DIMENSIONS

1. No arms, 4 legs: L. 43, P. 46/54, H. 46/79 cm
2. With arms, 4 legs, 4 gambe: L. 40/69, p. 47/54, h. 46/79 cm
3. With arms, swivel: L. 40/69, P. 47/54, H. 50/82 cm
4. Sofa with arms, 4 gambe: L. 108/137, P. 47/54, H. 46/79 cm
5. Sofa without backrest, 4 gambe: L. 108/137, P. 47, H. 46 cm

STRUCTURE

The 4-leg structure is made entirely of metal with a tubular diameter of 20 mm, while the 4-spoke rotating version is made of tubular metal with a conical section.

The structures are available in painted variants "Bronze brown" or Gold and in the Nickel Satin version.

The seat and backrest are made with an internal metal structure complete with elastic straps that have the function of increasing comfort, all covered with rubber of variable density.

Also available with 1IM Approved flame retardant rubbers

Disassembly

All products have been designed in such a way as to allow them to be disassembled at the end of their useful life, so that their parts and components can be reused, recycled, or recovered for energy purposes.

Warranty and Safety

QUINTI guarantees that the products will retain their characteristics for 6 years from delivery, except for normal wear and tear and provided that they are used in accordance with the instructions provided. QUINTI will replace any product found not to comply with this warranty at no cost, without incurring any other liability whatsoever. The warranty does not apply to components, external accessories, or materials supplied by the buyer and applied to the products for the purpose of customizing them. For optimal maintenance of the products and to preserve the characteristics of the materials with which they are made, a few simple precautions are necessary.

All chairs offered are SAFE in accordance with EU Regulations 2023/988 on general product safety (GPSR), reinforced by UNI EN certifications.

The company shall not be held liable if the product is used improperly (standing on it or using it as a ladder, or swinging it in a way that could compromise its functioning and the user's safety). To lift or move the product, grasp it firmly by the supporting structure. The product must not be subjected to off-center loads; it is designed to be used under normal conditions, resting on its four legs or base.

Usage and Care

For optimal maintenance of the products and to preserve the characteristics of the materials they are made of, a few simple precautions are necessary.

FABRICS

Cleaning: please refer to the care and washing instructions provided in the fabric section of the color chart.

Use: it is recommended to take care when using them as they can be torn or cut.

LEATHERS

Cleaning: clean with a damp white cloth soaked in water only. Use high-quality leather cleaning products, carefully following the manufacturer's instructions. If in doubt, test the product on a hidden area to check the result, waiting at least 24 hours to see if any problems arise.

Use: please remember that leather is a delicate material, so care should be taken when using it.

METALS

Cleaning: both steel and aluminum metal surfaces, should be cleaned with a soft damp cloth soaked in warm water. For stubborn stains, you can dilute a small amount of mild liquid soap in water. Always dry after cleaning with a soft cloth or chamois leather. Do not use creams or pastes to clean steel, do not use chlorine, bleach, or other aggressive detergents. Do not use abrasive pastes, scouring pads, or abrasive sponges, as they may scratch metal surfaces.

Use: be careful with food stains such as coffee, cola, and fruit juice, which can leave permanent stains on surfaces.

WOODS

Cleaning: clean with a soft, damp cloth soaked in warm water. Always dry after cleaning. Immediately remove any liquids or other residues to prevent absorption.

Use: wood surfaced, being a natural material, may undergo color changes over time with use and exposure to light.

Please note that wood cannot withstand direct heat sources on its surface.
