## **Disassemblability**

---

All products have been designed to be dismantled at the end of their useful life, so that their parts and components can be reused, recycled or recovered for energy purposes.

## **Warranty & Safety**

---

QUINTI guarantees that the products will retain their characteristics for 6 years from delivery, subject to normal wear and tear and provided they are used in accordance with the instructions supplied. QUINTI will replace, free of charge, any product found not to comply with this guarantee, without assuming any further liability whatsoever. The guarantee does not apply to components, external accessories or materials supplied by the purchaser and fitted to the products for the purpose of customisation. For optimal maintenance of the products and to preserve the characteristics of the materials from which they are made, a few simple precautions are necessary.

**All seating products offered are SAFE in accordance with the provisions of EU Regulation 2023/988 on general product safety (GPSR), reinforced by UNI EN certifications.**

The company accepts no liability in the event of improper use (standing on the product or using it as a step ladder, or subjecting it to rocking motions that could compromise its operation and the user's safety. To lift or move the product, grip the supporting structure firmly. The product must not be subjected to off-centre loads; it has been designed for use under normal conditions, supported on four legs or on the base).

## **Use & Maintenance**

---

To ensure optimal care of the products and to preserve the characteristics of the materials from which they are made, a few simple precautions are required.

### **FABRICS**

Cleaning: please refer to the care and washing instructions provided in the fabric section of the colour chart. Use: please take care when using the products, as they may tear or become cut.

### **LEATHER**

Cleaning: clean with a damp white cloth soaked in water only. Use high-quality leather cleaning products, carefully following the manufacturer's instructions. If in doubt, test the product on an inconspicuous area to check the result, waiting at least 24 hours to see if any issues arise. Use: please note that leather is a delicate material, so care should be taken when using it.

### **METALS**

Cleaning: both metal surfaces (steel or aluminium) and painted surfaces should be cleaned with a soft, damp cloth soaked in warm water. For stubborn stains, a small amount of mild liquid soap may be diluted in water. Always dry the surface after cleaning with a soft cloth or chamois leather. Do not use creams or pastes to clean steel; do not use chlorine, bleach or other aggressive detergents. We do not recommend using abrasive pastes, scouring pads or abrasive sponges, as these may scratch the metal surfaces. Use: take care with food stains such as coffee, cola and fruit juices, as these can leave permanent marks on the surfaces.
