance of the products and to preserve the characteristics of the materials they are made of, a few simple precautions are necessary.

FABRICS

Cleaning: refer to the maintenance and washing recommendations in the fabric section of the color chart.

Use: care should be taken when using this fabric and it can be torn or cut.

LEATHERS

Cleaning: clean with a damp white cloth soaked in water only. Use high-quality leather cleaning products, carefully following the manufacturers instructions. If in doubt, test the product on a hidden area to check the result, waiting at least 24 hours to see if any problems arise.

Use: remember that leather is a delicate material, so care should be taken when using it.

WOODS

Cleaning: clean with a soft damp cloth soaked in warm water. Always dry after cleaning- Immediately remove any liquids or other residues to prevent absorption.

Use: wood surfaces, being a natural material, may undergo color changes over time with use and exposure to light. Remember that wood cannot withstand direct heat sources on the surface.

METALS

Cleaning: both metal surfaces in steel or aluminum and painted surfaces must be cleaned with a soft damp cloth soaked in warm water. For stubborn stains, you can dilute a small amount of neutral liquid soap in water. Always dry after cleaning with a soft cloth or chamois leather. Do not use abrasive pastes, scouring pads, or abrasive sponges, as these may scratch metal surfaces.

Use: be careful with food stains such as coffee, cola, and fruit juice, which can leave indelible stains on surfaces.

WARRANTY

QUINTI guarantees that the products will retain their characteristics for 6 years from delivery, except for normal wear and tear and provided that they are used in accordance with the instructions provided. QUINTI will replace any product found not to comply with this warranty at no cost, without incurring any other liability whatsoever. The warranty does not apply to components, external accessories, or materials supplied by the buyer and applied to the products for the purpose of customizing them. For optimal maintenance of the products and to keep the characteristics of the materials with which they are made unchanged, some simple precautions are necessary.
