

A modular armchair with a contemporary design

MODULAR ELEMENTS

1 MODULAR ARMCHAIR

2 MODULAR ARMREST

Frame & Padding

Made entirely from cold-foamed polyurethane with a suitable density that ensures exceptional comfort. It features large, rounded vertical sections that give it a soft, inviting appearance. The armrest can be used either to complete a set or to be placed between two seats.

Measures cm	Seat height	Total height	Width	Depth
Seat unit with backrest	45	73	90	80/100
Armrest component		73	20	100

Upholsteries

Warranty & Safety

QUINTI guarantees that the products will retain their characteristics for 6 years from delivery, subject to normal wear and tear and provided they are used in accordance with the instructions supplied. QUINTI will replace, free of charge, any product found not to comply with this guarantee, without assuming any further liability whatsoever. The guarantee does not apply to components, external accessories or materials supplied by the purchaser and fitted to the products for the purpose of customisation. For optimal maintenance of the products and to preserve the characteristics of the materials from which they are made, a few simple precautions are necessary.

All seating products offered are SAFE in accordance with the provisions of EU Regulation 2023/988 on general product safety (GPSR), reinforced by UNI EN certifications.

The company accepts no liability in the event of improper use (standing on the product or using it as a step ladder, or subjecting it to rocking motions that could compromise its operation and the user's safety. To lift or move the product, grip the supporting structure firmly. The product must not be subjected to off-centre loads; it has been designed for use under normal conditions, supported on four legs or on the base).

Use & Maintenance

To ensure optimal care of the products and to preserve the characteristics of the materials from which they are made, a few simple precautions are required.

FABRICS

Cleaning: please refer to the care and washing instructions provided in the fabric section of the colour chart. Use: please take care when using the products, as they may tear or become cut.

LEATHER

Cleaning: clean with a damp white cloth soaked in water only. Use high-quality leather cleaning products, carefully following the manufacturer's instructions. If in doubt, test the product on an inconspicuous area to check the result, waiting at least 24 hours to see if any issues arise. Use: please note that leather is a delicate material, so care should be taken when using it.

METALS

Cleaning: both metal surfaces (steel or aluminium) and painted surfaces should be cleaned with a soft, damp cloth soaked in warm water. For stubborn stains, a small amount of mild liquid soap may be diluted in water. Always dry the surface after cleaning with a soft cloth or chamois leather. Do not use creams or pastes to clean steel; do not use chlorine, bleach or other aggressive detergents. We do not recommend using abrasive pastes, scouring pads or abrasive sponges, as these may scratch the metal surfaces. Use: take care with food stains such as coffee, cola and fruit juices, as these can leave permanent marks on the surfaces.

WOOD

Cleaning: Clean with a soft, damp cloth soaked in lukewarm water. Always dry the surface after cleaning. Remove any liquids or other residues immediately to prevent absorption.

Use: as wood is a natural material, its surfaces may, over time, undergo colour changes due to use and exposure to light. Please note that wood cannot withstand direct heat sources on its surface.
